

Report to Shareholders

Second Quarter 2025

National Bank reports its results for the Second Quarter of 2025 and raises its quarterly dividend by 4 cents to \$1.18 per share

The financial information reported in this document is based on the unaudited interim condensed consolidated financial statements for the quarter and the six-month period ended April 30, 2025 and is prepared in accordance with IAS 34 – *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB). All amounts are presented in Canadian dollars.

MONTREAL, May 28, 2025 – For the second quarter of 2025, National Bank is reporting net income of \$896 million, down 1% from \$906 million in the second quarter of 2024 and diluted earnings per share stood at \$2.17 compared to \$2.54 in the second quarter of 2024. Excluding specified items⁽¹⁾ recorded in the second quarter of 2025, notably the acquisition and integration costs related to the acquisition of Canadian Western Bank (CWB)⁽²⁾, which was completed on February 3, 2025 as well as the initial provisions for credit losses on non-impaired loans acquired, adjusted net income⁽¹⁾ stood at \$1,166 million compared to \$906 million in the corresponding quarter of 2024. Adjusted diluted earnings per share⁽¹⁾ stood at \$2.85, up 12% from \$2.54 in the second quarter of 2024.

For the six-month period ended April 30, 2025, the Bank's net income totalled \$1,893 million, up 4% from \$1,828 million for the corresponding period of 2024. Diluted earnings per share stood at \$4.91 for the six-month period ended April 30, 2025 versus \$5.13 for the corresponding period in 2024, the decrease being attributable to the common shares issued as part of the acquisition of CWB⁽²⁾. Excluding specified items⁽¹⁾, adjusted net income⁽¹⁾ for the six-month period ended April 30, 2025 totalled \$2,216 million, up 21% from \$1,828 million for the six-month period ended April 30, 2024, and adjusted diluted earnings per share⁽¹⁾ stood at \$5.78, up 13% from \$5.13 for the six-month period ended April 30, 2024.

“The Bank delivered strong second quarter results, supported by solid organic growth in our business segments. We were also pleased to complete the acquisition of Canadian Western Bank during the quarter, marking a significant step forward in the acceleration of our domestic strategy and in extending the depth and reach of our banking capabilities for our clients,” said Laurent Ferreira, President and Chief Executive Officer of National Bank of Canada.

“In the context of continued geopolitical and geoeconomic uncertainty, our strong capital position allows us to support business growth,” concluded Mr. Ferreira.

Highlights

(2) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(3) Certain amounts have been adjusted to reflect the discontinuation of taxable equivalent basis reporting for revenues and income taxes. For additional information, see the Financial Reporting Method section.

(4) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

(5) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.

Personal and Commercial⁽¹⁾

- Net income totalled \$132 million in the second quarter of 2025 versus \$311 million in the second quarter of 2024, a 58% decrease. Adjusted net income⁽²⁾ totalled \$316 million, up 2% from the corresponding quarter of 2024.
- At \$1,416 million, second-quarter total revenues rose \$285 million or 25% year over year due to the inclusion of CWB, which represents \$240 million or 21%, as well as to an increase in net interest income related to growth in loan and deposit volumes, partly offset by a lower net interest margin.
- Compared to a year ago, personal lending grew 11% and commercial lending grew 64%, mainly due to the inclusion of CWB loans during the second quarter of 2025.
- The net interest margin⁽³⁾ stood at 2.30% in the second quarter of 2025, down from 2.36% in the second quarter of 2024.
- Second-quarter non-interest expenses stood at \$804 million, up 31% year over year, of which the inclusion of CWB drove a 25% increase.
- Provisions for credit losses rose \$337 million year over year, mainly due to the initial provisions for credit losses of \$230 million on non-impaired loans acquired from CWB as well as provisions for credit losses on impaired loans and non-impaired loans in Personal Banking and Commercial Banking.
- At 56.8%, the second-quarter efficiency ratio⁽³⁾ had deteriorated compared to 54.1% in the second quarter of 2024, partly due to specified items⁽²⁾ related to the acquisition of CWB.

Wealth Management⁽¹⁾

- Net income totalled \$232 million in the second quarter of 2025, a 13% increase from \$205 million in the corresponding quarter of 2024.
- Second-quarter total revenues amounted to \$791 million compared to \$683 million in second-quarter 2024, a \$108 million or 16% increase driven mainly by growth in fee-based revenues, net interest income and the inclusion of CWB revenues.
- Second-quarter non-interest expenses stood at \$476 million versus \$400 million in second-quarter 2024, a 19% increase associated with revenue growth and with the impact of the inclusion of CWB.
- At 60.2%, the second-quarter efficiency ratio⁽³⁾ had deteriorated compared to 58.6% in the second quarter of 2024.

Financial Markets⁽¹⁾

- Net income totalled \$501 million in the second quarter of 2025, up 56% from \$322 million in the second quarter of 2024.
- Second-quarter total revenues amounted to \$1,101 million, a 62% increase that was mainly due to growth in global markets revenues.
- Second-quarter non-interest expenses stood at \$403 million in second-quarter 2025 compared to \$312 million in second-quarter 2024, an increase that was due to higher variable compensation.
- Second-quarter provisions for credit losses were \$64 million compared to \$11 million in the same quarter of 2024, owing to provisions for credit losses on impaired loans.
- At 36.6%, the efficiency ratio⁽³⁾ had improved from 45.8% in the second quarter of 2024 due to the marked increase in revenues.

U.S. Specialty Finance and International

- Net income totalled \$169 million in the second quarter of 2025, up 4% from \$163 million in the second quarter of 2024.
- Second-quarter total revenues amounted to \$390 million, an 11% year-over-year increase driven mainly by revenue growth at the ABA Bank subsidiary.
- Non-interest expenses for the second quarter of 2025 stood at \$117 million, an 8% year-over-year increase attributable to business growth at the Credigy and ABA Bank subsidiaries.
- Second-quarter provisions for credit losses were up \$22 million year over year, with the increase being attributable to both Credigy and ABA Bank.
- At 30.0%, the efficiency ratio⁽³⁾ had improved from 30.9% in the second quarter of 2024.

Other⁽¹⁾

- The *Other* segment reported a net loss of \$138 million in the second quarter of 2025 compared to a net loss of \$95 million in the same quarter of 2024, owing to the CWB acquisition and integration charges, which are considered specified items⁽²⁾, partly offset by a higher contribution from Treasury activities and the inclusion of CWB revenues in the second quarter of 2025.

Capital Management⁽¹⁾

- As at April 30, 2025, the Common Equity Tier 1 (CET1) capital ratio under Basel III⁽⁴⁾ stood at 13.4%, down from 13.7% as at October 31, 2024. The decrease is mainly explained by the growth in the risk-weighted assets partly due to the inclusion of CWB.
- As at April 30, 2025, the Basel III⁽⁴⁾ leverage ratio was 4.7%, up from 4.4% as at October 31, 2024.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

Management's Discussion and Analysis

May 27, 2025

The following Management's Discussion and Analysis (MD&A) presents the financial condition and operating results of National Bank of Canada (the Bank). This analysis was prepared in accordance with the requirements set out in *National Instrument 51-102, Continuous Disclosure Obligations*, released by the Canadian Securities Administrators (CSA). This MD&A should be read in conjunction with the unaudited interim condensed consolidated financial statements (the Consolidated Financial Statements) and accompanying notes for the quarter and six-month period ended April 30, 2025 and with the audited annual consolidated financial statements for the year ended October 31, 2024 prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), unless otherwise indicated. IFRS represent Canadian generally accepted accounting principles (GAAP). All amounts are presented in Canadian dollars. Additional information about the Bank, including the *Annual Information Form*, can be obtained from the Bank's website at nbc.ca and SEDAR+'s website at sedarplus.ca. The information found in the various documents and reports published by the Bank or the information available on the Bank's website and mentioned herein is not and should not be considered incorporated by reference into the Report to Shareholders, the Management's Discussion and Analysis, or the consolidated financial statements, unless expressly stated otherwise.

Caution Regarding Forward-Looking Statements

Certain statements in this document are forward-looking statements. These statements are made in accordance with applicable securities legislation in Canada and the United States. The forward-looking statements in this document may include, but are not limited to, statements in the messages from management, as well as other statements about the economy, market changes, the Bank's objectives, outlook, and priorities for fiscal 2025 and beyond, the strategies or actions that the Bank will take to achieve them, expectations for the Bank's financial condition and operations, the regulatory environment in which it operates, the potential impacts of increased geopolitical uncertainty on the Bank and its clients, its environmental, social, and governance targets and commitments, the impacts and benefits of the acquisition of Canadian Western Bank (CWB), and certain risks to which the Bank is exposed. The Bank may also make forward-looking statements in other documents and regulatory filings, as well as orally. These forward-looking statements are typically identified by verbs or words such as "outlook", "believe", "foresee", "forecast", "anticipate", "estimate", "project", "expect", "intend" and "plan", the use of future or conditional forms, notably verbs such as "will", "may", "should", "could" or "would", as well as similar terms and expressions.

These forward-looking statements are intended to assist the security holders of the Bank in understanding the Bank's financial position and results of operations as at the dates indicated and for the periods then ended, as well as the Bank's vision, strategic objectives, and performance targets, and may not be appropriate for other purposes. These forward-looking statements are based on current expectations, estimates, assumptions and intentions that the Bank deems reasonable as at the date thereof and are subject to inherent uncertainty and risks, many of which are beyond the Bank's control. There is a strong possibility that the Bank's express or implied predictions, forecasts, projections, expectations, or conclusions will not prove to be accurate, that its assumptions will not be confirmed, and that its vision, strategic objectives, and performance targets will not be achieved. The Bank cautions investors that these forward-looking statements are not guarantees of future performance and that actual events or results may differ materially from these statements due to a number of factors. Therefore, the Bank recommends that readers not place undue reliance on these forward-looking statements, as a number of factors could cause actual results to differ materially from the expectations, estimates, or intentions expressed in these forward-looking statements. Investors and others who rely on the Bank's forward-looking statements should carefully consider the factors listed below as well as other uncertainties and potential events and the risks they entail. Except as required by law, the Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time, by it or on its behalf.

Assumptions about the performance of the Canadian and U.S. economies in 2025, in particular in the context of increased geopolitical uncertainty, and how that performance will affect the Bank's business are among the factors considered in setting the Bank's strategic priorities and objectives, including allowances for credit losses. These assumptions appear in the *2024 Annual Report* in the Economic Review and Outlook section and, for each business segment, in the Economic and Market Review sections of the *2024 Annual Report* and the Economic Review and Outlook section of this document, and may be updated in the quarterly reports to shareholders filed thereafter.

The forward-looking statements made in this document are based on a number of assumptions and their future outcome is subject to a variety of risk factors, many of which are beyond the Bank's control and the impacts of which are difficult to predict. These risk factors include, among others, the general economic environment and business and financial market conditions in Canada, the United States, and the other countries where the Bank operates, including recession risk; geopolitical and sociopolitical uncertainty; the measures affecting trade relations between Canada and its partners, including the imposition of tariffs and any measures taken in response to such tariffs, as well as the possible impacts on our clients, our operations and, more generally, the economy; exchange rate and interest rate fluctuations; inflation; global supply chain disruptions; higher funding costs and greater market volatility; changes to fiscal, monetary, and other public policies; regulatory oversight and changes to regulations that affect the Bank's business; the Bank's ability to successfully integrate CWB and the undisclosed costs or liability associated with the acquisition; climate change, including physical risks and risks related to the transition to a low-carbon economy; the Bank's ability to meet stakeholder expectations on environmental and social issues, the need for active and continued stakeholder engagement; the availability of comprehensive and high-quality information from customers and other third parties, including greenhouse gas emissions; the ability of the Bank to develop indicators to effectively monitor progress; the development and deployment of new technologies and sustainable products; the ability of the Bank to identify climate-related opportunities as well as to assess and manage climate-related risks; significant changes in consumer behaviour; the housing situation, real estate market, and household indebtedness in Canada; the Bank's ability to achieve its key short-term priorities and long-term strategies; the timely development and launch of new products and services; the ability of the Bank to recruit and retain key personnel; technological innovation, including open banking and the use of artificial intelligence; heightened competition from established companies and from competitors offering non-traditional services; model risk; changes in the performance and creditworthiness of the Bank's clients and counterparties; the Bank's exposure to significant regulatory issues or litigation; changes made to the accounting policies used by the Bank to report its financial position, including the uncertainty related to assumptions and significant accounting estimates; changes to tax legislation in the countries where the Bank operates; changes to capital and liquidity guidelines as well as to the instructions related to the presentation and interpretation thereof; changes to the credit ratings assigned to the Bank by financial and extra-financial rating agencies; potential disruptions to key suppliers of goods and services to the Bank; third-party risk, including failure by third parties to fulfil their obligations to the Bank; the potential impacts of disruptions to the Bank's information technology systems due to cyberattacks and theft or disclosure of data, including personal information and identity theft; the risk of fraudulent activity; and possible impacts of major events on the economy, market conditions, or the Bank's outlook, including international conflicts, natural disasters, public health crises, and the measures taken in response to these events; and the ability of the Bank to anticipate and successfully manage risks arising from all of the foregoing factors.

The foregoing list of risk factors is not exhaustive, and the forward-looking statements made in this document are also subject to credit risk, market risk, liquidity and funding risk, operational risk, regulatory compliance risk, reputation risk, strategic risk, and social and environmental risk as well as certain emerging risks or risks deemed significant. Additional information about these factors is provided in the Risk Management section of the *2024 Annual Report* as well as in the Risk Management section of this Report to Shareholders for the second quarter of 2025 and may be updated in the quarterly reports to shareholders filed thereafter.

Acquisition

Canadian Western Bank (CWB) Acquisition

On February 3, 2025, the Bank completed the acquisition of CWB, a diversified financial services institution based in Edmonton, Alberta, in which the Bank had already been holding a 5.9% equity interest. This transaction will enable the Bank to accelerate its growth across Canada. The business combination brings together two complementary Canadian banks with growing businesses, thereby enhancing customer service by offering a full range of products and services nationwide, with a regionally focused service model.

The total consideration transferred of \$6.8 billion included \$5.3 billion for 100% of the common shares of CWB acquired by way of a share exchange at an exchange ratio of 0.450 of a common share of the National Bank for each CWB common share, other than those held by the National Bank, \$1.4 billion for the settlement of pre-existing relationships and \$0.1 billion for the issuance of replacement share-based payment award. The fair value of the Bank's common shares issued was determined on the basis of the share price on the Toronto Stock Exchange (TSX) at closing on January 31, 2025 being a price of \$128.99 per share. At acquisition date, the Bank obtained a 100% interest in the CWB voting shares and the 5.9% previously held interest was remeasured to its fair value of \$0.3 billion. The non-controlling interest in CWB recognized at acquisition date was measured at a fair value of \$0.6 billion and represents CWB's preferred shares and Limited Recourse Capital Notes (LRCN) outstanding on that date. Total purchase consideration amounted to \$7.7 billion.

Based on the estimated fair values, the preliminary purchase price allocation, including goodwill, assigns \$45.4 billion to assets and \$37.7 billion to liabilities at acquisition date. The estimated goodwill of \$1.6 billion reflects the expected expense synergies from our Personal and Commercial and Wealth Management banking services operations, expected funding synergies, and the expected growth from the product and service platform at a national scale. Goodwill is not deductible for tax purposes.

For additional information, see Note 19 to the Consolidated Financial Statements.

The following table present the impacts of the CWB acquisition on the results of Personal and Commercial Banking, the main segment impacted, and on the Bank's consolidated results.

	Quarter ended April 30, 2025									Six months ended April 30, 2025

Economic Review and Outlook

Global Economy

The most significant trend last month was undoubtedly the easing of the trade war between Washington and its trading partners. Although any form of appeasement is clearly positive for the global economy, we believe that the current enthusiasm is somewhat exaggerated. After all, not since 1939 has the average tariff imposed by Washington been this high, and even after the recent reduction. While it is true that tariffs could continue to fall as new agreements are reached, we believe that a return to the status quo of recent years is highly unlikely. We would also point out that most of the agreements signed by Washington have an expiry date (90 days in most cases). This means that higher tariffs could always be reintroduced if negotiations to establish a new trade framework between the United States and its main trading partners were to end in deadlock. These risks, combined with a less favourable trade environment, should continue to hamper global growth in the coming months. Although the actions taken by central banks and governments have been limited, they should help to limit the damage.

In the United States, the gross domestic product (GDP) contracted slightly in the first quarter due to a sharp increase in imports, a phenomenon that is expected to reverse in the second quarter. A desire to act ahead of any tariffs being imposed not only boosted imports but also private domestic demand, which rose by 3% in the first quarter on an annualized basis. The labour market remains resilient for now. However, signs of weakness are apparent, including an increase in the number of long-term unemployed and a drop in job postings. Although recently the protectionist measures have sharply reduced, they are likely to keep inflation above the central bank's target for some time to come. Perhaps this will not be enough to prevent a rate cut this year, but enough to prompt the central bank to adopt a cautious approach. Higher-than-expected policy rates, combined with trade retaliation and boycotts by other countries (affecting, in particular, the tourism sector), could slow growth in the second half of the year. All this should result in growth of 1.5%⁽¹⁾ this year and 1.1%⁽¹⁾ in 2026.

Canadian Economy

Even though the average effective tariff imposed by the Americans on Canadian exports is probably only around 6%, taking into account that products compliant with the United States-Canada-Mexico Agreement (USMCA) are not affected, the risk of escalation and the resulting lack of visibility are paralyzing Canadian businesses. And, even though just a few months ago, investment intentions were pointing to a recovery in 2025, the situation has now changed dramatically, with several projects put on hold. Uncertainty is also beginning to affect the labour market, which is showing signs of weakness. The unemployment rate has risen by 0.3 of a percentage point in the last two months, while private sector employment has fallen by at least 75,000. A decline of this magnitude rivals that experienced during the pandemic lockdown and the worst of the 2008-2009 financial crisis. For now, Ontario has been the province hardest hit by the current situation, with 62,000 jobs lost since February, including 30,000 in the manufacturing sector. Against this backdrop, consumer confidence has fallen to historically low levels, and the real estate data already show that buyers are reluctant to make commitments. This points to weak consumption in the coming months as fears of job losses intensify. With the dollar still resilient, inflation generally under control and retaliatory tariff measures relatively limited, the Bank of Canada should be able to lower its key interest rate to 2.0% by the end of the year. This should be sufficient for now, as the federal government also intends to step in to limit the economic damage. Against a backdrop of very weak population growth, we forecast GDP growth of only 1.1%⁽¹⁾ in 2025, with a slight contraction in the economy in the second and third quarters and an average unemployment rate for this year of 7.1%⁽¹⁾ (6.9%⁽¹⁾ in April, peaking at 7.4%⁽¹⁾ in the fourth quarter). GDP growth of 0.9%⁽¹⁾ is expected for 2026.

Quebec Economy

Despite some headwinds, Quebec's economy is well positioned to face any new challenges as they arise. Quebecers have been less affected by the fight against inflation since 2022 and the resulting restrictive monetary policy because they are less indebted than consumers elsewhere. Quebec's unemployment rate was 6.0% in April, the third lowest among Canada's provinces and 0.9 below the national average. Survey data also indicate that Quebec consumers are holding up better than elsewhere, as the province has the highest share of households that consider their financial situation to be good. Quebec households have a higher savings rate, which could enable them to better withstand the headwinds ahead. Despite the current uncertainty, we also note greater resilience in the Quebec real estate market compared to that of Ontario and British Columbia in particular. We continue to believe that Quebec's GDP could prove relatively resilient compared to the rest of the country due to its solid fundamentals. Like other provinces, Quebec is vulnerable to U.S. protectionism. Non-energy exports to the United States account for 14.2% of GDP, slightly higher than the national average of 13.0%. However, the Quebec economy is less vulnerable to sectoral shocks. In fact, Quebec is the fourth most diversified jurisdiction in North America, after Manitoba, Pennsylvania and Texas. In terms of exports, Quebec is the most diversified province. Our growth forecast for the province is 0.9%⁽¹⁾ in 2025, following on 1.4% growth in 2024. With population growth lower than in the rest of the country, Quebec should continue to have one of the lowest unemployment rates in the federation on average in 2025, at 6.0%⁽¹⁾ (compared to 7.1%⁽¹⁾ for Canada).

Financial Reporting Method

The Bank's Consolidated Financial Statements are prepared in accordance with IFRS, as issued by the IASB and represent Canadian GAAP.

Effective November 1, 2024, the Bank discontinued taxable equivalent basis (TEB) reporting for revenues and income taxes. Using the TEB method is less relevant since the introduction of the Pillar 2 rules (global minimum tax) during the first quarter of 2025 and Bill C-59 in relation to the taxation of certain Canadian dividends during fiscal 2024. This change has no impact on net income previously disclosed. Data for the 2024 periods were adjusted to reflect this change.

On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and six-month period ended April 30, 2025 in the Personal and Commercial, Wealth Management, and Financial Markets segments and in the *Other* heading of segment disclosures. For additional information on the impact of CWB acquisition on the Bank's results, see the Acquisition section.

Non-GAAP and Other Financial Measures

The Bank uses a number of financial measures when assessing its results and measuring overall performance. Some of these financial measures are not calculated in accordance with GAAP. *Regulation 52-112 Respecting Non-GAAP and Other Financial Measures Disclosure* (Regulation 52-112) prescribes disclosure requirements that apply to the following measures used by the Bank:

- non-GAAP financial measures;
- non-GAAP ratios;
- supplementary financial measures;
- capital management measures.

Non-GAAP Financial Measures

The Bank uses non-GAAP financial measures that do not have standardized meanings under GAAP and that therefore may not be comparable to similar measures used by other companies. Presenting non-GAAP financial measures helps readers to better understand how management analyzes results, shows the impacts of specified items on the results of the reported periods, and allows readers to better assess results without the specified items if they consider such items not to be reflective of the underlying performance of the Bank's operations.

The key non-GAAP financial measures used by the Bank to analyze its results are described below, and a quantitative reconciliation of these measures is presented in the tables in the Reconciliation of Non-GAAP Financial Measures section on pages 10 to 12 and in the Consolidated Results table on page 14. It should be noted that, for the quarter and the six-month period ended April 30, 2025, as part of the CWB transaction, several acquisition-related items have been excluded from results since, in the opinion of management, they do not reflect the underlying performance of the Bank's operations, in particular, acquisition and integration charges, amortization of intangible assets related to the CWB acquisition and initial provisions for credit losses on non-impaired loans acquired from CWB. In addition, for the six-month period ended April 30, 2025, the amortization of subscription receipt issuance costs, the gain resulting from the remeasurement at fair value of the CWB common shares previously held by the Bank, and the loss resulting from the impact of managing fair value changes were excluded from the results. For the quarter and the six-month period ended April 30, 2024, no specified items had been excluded from results.

Adjusted Net Interest Income

This item represents net interest income excluding specified items. Specified items are excluded so that net interest income can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Non-Interest Income

This item represents non-interest income excluding specified items. Specified items are excluded so that non-interest income can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Total Revenues

This item represents total revenues excluding specified items. It consists of adjusted net interest income and adjusted non-interest income. Specified items are excluded so that total revenues can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Non-Interest Expenses

This item represents non-interest expenses excluding specified items. Specified items are excluded so that non-interest expenses can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Income Before Provisions for Credit Losses and Income Taxes

This item represents income before provisions for credit losses and income taxes excluding specified items. It also represents the difference between adjusted total revenues and adjusted non-interest expenses. Specified items are excluded so that income before provisions for credit losses and income taxes can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Provisions for Credit Losses

This item represents provisions for credit losses excluding specified items. Specified items are excluded so that provisions for credit losses can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Income Taxes (Recovery)

This item represents income taxes excluding income taxes (recovery) on specified items.

Adjusted Net Income

This item represents net income excluding specified items. Specified items are excluded so that net income can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Net Income Attributable to Common Shareholders

This item represents net income attributable to common shareholders excluding specified items. Specified items are excluded so that net income attributable to common shareholders can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Basic Earnings Per Share

This item represents basic earnings per share excluding specified items. Specified items are excluded so that basic earnings per share can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Diluted Earnings Per Share

This item represents diluted earnings per share excluding specified items. Specified items are excluded so that diluted earnings per share can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

The Bank also uses the below-described measures to assess its results, and a quantitative reconciliation of these non-GAAP financial measures is presented on page 7 of the document entitled *Supplementary Financial Information – Second Quarter 2025* available on the Bank's website at nbc.ca.

Adjusted Non-Trading Net Interest Income

This item represents non-trading net interest income excluding specified items. It includes revenues related to financial assets and financial liabilities associated with non-trading activities, net of interest expenses and interest income related to the financing of these financial assets and financial liabilities, and is used to calculate adjusted non-trading net interest margin. Specified items are excluded so that adjusted non-trading net interest income can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Net Interest Income Related to Trading Activities

This item represents net interest income related to trading activities which comprises dividends related to financial assets and liabilities associated with trading activities and certain interest income related to the financing of these financial assets and liabilities, net of interest expenses.

Non-Interest Income Related to Trading Activities

This item represents non-interest income related to trading activities which consists of realized and unrealized gains and losses as well as interest income on securities measured at fair value through profit or loss, income from held-for-trading derivative financial instruments, changes in the fair value of loans at fair value through profit or loss, changes in the fair value of financial instruments designated at fair value through profit or loss, realized and unrealized gains and losses as well as interest expense on obligations related to securities sold short, certain commission income as well as other trading activity revenues, and any applicable transaction costs.

Trading Activity Revenues

This item represents trading activity revenues which comprise dividends related to financial assets and financial liabilities associated with trading activities; certain interest income related to the financing of these financial assets and liabilities, net of interest expenses; realized and unrealized gains and losses as well as interest income on securities measured at fair value through profit or loss; income from held-for-trading derivative financial instruments; changes in the fair value of loans at fair value through profit or loss; changes in the fair value of financial instruments designated at fair value through profit or loss; realized and unrealized gains and losses as well as interest expense on obligations related to securities sold short; certain commission income as well as other trading activity revenues, and any applicable transaction costs.

Non-GAAP Ratios

The Bank uses non-GAAP ratios that do not have standardized meanings under GAAP and that may therefore not be comparable to similar measures used by other companies. A non-GAAP ratio is a ratio in which at least one component is a non-GAAP financial measure. The Bank uses non-GAAP ratios to present aspects of its financial performance or financial position.

The key non-GAAP ratios used by the Bank are described below.

Adjusted Return on Common Shareholders' Equity (ROE)

This item represents ROE excluding specified items. It is adjusted net income attributable to common shareholders expressed as a percentage of average equity attributable to common shareholders. It is a general measure of the Bank's efficiency in using equity. Specified items are excluded so that ROE can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Dividend Payout Ratio

This item represents the dividend payout ratio excluding specified items. It is dividends on common shares (per share amount) expressed as a percentage of adjusted basic earnings per share. This ratio is a measure of the proportion of earnings that is paid out to shareholders in the form of dividends. Specified items are excluded so that the dividend payout ratio can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Operating Leverage

This item represents operating leverage excluding specified items. It is the difference between the growth rate of adjusted total revenues and the growth rate of adjusted non-interest expenses, and it measures the sensitivity of the Bank's results to changes in its revenues. Specified items are excluded so that the operating leverage can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Efficiency Ratio

This item represents the efficiency ratio excluding specified items. The ratio represents adjusted non-interest expenses expressed as a percentage of adjusted total revenues. It measures the efficiency of the Bank's operations. Specified items are excluded so that the efficiency ratio can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Adjusted Net Interest Margin, Non-Trading

This item represents the non-trading net interest margin excluding specified items. It is calculated by dividing adjusted non-trading net interest income by average non-trading interest-bearing assets. This ratio is a measure of the profitability of non-trading activities. Specified items are excluded so that the net interest margin, non-trading can be better evaluated by excluding items that management believes do not reflect the underlying financial performance of the Bank's operations.

Supplementary Financial Measures

A supplementary financial measure is a financial measure that: (a) is not reported in the Bank's Consolidated Financial Statements, and (b) is, or is intended to be, reported periodically to represent historical or expected financial performance, financial position, or cash flows. The composition of these supplementary financial measures is presented in table footnotes or in the Glossary section on pages 51 to 54 of this MD&A.

Capital Management Measures

The financial reporting framework used to prepare the financial statements requires disclosure that helps readers assess the Bank's capital management objectives, policies, and processes, as set out in IFRS in IAS 1 – *Presentation of Financial Statements*. The Bank has its own methods for managing capital and liquidity, and IFRS do not prescribe any particular calculation method. These measures are calculated using various guidelines and advisories issued by the Office of the Superintendent of Financial Institutions (OSFI), which are based on the standards, recommendations, and best practices of the Basel Committee on Banking Supervision (BCBS), as presented in the following table.

OSFI guideline or advisory	Measure
Capital Adequacy Requirements	Common Equity Tier 1 (CET1) capital ratio Tier 1 capital ratio Total capital ratio CET1 capital Tier 1 capital Tier 2 capital Total capital Risk-weighted assets Maximum credit risk exposure under the Basel asset classes
Leverage Requirements	Leverage ratio Total exposure
Total Loss Absorbing Capacity (TLAC)	Key indicators – TLAC requirements Available TLAC TLAC ratio TLAC leverage ratio
Liquidity Adequacy Requirements	Liquid asset portfolio Encumbered assets and unencumbered assets Liquidity coverage ratio (LCR) High-quality liquid assets (HQLA) Cash inflows/outflows and net cash outflows Net stable funding ratio (NSFR) Available stable funding items Required stable funding items
Global Systemically Important Banks (G-SIBs) – Public Disclosure Requirements	G-SIB indicators

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) Certain amounts have been adjusted to reflect the discontinuation of taxable equivalent basis reporting for revenues and income taxes.

(3) During the quarter ended April 30, 2025, the Bank recorded acquisition and integration charges of \$118 million (\$86 million net of income taxes) related to the CWB transaction.

(4) During the quarter ended April 30, 2025, the Bank recorded an amount of \$24 million (\$18 million net of income taxes) to reflect the amortization of intangible assets related to the CWB acquisition.

(5) During the quarter ended April 30, 2025, the Bank recorded initial provisions for credit losses on non-impaired loans acquired from CWB of \$230 million (\$166 million net of income taxes).

- On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.
- Certain amounts have been adjusted to reflect the discontinuation of taxable equivalent basis reporting for revenues and income taxes.
- During the six-month period ended April 30, 2025, the Bank recorded an amount of \$28 million (\$20 million net of income taxes) to reflect the amortization of the issuance costs of the subscription receipts issued as part of the agreement to acquire CWB (for additional information, see Notes 8 and 10 to the Consolidated Financial Statements).
- During the six-month period ended April 30, 2025, the Bank recorded a gain of \$4 million (\$3 million net of income taxes) upon the remeasurement at fair value of the interest already held in CWB as at January 31, 2025.
- During the six-month period ended April 30, 2025, the Bank recorded a mark-to-market loss of \$23 million (\$17 million net of income taxes) on interest rate swaps used to manage the fair value changes of CWB's assets and liabilities that resulted in volatility of goodwill and capital on closing of the transaction.
- During the six-month period ended April 30, 2025, the Bank recorded acquisition and integration charges of \$144 million (\$105 million net of income taxes) related to the CWB transaction.
- During the six-month period ended April 30, 2025, the Bank recorded an amount of \$24 million (\$18 million net of income taxes) to reflect the amortization of intangible assets related to the CWB acquisition.
- During the six-month period ended April 30, 2025, the Bank recorded initial provisions for credit losses on non-impaired loans acquired from CWB of \$230 million (\$166 million net of income taxes).

Financial Results

For the second quarter of 2025, the Bank is reporting net income of \$896 million, down 1% from \$906 million in the second quarter of 2024 and diluted earnings per share stood at \$2.17 compared to \$2.54 in the second quarter of 2024. Excluding specified items recorded in the second quarter of 2025, notably the acquisition and integration costs related to the acquisition of CWB as well as the initial provisions for credit losses on non-impaired loans acquired, adjusted net income stood at \$1,166 million compared to \$906 million in the corresponding quarter of 2024. Adjusted diluted earnings per share stood at \$2.85, up 12% from \$2.54 in the second quarter of 2024.

For the six-month period ended April 30, 2025, the Bank's net income totalled \$1,893 million, up 4% from \$1,828 million for the corresponding period of 2024. Diluted earnings per share stood at \$4.91 for the six-month period ended April 30, 2025 versus \$5.13 for the corresponding period in 2024, the decrease being attributable to the common shares issued as part of the acquisition of CWB. Excluding specified items, adjusted net income for the six-month period ended April 30, 2025 totalled \$2,216 million, up 21% from \$1,828 million for the six-month period ended April 30, 2024, and adjusted diluted earnings per share stood at \$5.78, up 13% from \$5.13 for the six-month period ended April 30, 2024.

Return on common shareholders' equity was 14.0% for the six-month period ended April 30, 2025 compared to 17.0% in the same period of 2024.

Total Revenues

For the second quarter of 2025, the Bank's total revenues amounted to \$3,650 million, up \$900 million or 33% compared to the corresponding quarter of 2024, of which the inclusion of CWB drove a 11% increase. This increase was also due to total revenues in the Financial Markets segment in the second quarter of 2025, which rose 62% compared to the second quarter of 2024 due to a sharp increase in global markets revenues. In the Personal and Commercial segment, total revenues rose due to growth in personal and commercial loans and deposits (including the transition from bankers' acceptances to loans referencing the Canadian Overnight Repo Rate Average (CORRA)), which more than offset the impact of a lower net interest margin, as well as to the increase in internal commission revenues related to the distribution of Wealth Management products. These increases were partly offset by lower credit fees related to the transition of bankers' acceptances to CORRA loans. The growth in total revenues in the Wealth Management segment was mainly attributable to increases in fee-based revenues, notably revenues from investment management and trust service fees as well as mutual fund revenues. This growth was also due to an increase in net interest income and securities brokerage commissions, which was driven by an increase in client activity. In the USSF&I segment, total revenues were up 11% compared to the second quarter of 2024 as a result of revenue growth at the ABA Bank subsidiary, stemming from business growth. Total revenues for the *Other* heading were higher in the second quarter of 2025 than in the corresponding quarter of 2024, primarily due to a higher contribution from Treasury activities.

For the six-month period ended April 30, 2025, the Bank's total revenues amounted to \$6,833 million, compared to \$5,460 million in the corresponding period of 2024, for an increase of \$1,373 million or 25%, of which the inclusion of CWB drove a 5% increase. Total revenues for the Financial Markets segment were up \$680 million, or 51%, compared to the same period in 2024, essentially due to significant revenue growth in global markets. In the Personal and Commercial segment, total revenues rose \$335 million or 15%, mainly driven by the increase in net interest income arising from growth in loans and deposits (including the transition of bankers' acceptances to loans at the CORRA rate), partly offset by a decrease in the net interest margin, as well as growth in internal commission revenues related to the distribution of Wealth Management products. These increases were partly offset by a decrease in revenues from bankers' acceptances. The increase in total revenues in the Wealth Management segment was mainly due to revenues from fee-based revenues, notably revenues from investment management and trust service fees as well as mutual fund revenues as a result of growth in assets under administration and management. The growth was also attributable to the rise in net interest income and securities brokerage commissions, which was driven by an increase in client activity. In the USSF&I segment, total revenues rose 18% compared to the six-month period ended April 30, 2024, which was driven by revenue growth at the ABA Bank subsidiary stemming from business growth and revenue growth at Credigy. For the six-month period ended April 30, 2025, total income in the *Other* heading was higher than in the corresponding period of 2024, mainly due to an increase attributable to the inclusion of the CWB's revenues offset by a smaller contribution from Treasury activities and by the unfavourable impact of specified items related to the acquisition of CWB. Excluding specified items recorded in the first six months of 2025, adjusted total revenues amounted to \$6,880 million in the six-month period ended April 30, 2025, up 26% from \$5,460 million recorded in the corresponding six-month period of 2024.

Non-Interest Expenses

For the second quarter of 2025, non-interest expenses stood at \$1,942 million, up \$470 million or 32% from the corresponding quarter in 2024, of which \$223 million was attributable to the inclusion of CWB. Non-interest expenses for the second quarter of 2025 include the following specified items: charges of \$118 million related to the acquisition and integration of CWB and \$24 million for the amortization of intangible assets related to the acquisition of CWB. Compensation and employee benefits were higher than in the second quarter of 2024 owing to salary growth as well as higher variable compensation related to revenue growth. Occupancy expenses, including depreciation expense, were down compared to the second quarter in 2024, due to a reversal of the provision for property taxes related to the Bank's new head office building in an amount of \$22 million. The increase in technology expenses, including depreciation expense, is attributable to investments made to support the Bank's technological evolution and business development plan. Professional fees rose, notably due to expenses related to the acquisition and integration of CWB recorded during the second quarter of 2025. Communication expenses were also higher compared to the corresponding quarter of 2024. The increase in other expenses was mainly due to the amortization of intangible assets related to the acquisition of CWB. Excluding specified items, adjusted non-interest expenses stood at \$1,800 million in the second quarter of 2025, up 22% from \$1,472 million in the corresponding quarter of 2024.

For the six-month period ended April 30, 2025, non-interest expenses totalled \$3,588 million, up 23% compared to the corresponding period in 2024, partly due to the inclusion of CWB, which drove an 8% increase. The growth in non-interest expenses was essentially due to the same reasons provided above for the quarter, except for occupancy expenses, which were up compared to the first six months of 2024. This increase in occupancy expenses was due to higher expenses related to the Bank's new head office building and the expansion of the banking network at the ABA Bank subsidiary, partly offset by a reversal, in an amount of \$22 million, of the provision for property taxes related to the Bank's new head office. The specified items recorded in non-interest expense in the six-month period ended April 30, 2025 stood at \$168 million. Adjusted non-interest expenses were \$3,420 million for the first six months of 2025, a 17% increase from \$2,921 million for the corresponding period in 2024.

Provisions for Credit Losses

For the second quarter of 2025, the Bank recorded provisions for credit losses of \$545 million compared to \$138 million in the corresponding quarter in 2024. This significant increase was partly due to initial provisions for credit losses of \$230 million recorded on non-impaired loans acquired from CWB. The increase in provisions for credit losses on non-impaired loans was also due to the unfavourable impact related to updated macroeconomic scenarios and the recalibration of certain risk parameters, as well as uncertainties surrounding the imposition of new tariffs. These increases were partly offset by the effects of the migration of credit risk, which was more favourable in the second quarter of 2025, as well as by slower loan portfolio growth than in the corresponding quarter of 2024. Provisions for credit losses on impaired loans excluding Credigy's purchased or originated credit-impaired (POCI) loans⁽¹⁾ also rose compared to the second quarter of 2024. This increase was attributable to Personal Banking (including credit card receivables), Commercial Banking (including CWB), the Financial Markets segment as well as the Credigy and ABA Bank subsidiaries. In addition, the Credigy subsidiary recorded provisions for credit losses on POCI loans of \$11 million in the second quarter of 2025, due to remeasurements of certain portfolios.

For the six-month period ended April 30, 2025, the Bank's provisions for credit losses totalled \$799 million compared to \$258 million in the corresponding period of 2024. This increase stemmed in part from initial provisions for credit losses of \$230 million recorded on non-impaired loans acquired from CWB. In addition, the increase was due to higher provisions for credit losses on non-impaired loans, due to the unfavourable impact related to updated macroeconomic outlooks, the recalibration of certain risk parameters and uncertainties surrounding the imposition of new tariffs. These items were partly offset by the effects of the migration of credit risk, which was more unfavourable in the first six months of 2024, and slower loan portfolio growth than in the corresponding six-month period in 2024. Provisions for credit losses on impaired loans excluding Credigy's POCI loans⁽¹⁾ increased, due to Personal Banking (including credit card receivables), and to Commercial Banking, the Financial Markets segment and the Credigy and ABA Bank subsidiaries. In addition, the Credigy subsidiary recorded provisions for credit losses on POCI loans of \$11 million in the first six months of 2025 due to the remeasurement of certain portfolios.

Income Taxes

For the second quarter of 2025, income taxes stood at \$267 million compared to \$234 million in the corresponding quarter in 2024. The 2025 second-quarter effective income tax rate was 23% compared to 21% in the corresponding quarter in 2024. This was mainly due to the impact of applying the Pillar 2 rules (for additional information, see the Income Taxes section).

For the six-month period ended April 30, 2025, the effective income tax rate stood at 23% compared to 20% in the corresponding six-month period of 2024. The change in effective income tax rate was due to the same reason as that mentioned for the quarter and a lower level of tax-exempt income for the six-month period ended April 30, 2025.

(1) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

Results by Segment

The Bank carries out its activities in four business segments: Personal and Commercial, Wealth Management, Financial Markets, and U.S. Specialty Finance and International, which mainly comprises the activities of the Credigy Ltd. (Credigy) and Advanced Bank of Asia Limited (ABA Bank) subsidiaries. Other operating activities, certain specified items, Treasury activities, and the operations of the Flinks Technology Inc. (Flinks) subsidiary are grouped in the *Other* heading of segment disclosures. Each business segment is distinguished by services offered, type of clientele, and marketing strategy.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and the six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) See the Financial Reporting Method section on pages 6 to 12 for additional information on non-GAAP financial measures. During the quarter and six-month period ended April 30, 2025, the Bank recorded several items related to the acquisition of CWB, including acquisition and integration charges of \$1 million net of income taxes, amortization of intangible assets of \$17 million net of income taxes and initial provisions for credit losses of \$166 million net of income taxes recorded on non-impaired loans acquired from CWB.

(3) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

(4) Represents an average of the daily balances for the period.

(5) Including customers' liability under acceptances for the quarter and six-month period ended April 30, 2024.

(6) See the Financial Reporting Method section on pages 6 to 12 for additional information on non-GAAP ratios.

In the Personal and Commercial segment, net income totalled \$132 million in the second quarter of 2025, down 58% from \$311 million in the corresponding quarter in 2024, primarily due to the increase in provisions for credit losses, in particular initial provisions for credit losses in an amount of \$230 million on non-impaired loans acquired from CWB, and to a higher non-interest expense (including specified items recorded in the second quarter of 2025). In addition, income before provisions for credit losses and income taxes stood at \$612 million, up 18% from the second quarter of 2024 due to growth in the segment's revenues, as well as the inclusion of CWB's results, which drove a 17% increase. Adjusted net income was \$316 million, up 2% from the same quarter in 2024, while adjusted income before provisions for credit losses and income taxes was up 23%. The 32% increase in net interest income in the second quarter of 2025 was driven in part by the inclusion of CWB, which drove a 26% increase, as well as by growth in personal and commercial loans and deposits (including the transition of bankers' acceptances to loans at the CORRA rate), which more than offset the impact of a lower net interest margin. In addition, non-interest income increased by 3% compared to the corresponding quarter in 2024, notably due to the inclusion of CWB's income, partly offset by the transition of bankers' acceptances to loans at the CORRA rate.

Personal Banking's total revenues increased by \$52 million compared to the second quarter of 2024. This increase was driven by a higher net interest income, attributable to growth in loans and deposits, partly offset by a narrower margin on deposits, as well as to increases in internal commission revenues related to the distribution of Wealth Management products. The increase in Personal Banking's total revenues was also due to the inclusion of CWB in the second quarter of 2025. Commercial Banking's total revenues grew \$233 million compared to the corresponding quarter in 2024, mainly due to an increase in net interest income that was driven by loan growth (including the transition of bankers' acceptances to loans at the CORRA rate) and deposit growth, partly offset by a reduction in the net interest margin, and as a result of the inclusion of CWB's revenues. This increase was partly offset by a decline in revenues from bankers' acceptances related to the transition of bankers' acceptances to loans at the CORRA rate.

For the second quarter of 2025, the segment's non-interest expenses stood at \$804 million, up 31% compared to the corresponding quarter in 2024, of which the inclusion of CWB's non-interest expenses drove a 25% increase, which include specified items of \$24 million related to the acquisition. The increase in non-interest expense was also due to higher compensation and employee benefits, mainly from salary increases, and greater investments made as part of the segment's technological evolution. The efficiency ratio of 56.8% in the second quarter of 2025 had deteriorated by 2.7 percentage points compared to the second quarter of 2024. Adjusted non-interest expenses amounted to \$780 million in the second quarter of 2025, compared to \$612 million in the second quarter of 2024. The adjusted efficiency ratio stood at 55.1% in the second quarter of 2025, compared to 54.1% in the second quarter of 2024.

The segment recorded provisions for credit losses of \$426 million in the second quarter of 2025 compared to \$89 million in the second quarter of 2024, up \$337 million. This increase was mainly due to initial provisions for credit losses on non-impaired loans acquired from CWB in an amount of \$230 million. In addition, provisions for credit losses were higher on impaired loans and non-impaired loans in Personal Banking (including credit card receivables) and in Commercial Banking. Adjusted provisions for credit losses stood at \$196 million for the second quarter of 2025, up \$107 million from the corresponding quarter of 2024.

For the six-month period ended April 30, 2025, the Personal and Commercial segment's net income was \$422 million, down 35% from \$650 million in 2024, mainly due to the increase in provisions for credit losses (including initial provisions for credit losses on the non-impaired loans acquired from CWB recorded in the first six months of 2025). In addition, income before provisions for credit losses and income taxes for the six-month period ended April 30, 2025, was \$1,175 million, up 11% year over year, of which the inclusion of CWB's results drove an 8% increase. Adjusted net income was down 7% compared to \$650 million for the same six-month period in 2024, attributable to higher provisions for credit losses, while adjusted income before provisions for credit losses and income taxes increased by 13%. The increase in Personal Banking's total revenues was mainly due to growth in loans and deposits and an increase in the loan margin (partly offset by a narrower margin on deposits), as well as higher internal commission revenues arising from the distribution of the Wealth Management segment's products and the inclusion of CWB. In addition, the increase in Commercial Banking's total revenues was due to growth in loans and deposits, partly offset by a narrower loan margin, and the inclusion of CWB. These increases were partly offset by a decline in credit fees related to the transition from bankers' acceptances to loans at the CORRA rate.

For the six-month period ended April 30, 2025, non-interest expenses stood at \$1,445 million, an 18% increase compared to the same period of 2024, due to the same reasons provided above for the quarter. The inclusion of CWB drove a 12% increase in the non-interest expenses. The efficiency ratio was 55.2%, representing a deterioration of 1.5 percentage points compared to April 30, 2024. The segment's adjusted non-interest expenses increased by 16% compared to \$1,227 million for the six-month period ended April 30, 2024. The adjusted efficiency ratio was 54.2% for the first six months of 2025, compared to 53.7% for the same period in 2024. For the six-month period ended April 30, 2025, provisions for credit losses amounted to \$588 million, an increase of \$428 million compared to the same period of 2024. This increase was due to initial provisions on credit losses on non-impaired loans acquired from CWB in an amount of \$230 million and higher provisions for credit losses on impaired loans (including credit card receivables) in Personal Banking as well as in Commercial Banking. In addition, provisions for credit losses on non-impaired loans also increased due to changes in certain risk parameters and uncertainties surrounding the imposition of new tariffs. Excluding specified items recorded during the six-month period ended April 30, 2025, provisions for credit losses stood at \$358 million, compared to \$160 million for the same six-month period of 2024.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and the six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) See the Financial Reporting Method section on pages 6 to 12 for additional information on non-GAAP financial measures. During the quarter and six-month period ended April 30, 2025, the Bank recorded several items related to the acquisition of CWB, including acquisition and integration charges of \$2 million net of income taxes and amortization of intangible assets of \$1 million net of income taxes.

(3) Represents an average of the daily balances for the period.

(4) Including customers' liability under acceptances for the quarter and the six-month period ended April 30, 2024.

(5) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

(6) See the Financial Reporting Method section on pages 6 to 12 for additional information on non-GAAP financial ratios.

In the Wealth Management segment, net income totalled \$232 million in the second quarter of 2025, a 13% increase from \$205 million in the corresponding quarter in 2024. The segment's total revenues amounted to \$791 million, up \$108 million or 16% from \$683 million in the second quarter of 2024. The 13% increase in net interest income compared to the corresponding quarter in 2024 was due to higher loan and deposit volumes, the favourable impact of a change in the composition of deposits and the inclusion of CWB in the second quarter of 2025. The 19% increase in fee-based revenues was due to the rise in stock markets compared to the corresponding quarter in 2024, positive net inflows for the various solutions and the inclusion of CWB. Transaction and other revenues rose 9% compared to the second quarter of 2024 due to increased client activity.

Non-interest expenses stood at \$476 million in the second quarter of 2025, up 19% from \$400 million in the second quarter of 2024, partly due to the inclusion of CWB. This increase was also due to higher compensation and employee benefits, due in particular to variable compensation in line with revenue growth, external management fees, as well as higher technology expenses related to the segment's initiatives. The deterioration of the efficiency ratio, which stood at 60.2% in the second quarter of 2025, was due to the inclusion of CWB during the second quarter of 2025. Adjusted non-interest expenses stood at \$472 million in the second quarter of 2025 compared to \$400 million in the same quarter of 2024. The adjusted efficiency ratio was 59.7% in the second quarter of 2025 compared to 58.6% in the corresponding quarter in 2024. Recoveries of credit losses in an amount of \$1 million were recorded in the second quarter of 2025, while negligible provisions for credit losses were recorded in the second quarter of 2024.

In the Wealth Management segment, net income totalled \$474 million in the six-month period ended April 30, 2025 compared to \$401 million in the same period of 2024, for an increase of 18%. The segment's total revenue stood at \$1,567 million for the six-month period ended April 30, 2025, an increase of 17% compared to \$1,343 million for the same period of 2024. Net interest income increased by 14%, due to growth in loan and deposit volumes, the favourable impact of the change in the composition of deposits and the inclusion of CWB. Fee-based revenues increased by 19%, due to growth in assets under administration and under management as a result of stronger equity markets, positive net inflows into various solutions and the inclusion of CWB. In addition, transaction and other income increased by 12% compared to the same period in 2024 due to increased client activity. Non-interest expenses stood at \$917 million for the six-month period ended April 30, 2025, compared to \$790 million for the same period in 2024, an increase of 16% due to the same reasons provided above for the quarter. The efficiency ratio for the six-month period ended April 30, 2025 was 58.5%, an improvement from 58.8% for the corresponding six-month period in 2024. Provisions for credit losses stood at \$1 million for the six-month period ended April 30, 2025, whereas they were negligible in the six-month period ended April 30, 2024.

(4) Including customers' liability under acceptances for the quarter and the six-month period ended April 30, 2024.

(5) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

In the Financial Markets segment, net income totalled \$501 million in the second quarter of 2025, up 56% from \$322 million in the corresponding quarter in 2024. The impact of including CWB in this segment's results for the quarter was not material. Total revenues amounted to \$1,101 million, compared to \$681 million in the second quarter of 2024, a significant increase of \$420 million or 62%. The growth in global markets revenues came from all types of revenues but was mainly due to equities revenues. Corporate and investment banking revenues for the second quarter of 2025 increased 2% compared to the corresponding quarter in 2024 due to growth in banking service revenues, partly offset by a decrease in revenues related to capital markets activities and revenues from merger and acquisition activities.

Non-interest expenses stood at \$403 million in the second quarter of 2025, a 29% increase compared to the second quarter of 2024, attributable to higher compensation and employee benefits, notably caused by variable compensation resulting from revenue growth, as well as the increase in technology investment expenses and other expenses related to the segment's business growth. The efficiency ratio was 36.6% in the second quarter of 2025, an improvement of 9.2 percentage points from 45.8% in the second quarter of 2024, owing to a sharp increase in the segment's revenues. In the quarter ended April 30, 2025, provisions for credit losses were up \$53 million compared to the second quarter of 2024. This increase was essentially due to provisions for credit losses on impaired loans of \$55 million recorded in the second quarter of 2025, attributable to a file in the manufacturing sector.

For the six-month period ended April 30, 2025, the segment's net income totalled \$918 million, up 46% compared to the same period of 2024. The impact of including CWB in this segment's results for the first six-month period of 2025 was not material. Total revenues amounted to \$2,008 million for the six-month period ended April 30, 2025, for strong growth of \$680 million or 51% compared to the same period of 2024. Global markets revenues were up 94%, driven by increases in equities revenues and interest rate and credit products revenues, partly offset by the decrease in commodities and foreign exchange revenues. In addition, corporate and investment banking revenues were up 2% compared to the six-month period ended April 30, 2024, due to the same reasons provided above for the quarter.

For the six-month period ended April 30, 2025, non-interest expenses rose 23% compared to the same period of 2024, mainly due to higher variable compensation, technology investment expenses and other expenses related to the segment's business growth. The efficiency ratio for the six-month period ended April 30, 2025 was 38.3%, an improvement of 8.8 percentage points from 47.1% recorded for the corresponding period of 2024. This improvement was driven by a significant increase in revenues. Financial Markets recorded provisions for credit losses of \$100 million in the first six months of 2025, compared to \$28 million for the same period of 2024. This increase was mainly due to \$73 million in provisions for credit losses on impaired loans recorded for the first six months of 2025, compared to the \$2 million of recoveries of credit losses on impaired loans recorded for the corresponding period of 2024.

(1) Represents an average of the daily balances for the period.

(2) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

In the USSF&I segment, net income totalled \$169 million in the second quarter of 2025, up 4% from \$163 million in the corresponding quarter of 2024, attributable to the ABA Bank subsidiary. The 11% growth in the segment's total revenues was partly offset by the increase in non-interest expenses and provisions for credit losses. For the six-month period ended April 30, 2025, the segment recorded net income of \$352 million, an increase of 12% compared to \$313 million recorded in the same period of 2024.

Credigy

For the second quarter of 2025, the Credigy subsidiary reported net income of \$57 million, down \$4 million or 7% compared to the corresponding quarter in 2024. Total revenues amounted to \$141 million in the second quarter of 2025 compared to \$136 million in the second quarter of 2024, an increase that was driven by growth in loan volumes, the remeasurement of the fair value of certain portfolios in the second quarter of 2025, and the impact of exchange rate fluctuations, items that were partly offset by a gain realized on the disposal of a loan portfolio and revenues related to the under-utilization of credit facilities recorded in the second quarter of 2024. Non-interest expenses stood at \$39 million in the second quarter of 2025, a \$5 million increase from the corresponding quarter in 2024 due to servicing fees and the impact of exchange rate fluctuations. Provisions for credit losses rose \$4 million compared to the second quarter of 2024 due to higher provisions for credit losses on impaired loans (excluding Credigy's POCI loans), attributable to the normal maturation of loan portfolios, and provisions for credit losses on POCI loans, partly offset by the decrease in provisions for credit losses on non-impaired loans.

For the six-month period ended April 30, 2025, the Credigy subsidiary reported net income of \$116 million, up 4% from the corresponding period of 2024. Total revenues amounted to \$286 million for the first six months of 2025, up from \$261 million in the same period of 2024. This increase was due to the same reasons provided above for the quarter. Non-interest expenses for the six-month period ended April 30, 2025 were up \$10 million from the corresponding period of 2024, owing to compensation and employee benefits, servicing fees, and the impact of exchange rate fluctuations. The subsidiary reported a \$9 million increase in provisions for credit losses compared to the corresponding six-month period in 2024, due to the increase in provisions for credit losses on impaired loans and POCI loans, partly offset by the decrease in credit losses on non-impaired loans.

ABA Bank

For the second quarter of 2025, the ABA Bank subsidiary recorded net income totalling \$113 million, up \$14 million or 14% from the corresponding quarter in 2024. Total revenues rose 20%, mainly attributable to sustained growth in assets, as well as the impact of exchange rate fluctuations. Non-interest expenses for the second quarter of 2025 stood at \$77 million, a \$4 million or 5% increase compared to the second quarter of 2024 due to higher occupancy expenses driven by the subsidiary's business growth and the opening of new branches, as well as the impact of exchange rate fluctuations. The subsidiary reported provisions for credit losses totalling \$29 million in the second quarter of 2025, up \$18 million compared to the corresponding quarter of 2024. This increase was due to higher provisions for credit losses on impaired loans and non-impaired loans related to the uncertainties around the imposition of new tariffs.

For the six-month period ended April 30, 2025, the ABA Bank subsidiary recorded net income totalling \$227 million, up \$35 million or 18% from the corresponding period of 2024. The 24% increase in total revenues compared to the corresponding six-month period of 2024 stemmed from business expansion at the subsidiary, driven mainly by sustained asset growth and the impact of exchange rate fluctuations. ABA Bank reported non-interest expenses totalling \$160 million, up 16% year over year, due to the same reasons provided above for the quarter as well as higher compensation and employee benefits. The subsidiary reported provisions for credit losses totalling \$50 million in the six-month period ended April 30, 2025, up \$28 million from the same period of 2024, owing to higher provisions for credit losses on impaired and non-impaired loans.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and the six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) Certain amounts have been adjusted to reflect the discontinuation of taxable equivalent basis reporting for revenues and income taxes.

(3) See the Financial Reporting Method section on pages 6 to 12 for additional information on non-GAAP financial measures. During the quarter and six-month period ended April 30, 2025, the Bank recorded several items related to the acquisition of CWB, including acquisition and integration charges of \$83 million net of income taxes (\$102 million net of income taxes for the six-month period ended April 30, 2025). In addition, during the six-month period ended April 30, 2025, the Bank recorded the amortization of the subscription receipt issuance costs of \$20 million net of income taxes, a gain of \$3 million net of income taxes resulting from the remeasurement at fair value of the CWB common shares already held by the Bank, and the impact of managing fair value changes, representing a loss of \$17 million net of income taxes.

(4) Represents an average of the daily balances for the period.

For the *Other* heading of segment results, a net loss of \$138 million was posted in the second quarter of 2025 compared to a net loss of \$95 million in the corresponding quarter in 2024. The change in net loss was due to the increase in non-interest expenses, stemming mainly from CWB acquisition and integration charges, for an amount of \$114 million recorded in the second quarter of 2025, partly offset by a higher contribution from Treasury activities and the inclusion of CWB income. The specified items recorded in the second quarter of 2025, related to the acquisition of CWB, had an unfavourable impact of \$83 million on net loss. The adjusted net loss stood at \$55 million for the quarter ended April 30, 2025, compared to \$95 million for the corresponding quarter in 2024.

For the six-month period ended April 30, 2025, the segment's loss stood at \$273 million compared to a net loss of \$166 million in the corresponding period of 2024. The change in net loss was due to the increase in non-interest expenses compared to the first six months of 2024, mainly attributable to higher compensation and employee benefits as well as CWB acquisition and integration charges recorded in the first six months of 2025 for an amount of \$140 million. In addition, the lower contribution from Treasury activities, in particular due to a \$17 million loss, net of taxes, due to the management of fair value changes related to the acquisition of CWB, as well as the amortization of subscription receipt issuance costs in an amount of \$20 million, net of taxes, contributed to the change in net loss. The specified items recorded during the six-month period ended April 30, 2025, related to the CWB acquisition, had a \$136 million unfavourable impact on the net loss. The adjusted net loss stood at \$137 million for the six-month period ended April 30, 2025 compared to \$166 million for the corresponding period of 2024.

Consolidated Balance Sheet

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the balances as at April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section and Note 19 to the Consolidated Financial Statements.

Assets

As at April 30, 2025, the Bank had total assets of \$536.2 billion, up \$74.0 billion or 16% from \$462.2 billion as at October 31, 2024. Cash and deposits with financial institutions as at April 30, 2025, stood at \$31.4 billion, down \$0.1 billion, owing primarily to a decrease in deposits with the Bank of Canada, partly offset by an increase in deposits with regulated financial institutions.

Securities have risen \$23.4 billion since October 31, 2024, owing to a \$17.2 billion or 15% increase in securities at fair value through profit or loss driven mainly by equity securities. In addition, securities other than those measured at fair value through profit or loss rose \$6.4 billion. Securities purchased under reverse repurchase agreements and securities borrowed increased by \$4.5 billion since October 31, 2024, driven primarily by the Financial Markets segment and Treasury activities.

As at April 30, 2025, loans, net of allowances for credit losses, totalled \$285.7 billion, up \$42.7 billion or 18% since October 31, 2024. The following table provides a breakdown of the main loan portfolios.

(millions of Canadian dollars)	As at April 30, 2025 ⁽¹⁾	As at October 31, 2024	As at April 30, 2024
Loans

	285,728	243,032	234,770

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the balances as at April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section and Note 19 to the Consolidated Financial Statements.

(2) Including customers' liability under acceptances as at April 30, 2024.

Since October 31, 2024, residential mortgages (including home equity lines of credit) rose \$14.1 billion or 11%, above all due to the inclusion of CWB and growth in the business activities of the Personal and Commercial segment and the Financial Markets segment. Also since October 31, 2024, personal loans were up \$0.1 billion, and credit card receivables were relatively stable. Business and government loans rose \$29.1 billion or 29% since October 31, 2024, mainly due to the inclusion of CWB and business growth in Commercial Banking. These increases were partly offset by a decline in the activities of the Financial Markets segment and the Credigy subsidiary.

Since April 30, 2024, loans, net of allowances for credit losses, grew \$50.9 billion or 22%. Residential mortgages (including home equity lines of credit) rose \$19.0 billion or 15% due to the inclusion of CWB, sustained demand for mortgage credit in the Personal and Commercial segment and business growth in the Financial Markets segment. Also since April 30, 2024, personal loans rose \$0.2 billion due to the inclusion of CWB and business growth in Personal Banking. Credit card receivables were up \$0.2 billion. Business and government loans grew \$32.3 billion or 33% since April 30, 2024, owing essentially to business growth in Commercial Banking, in the Financial Markets and Wealth Management segments, and at the ABA Bank subsidiary.

Impaired loans include all loans classified in Stage 3 of the expected credit loss model and POCI loans. As at April 30, 2025, gross impaired loans stood at \$3,114 million compared to \$2,043 million as at October 31, 2024. As for net impaired loans, they totalled \$2,437 million as at April 30, 2025, compared to \$1,629 million as at October 31, 2024. This increase was mainly due to an increase in net impaired loans in the loan portfolios of the Personal and Commercial Banking segment following the inclusion of loans acquired from CWB in the second quarter of 2025, and at the ABA Bank subsidiary, partly offset by the decrease in net impaired loans at the Credigy subsidiary (including POCI loans) due to the maturities of certain portfolios and to loan repayments.

As at April 30, 2025, other assets totalled \$29.6 billion, a \$3.4 billion increase since October 31, 2024 that resulted mainly from increases in derivative financial instruments as well as in goodwill resulting from the CWB acquisition.

Liabilities

As at April 30, 2025, the Bank had total liabilities of \$503.3 billion compared to \$436.7 billion as at October 31, 2024.

The Bank's total deposits stood at \$388.0 billion as at April 30, 2025, rising \$54.5 billion or 16% from \$333.5 billion as at October 31, 2024. As at April 30, 2025, personal deposits stood at \$122.0 billion, up \$26.8 billion since October 31, 2024. This increase was driven by the inclusion of CWB and business growth in Personal Banking, in the Financial Markets and Wealth Management segments, and at the ABA Bank subsidiary.

Business and government deposits stood at \$258.1 billion as at April 30, 2025, rising \$25.4 billion since October 31, 2024. The increase is explained by the inclusion of CWB, the activities of the Financial Markets and Wealth Management segments and Treasury funding activities, despite a \$0.1 billion decrease in deposits subject to bank capitalization (bail-in) conversion regulations. As at April 30, 2025, deposits from deposit-taking institutions stood at \$7.9 billion, an increase of \$2.3 billion since October 31, 2024 arising from Treasury funding activities.

As at April 30, 2025, other liabilities stood at \$112.5 billion, up \$10.6 billion since October 31, 2024, essentially due a \$2.3 billion increase in derivative financial instruments, a \$3.0 billion increase in obligations related to securities sold short, a \$2.8 billion increase in obligations related to securities sold under repurchase agreements and securities loaned and a \$1.0 billion increase in liabilities related to transferred receivables.

Subordinated debt increased since October 31, 2024, as a result of the issuance of \$1.0 billion of medium-term notes on January 13, 2025 and \$0.5 billion in subordinated debt related to the acquisition of CWB.

Equity

As at April 30, 2025, equity attributable to the Bank's shareholders and holders of other equity instruments was \$32.9 billion, rising \$7.3 billion since October 31, 2024. This increase was primarily due to the issuances of common shares related to the CWB acquisition for a total amount of \$6.3 billion, as well as to net income net of dividends, remeasurements of pension plans and other post-employment benefit plans, and the net fair value change attributable to the credit risk on financial liabilities designated at fair value through profit or loss. Moreover, the issuance of Series 47 and 49 preferred shares were more than offset by the redemption for cancellation of Series 32 preferred shares.

Related Party Transactions

The Bank's policies and procedures regarding related party transactions have not significantly changed since October 31, 2024. For additional information, see Note 30 to the audited annual consolidated financial statements for the year ended October 31, 2024.

Securitization and Off-Balance-Sheet Arrangements

In the normal course of business, the Bank is party to various financial arrangements that, under IFRS, are not required to be recorded on the Consolidated Balance Sheet or are recorded under amounts other than their notional or contractual values. These arrangements include, among others, transactions with structured entities, derivative financial instruments, the issuance of guarantees, credit instruments, and financial assets received as collateral. A complete analysis of these types of arrangements, including their nature, business purpose, and importance, is provided on pages 53 and 54 of the *2024 Annual Report*.

For additional information on financial assets transferred but not derecognized, guarantees, commitments, and structured entities, see Notes 9, 28, and 29 to the audited annual consolidated financial statements for the year ended October 31, 2024.

Income Taxes

Notice of Assessment

In April 2025, the Bank was reassessed by the Canada Revenue Agency (CRA) for additional income tax and interest of approximately \$125 million (including estimated provincial tax and interest) in respect of certain Canadian dividends received by the Bank during the 2020 taxation year.

In prior fiscal years, the Bank had been reassessed for additional income tax and interest of approximately \$1,075 million (including provincial tax and interest) in respect of certain Canadian dividends received by the Bank during the 2012-2019 taxation years.

In the reassessments, the CRA alleges that the dividends were received as part of a "dividend rental arrangement."

In October 2023, the Bank filed a notice of appeal with the Tax Court of Canada, and the matter is now in litigation. The CRA may issue reassessments to the Bank for taxation years subsequent to 2020 in regard to certain activities similar to those that were the subject of the above-mentioned reassessments. The Bank remains confident that its tax position was appropriate and intends to vigorously defend its position. As a result, no amount has been recognized in the Consolidated Financial Statements as at April 30, 2025.

Pillar 2 Rules

On June 20, 2024, Bill C-69 – *An Act to implement certain provisions of the budget tabled in Parliament on April 16, 2024* received royal assent. The bill included the Pillar 2 rules (global minimum tax) published by the Organisation for Economic Co-operation and Development (OECD) that are applicable to fiscal years beginning on or after December 31, 2023 (November 1, 2024, for the Bank). To date, the Pillar 2 rules have been included in a bill or enacted in certain jurisdictions where the Bank operates. For the quarter and the six-month period ended April 30, 2025, the Bank estimates that the application of the Pillar 2 rules represents an increase in the effective tax rate of 1.9%. For the quarter ended April 30, 2025, the Bank continues to apply the exception to the recognition and disclosure of information about deferred tax assets and liabilities arising from the Pillar 2 rules in the jurisdictions where they have been included in a bill or enacted.

Capital Management

Capital management has a dual role of ensuring a competitive return to the Bank's shareholders while maintaining a solid capital foundation that covers the risks inherent to the Bank's business activities, supports its business segments, and protects its clients. The Bank's capital management policy defines the guiding principles as well as the roles and responsibilities of its internal capital adequacy assessment process. This process aims to determine the capital that the Bank needs to maintain to pursue its business activities and accommodate unexpected losses arising from extremely adverse economic and operational conditions. For additional information on the capital management framework, see the Capital Management section on pages 55 to 64 of the Bank's *2024 Annual Report*.

Basel Accord

The Bank and all other major Canadian banks have to maintain the following minimum capital ratios established by OSFI: a CET1 capital ratio of at least 11.5%, a Tier 1 capital ratio of at least 13.0%, and a Total capital ratio of at least 15.0%. For additional information on the ratio calculations, see pages 56 to 58 of the *2024 Annual Report*. All of these ratios include a capital conservation buffer of 2.5% established by the BCBS and OSFI, a 1.0% surcharge applicable solely to Domestic Systemically Important Banks (D-SIBs), and a 3.5% domestic stability buffer (DSB) established by OSFI. The DSB, which can vary from 0% to 4.0% of risk-weighted assets (RWA), consists exclusively of CET1 capital. A D-SIB that fails to meet this buffer requirement will not be subject to automatic constraints to reduce capital distributions but will have to provide a remediation plan to OSFI. The Bank must also meet the requirements of the capital output floor that will ensure that its total calculated RWA is not below 72.5% of the total RWA as calculated under the Basel III Standardized Approaches. OSFI had planned a phase-in of the floor factor, starting at 65.0% in the second quarter of 2023, and rising to reach 72.5% in fiscal 2027. On February 12, 2025, OSFI deferred any additional increases until further notice. As a result, the floor factor, currently set at 67.5%, will remain at this level for an undetermined period. If the capital requirement is less than the capital output floor requirement after applying the floor factor, the difference is added to the total RWA. Lastly, OSFI requires D-SIBs to maintain a Basel III leverage ratio of at least 3.5%, which includes a Tier 1 capital buffer of 0.5% applicable only to D-SIBs. For additional information on the leverage ratio calculation, see page 58 of the *2024 Annual Report*.

In addition, OSFI requires that regulatory capital instruments other than common equity must have a non-viability contingent capital (NVCC) clause to ensure that investors bear losses before taxpayers should the government determine that rescuing a non-viable financial institution is in the public interest. The Bank's regulatory capital instruments, other than common shares, all have an NVCC clause.

OSFI's *Total Loss Absorbing Capacity* (TLAC) *Guideline*, which applies to all D-SIBs under the federal government's bail-in regulations, is intended to ensure that a D-SIB has sufficient loss-absorbing capacity to support its internal recapitalization in the unlikely event it becomes non-viable. Available TLAC includes total capital as well as certain senior unsecured debts that satisfy all of the eligibility criteria of OSFI's TLAC guideline. OSFI requires D-SIBs to maintain a risk-based TLAC ratio of at least 25.0% (including the DSB) of RWA and a TLAC leverage ratio of at least 7.25%. The TLAC ratio is calculated by dividing available TLAC by RWA, and the TLAC leverage ratio is calculated by dividing available TLAC by total exposure. As at April 30, 2025, outstanding liabilities of \$23.4 billion (\$23.5 billion as at October 31, 2024) were subject to conversion under the bail-in regulations.

Requirements – Regulatory Capital⁽¹⁾, Leverage⁽¹⁾, and TLAC⁽²⁾ Ratios

	Requirements as at April 30, 2025							Ratios as at April 30, 2025
	Minimum	Capital conservation buffer	Minimum set by BCBS	D-SIB surcharge	Minimum set by OSFI	Domestic stability buffer ⁽³⁾	Minimum set by OSFI, including the domestic stability buffer	
Capital ratios								
CET1	4.5 %	2.5 %	7.0 %	1.0 %	8.0 %	3.5 %	11.5 %	13.4 %
Tier 1	6.0 %	2.5 %	8.5 %	1.0 %	9.5 %	3.5 %	13.0 %	15.1 %
Total	8.0 %	2.5 %	10.5 %	1.0 %	11.5 %	3.5 %	15.0 %	16.9 %
Leverage ratio	3.0 %	n.a.	3.0 %	0.5 %	3.5 %	n.a.	3.5 %	4.7 %
TLAC ratio	21.5 %	n.a.	21.5 %	n.a.	21.5 %	3.5 %	25.0 %	28.2 %
TLAC leverage ratio	6.75 %	n.a.	6.75 %	0.5 %	7.25 %	n.a.	7.25 %	8.8 %

n.a. Not applicable

(1) The capital ratios and the leverage ratio are calculated in accordance with the Basel III rules, as set out in OSFI's *Capital Adequacy Requirements Guideline* and *Leverage Requirements Guideline*.

(2) The TLAC ratio and the TLAC leverage ratio are calculated in accordance with OSFI's *Total Loss Absorbing Capacity Guideline*.

(3) On December 17, 2024, OSFI confirmed that the domestic stability buffer was being maintained at 3.5%.

The Bank ensures that its capital levels are always above the minimum capital requirements set by OSFI, including the DSB. By maintaining a strong capital structure, the Bank can cover the risks inherent to its business activities, support its business segments, and protect its clients.

Other disclosure requirements pursuant to Pillar 3 of the Basel Accord and a set of recommendations defined by the Enhanced Disclosure Task Force (EDTF) are presented in the *Supplementary Regulatory Capital and Pillar 3 Disclosure* report published quarterly and available on the Bank's website at nbc.ca. Furthermore, a complete list of capital instruments and their main features is also available on the Bank's website.

Regulatory Developments

The Bank closely monitors regulatory developments and participates actively in various consultative processes. For additional information about the regulatory context as at October 31, 2024, refer to page 59 of the Capital Management section in the *2024 Annual Report*. Since November 1, 2024, there have been no new regulatory developments to be considered.

Management Activities

On January 13, 2025, the Bank issued medium-term notes for a total amount of \$1.0 billion bearing interest at 4.260% and maturing on February 15, 2035. Given that the medium-term notes satisfy the NVCC requirements, they qualify for the purposes of calculating regulatory capital under the Basel III rules.

On February 3, 2025, at closing of the CWB acquisition, the Bank issued a total of 50,272,878 common shares, for total proceeds of \$6.3 billion.

On February 3, 2025, as part of the acquisition of CWB, the Bank acquired the obligations related to the CWB subordinated debts for a total amount of \$525 million, which included a debenture of \$125 million bearing interest at 4.840% and maturing on June 29, 2030 (on May 7, 2025, the Bank provided notice to the holders of its intention to redeem on June 29, 2025, these debentures, at a redemption price equal to the outstanding principal amount and all accrued and unpaid interest), a debenture of \$150 million bearing interest at 5.937% and maturing on December 22, 2032 and a debenture of \$250 million bearing interest at 5.949% and maturing on January 29, 2034. Given that the debentures satisfy the NVCC requirements, they qualify for the purposes of calculating regulatory capital under the Basel III rules.

On February 17, 2025, i.e. the first business day after the February 15, 2025 redemption date, the Bank redeemed all the issued and outstanding Non-Cumulative 5-Year Rate-Reset Series 32 First Preferred Shares. Pursuant to the share conditions, the redemption price was \$25.00 per share plus the periodic dividends declared and unpaid. The Bank redeemed 12,000,000 Series 32 First Preferred Shares for a total amount of \$300 million.

On February 20, 2025, there was an exchange of all the issued and outstanding First Preferred Shares, Series 5 and Series 9 of CWB for substantially equivalent First Preferred Shares, Series 47 and Series 49 of National Bank, which are non-cumulative 5-year rate-reset bearing interest at 6.371% and 7.651%. The Bank exchanged 10,000,000 preferred shares for a total amount of \$264 million. Given that the Series 47 and Series 49 preferred shares meet the NVCC requirements, they qualify for the purposes of calculating regulatory capital under the Basel III rules.

Dividends

On May 27, 2025, the Board of Directors declared regular dividends on the various series of first preferred shares and a dividend of \$1.18 per common share, up 4 cents or 3.4%, payable on August 1, 2025 to shareholders of record on June 30, 2025.

Shares, Other Equity Instruments, and Stock Options

	As at April 30, 2025	
	Number of shares or LRCN ⁽¹⁾	\$ million
First preferred shares		
Series 30	14,000,000	350
Series 38	16,000,000	400
Series 40	12,000,000	300
Series 42	12,000,000	300
Series 47	5,000,000	128
Series 49	5,000,000	136
	64,000,000	1,614
Other equity instruments		
LRCN – Series 1	500,000	500
LRCN – Series 2	500,000	500
LRCN – Series 3	500,000	500
	1,500,000	1,500
	65,500,000	3,114
Common shares	391,321,704	9,805
Stock options	11,671,264	

(1) Limited Recourse Capital Notes (LRCN).

As at May 23, 2025 there were 391,340,763 common shares and 11,619,774 stock options outstanding. The number of common shares and options outstanding reflects the closing of the CWB transaction. NVCC provisions require the conversion of capital instruments into a variable number of common shares should OSFI deem a bank to be non-viable or should the government publicly announce that a bank has accepted or agreed to accept a capital injection. If an NVCC trigger event were to occur, all of the Bank's preferred shares, LRCNs, and medium-term notes and subordinated debentures which are NVCC capital instruments, would be converted into common shares of the Bank according to an automatic conversion formula at a conversion price corresponding to the greater of the following amounts: (i) a \$5.00 contractual floor price; or (ii) the market price of the Bank's common shares on the date of the trigger event (10-day weighted average price). Based on a \$5.00 floor price and including an estimate for accrued dividends and interest, these NVCC capital instruments would be converted into a maximum of 1,472 million Bank common shares, which would have a 79.0% dilutive effect based on the number of Bank common shares outstanding as at April 30, 2025.

Movement in Regulatory Capital⁽¹⁾

(millions of Canadian dollars)	Six months ended April 30, 2025

Risk-Weighted Assets by Key Risk Drivers

Risk-weighted assets (RWA) amounted to \$182.8 billion as at April 30, 2025 compared to \$141.0 billion as at October 31, 2024, a \$41.8 billion increase resulting mainly from the inclusion of CWB, organic growth in RWA and a deterioration in the credit quality of the loan portfolio. The changes in the Bank's RWA by risk type are presented in the following table.

Movement of Risk-Weighted Assets by Key Drivers⁽¹⁾

(millions of Canadian dollars)

			Quarter ended		
			April 30, 2025	January 31, 2025	October 31, 2024
	Non-counterparty credit risk	Counterparty credit risk	Total	Total	Total

Risk-weighted assets at end			182,772	148,464	140,975

(1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.

(2) Also includes foreign exchange rate movements that are not considered material.

(3) During the second quarter of 2025, the operational risk change is related to the inclusion of CWB which was calculated using the Standardized approach in accordance with the approach used by the Bank.

The table above provides risk-weighted asset movements by the key drivers underlying the different risk categories.

The *Book size* item reflects organic changes in book size and composition (including new loans and maturing loans). RWA movements attributable to book size include increases or decreases in exposures, measured by exposure at default, assuming a stable risk profile.

The *Book quality* item is the Bank's best estimate of changes in book quality related to experience, such as underlying customer behaviour or demographics, including changes resulting from model recalibrations or realignments and also including risk mitigation factors.

The *Model updates* item is used to reflect implementations of new models, changes in model scope, or any other change applied to address model malfunctions.

The *Methodology and policy* item presents the impact of changes in calculation methods resulting from changes in regulatory policies or from new regulations.

Regulatory Capital Ratios, Leverage Ratio, and TLAC Ratios

As at April 30, 2025, the Bank's CET1, Tier 1, and Total capital ratios were, respectively, 13.4%, 15.1%, and 16.9% compared to ratios of, respectively, 13.7%, 15.9%, and 17.0% as at October 31, 2024. All of the capital ratios decreased since October 31, 2024. The growth in RWA, mainly due to the inclusion of CWB, had an unfavourable impact on the ratios, partly offset by the common shares issued as part of the acquisition of CWB and by net income, net of dividends. In addition, the redemption of preferred shares on February 17, 2025, partly offset by the exchange of CWB's preferred shares for the Bank's preferred shares on February 20, 2025 negatively affected the Tier 1 and Total capital ratios, while the \$1.0 billion issuance of medium-term notes on January 13, 2025 and the obligation related to CWB's subordinated debts for an amount of \$525 million positively impacted the Total capital ratio.

As at April 30, 2025, the leverage ratio was 4.7% compared to 4.4% as at October 31, 2024. The increase in the leverage ratio was essentially due to growth in Tier 1 capital related to the common shares issued as part of the acquisition of CWB, partly offset by an increase in total exposure.

As at April 30, 2025, the Bank's TLAC ratio and TLAC leverage ratio were 28.2% and 8.8%, respectively, compared to 31.2% and 8.6%, respectively, as at October 31, 2024. The TLAC leverage ratio increase is explained by the net issuances of instruments that met all of the TLAC eligibility criteria during the period. However, the growth in RWA, mainly attributable to the inclusion of CWB, more than offset these issuances, resulting in a decrease in the TLAC ratio.

During the quarter and six-month period ended April 30, 2025, the Bank was compliant with all of OSFI's regulatory capital, leverage, and TLAC requirements.

Regulatory Capital⁽¹⁾, Leverage Ratio⁽¹⁾ and TLAC⁽²⁾

(millions of Canadian dollars)	As at April 30, 2025	As at October 31, 2024
Capital		
CET1	24,514	19,321
Tier 1	27,603	22,470
Total capital	30,930	24,001
Risk-weighted assets	182,772	140,975
Total exposure	585,319	511,160
Capital ratios		
CET1	13.4 %	13.7 %
Tier 1	15.1 %	15.9 %
Total	16.9 %	17.0 %
Leverage ratio	4.7 %	4.4 %
Available TLAC	51,508	44,040
TLAC ratio	28.2 %	31.2 %
TLAC leverage ratio	8.8 %	8.6 %

(1) Capital, risk-weighted assets, total exposure, the capital ratios, and the leverage ratio are calculated in accordance with the Basel III rules, as set out in OSFI's *Capital Adequacy Requirements Guideline* and *Leverage Requirements Guideline*.

(2) Available TLAC, the TLAC ratio, and the TLAC leverage ratio are calculated in accordance with OSFI's *Total Loss Absorbing Capacity Guideline*.

Risk Management

Risk-taking is intrinsic to a financial institution's business. The Bank views risk as an integral part of its development and the diversification of its activities. It advocates a risk management approach that is consistent with its business strategy. The Bank voluntarily exposes itself to certain risk categories, particularly credit and market risk, in order to generate revenue. It also assumes certain risks that are inherent to its activities—to which it does not choose to expose itself—and that do not generate revenue, i.e., mainly operational risks.

Risks	Description
<p>Emerging risks – Increasing and uncertain trade tariffs and barriers</p>	<p>As a result of recent comprehensive changes to U.S. trade policy, tariffs and retaliatory tariffs are being imposed by the U.S. administration and various affected countries, including Canada, Mexico and China, which may affect the Bank and its clients. The level of uncertainty related to such tariffs remains elevated and persistent, as the U.S. administration recently imposed a 90-day pause on most of the previously announced country-specific reciprocal tariffs, reducing tariffs for most countries including China but excluding Canada and Mexico. The potential enactment of recently proposed U.S. tax legislation contributes to this climate of uncertainty. The heightened economic uncertainty and unpredictability of the U.S. government's trade policies continue to create volatility in the financial markets and weigh on the economic and investment outlook, impacting current economic conditions, including such issues as the inflation rate, foreign exchange rates, recessionary risks, and the global supply chain. In addition, the U.S. administration has stated its interest in renegotiating the U.S.-Mexico-Canada Agreement (USMCA), which could result in higher tariffs. Aside from its impact on the global economy, the tariff conflict should continue to have repercussions on the Bank and its clients. The Bank is closely monitoring the developments, as well as the impacts and potential consequences on its financial position and that of its clients, in a macroeconomic environment marked by elevated debt servicing costs, weakened consumer demand and higher operating costs due in part to the reconfiguration of supply chains. Given these circumstances, this conflict may impact many of the top and emerging risks to which the Bank is exposed, including credit risk, market risk, liquidity and funding risk, operational risk, strategic risk, and third-party risk. The extent of the adverse effect on the operational and financial situation of entities such as the Bank and its clients depends largely on the nature and duration of uncertain and unpredictable events, such as the duration or escalation of the tariffs, the evolution of retaliatory measures, possible fiscal or monetary policy responses, and reactions to ongoing changes by global financial markets.</p>

Despite the exercise of stringent risk management and existing mitigation measures, risk cannot be eliminated entirely, and residual risks may occasionally cause losses. Certain risks are discussed hereafter. For additional information, see the Risk Management section on pages 65 to 112 of the *2024 Annual Report*. Risk management information is also provided in Note 6 to the Consolidated Financial Statements, which covers loans.

Credit Risk

Credit risk is the risk of incurring a financial loss if an obligor does not fully honour its contractual commitments to the Bank. Obligors may be borrowers, issuers, guarantors or counterparties. General economic and market conditions in Canada, the U.S. and other countries in which the Bank operates are currently difficult to predict due in part to measures affecting trade relations between Canada and its partners. The imposition of tariffs and the measures taken in response, as well as the possible impacts on our customers, could have an impact on a debtor's ability to repay. Credit risk is the most significant risk facing the Bank in the normal course of its business.

Between March 2, 2022 and July 12, 2023, the Bank of Canada raised its policy rate ten times; the rate has thus risen from 0.25% to 5%. This rapid increase in rates, undertaken primarily to counter inflation in Canada, continues to put pressure on the ability of borrowers, particularly those whose mortgages came up for renewal in the last few months. Over the course of its last eight announcements, from June 5, 2024 to April 16, 2025, the Bank of Canada lowered its policy rate from 5% to 2.75%.

Regulatory Developments

The Bank closely monitors regulatory developments and is actively involved in the various consultation processes. For additional information about the regulatory context as at October 31, 2024, see page 81 of the Risk Management section of the *2024 Annual Report*. In addition, since November 1, 2024, there have been no new regulatory developments to consider.

The amounts in the following tables represent the Bank's maximum exposure to credit risk as at the financial reporting date without considering any collateral held or any other credit enhancements. These amounts do not include allowances for credit losses nor amounts pledged as collateral. The tables also exclude equity securities.

Maximum Credit Risk Exposure Under the Basel Asset Categories⁽¹⁾

- (1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.
- (2) Excludes equity securities and certain other assets such as investments in deconsolidated subsidiaries and joint ventures, right-of-use properties and assets, goodwill, deferred tax assets, and intangible assets.
- (3) Securities purchased under reverse repurchase agreements and sold under repurchase agreements as well as securities loaned and borrowed.
- (4) Letters of guarantee, documentary letters of credit, and securitized assets that represent the Bank's commitment to make payments in the event that an obligor cannot meet its financial obligations to third parties.
- (5) Includes exposures to qualifying central counterparties (QCCP).

To meet OSFI's mortgage loan disclosure requirements, additional information has been provided in the documents *Supplementary Financial Information – Second Quarter 2025* and *Supplementary Regulatory Capital and Pillar 3 Disclosure – Second Quarter 2025*, which are available on the Bank's website at nbc.ca.

Market Risk

Market risk is the risk of financial losses arising from movements in market prices. The Bank is exposed to market risk through its participation in trading, investment, and asset/liability management activities.

The following tables provide a breakdown of the Bank's Consolidated Balance Sheet into financial assets and liabilities by those that carry market risk and those that do not carry market risk, distinguishing between trading positions whose main risk measures are Value-at-Risk (VaR) and non-trading positions that use other risk measures.

Reconciliation of Market Risk With Consolidated Balance Sheet Items

(millions of Canadian dollars)		As at April 30, 2025			
	Balance sheet	Market risk measures		Not subject to market risk	Non-traded risk primary risk sensitivity

(1) Trading positions whose risk measure is total VaR. For additional information, see the table on the following page and in the Market Risk section of the *2024 Annual Report* that shows the VaR distribution of the trading portfolios by risk category and their diversification effect.

(2) Non-trading positions that use other risk measures.

(3) For additional information, see the table in the pages ahead and in the Market Risk section of the *2024 Annual Report* that shows the VaR distribution of the trading portfolios by risk category and their diversification effect and the interest rate sensitivity table.

(4) For additional information, see Note 7 to the audited annual consolidated financial statements for the year ended October 31, 2024.

(5) The fair value of equity securities designated at fair value through other comprehensive income is presented in Notes 3 and 5 to the Consolidated Financial Statements.

(6) These instruments are recorded at amortized cost and are subject to credit risk for capital management purposes. For trading-related transactions with maturities of more than one day, interest rate risk is included in the VaR measure.

(7) For additional information, see Notes 18 and 19 to the audited annual consolidated financial statements for the year ended October 31, 2024.

(8) For additional information, see Note 25 to the audited annual consolidated financial statements for the year ended October 31, 2024.

Trading Activities

The table below shows the VaR distribution of trading portfolios by risk category and their diversification effect.

VaR of Trading Portfolios⁽¹⁾⁽²⁾

(millions of Canadian dollars)	Quarter ended									
	April 30, 2025				January 31, 2025		April 30, 2024		April 30, 2024	
	Low	High	Average	Period end	Average	Period end	Average	Period end	Average	Average
Interest rate	(5.7)	(18.1)	(12.4)	(12.7)	(12.8)	(13.0)	(10.2)	(10.1)	(12.6)	(9.1)
Exchange rate	(0.8)	(3.6)	(1.5)	(1.7)	(2.0)	(0.9)	(1.9)	(1.5)	(1.8)	(2.2)
Equity	(5.0)	(8.9)	(6.2)	(5.6)	(4.8)	(6.5)	(5.0)	(4.5)	(5.5)	(5.6)
Commodity	(1.0)	(1.9)	(1.3)	(1.1)	(1.6)	(1.2)	(1.4)	(1.5)	(1.4)	(1.6)
Diversification effect ⁽³⁾	n.m.	n.m.	8.7	9.2	9.1	8.0	7.4	7.4	8.9	7.9
Total trading VaR	(7.5)	(16.6)	(12.7)	(11.9)	(12.1)	(13.6)	(11.1)	(10.2)	(12.4)	(10.6)

n.m. Computation of a diversification effect for the high and low is not meaningful, as highs and lows may occur on different days and be attributable to different types of risk.

(1) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

(2) Amounts are presented on a pre-tax basis and represent one-day VaR using a 99% confidence level.

(3) The total trading VaR is less than the sum of the individual risk factor VaR results due to the diversification effect.

The average total VaR of the trading portfolios remained stable from the first quarter of 2025 to the second quarter of 2025.

Daily Trading and Underwriting Revenues

The following chart shows daily trading and underwriting revenues and VaR. During the quarter ended April 30, 2025, daily trading and underwriting revenues were positive on 98% of the days. In addition, one day was marked by net daily trading and underwriting losses in excess of \$1 million. None of these losses exceeded VaR.

Quarter Ended April 30, 2025

(millions of Canadian dollars)

Interest Rate Sensitivity – Non-Trading Activities (Before Tax)

The following table presents the potential before-tax impact of an immediate and sustained 100-basis-point increase or of an immediate and sustained 100-basis-point decrease in interest rates on the economic value of equity and on the net interest income of the Bank's non-trading portfolios for the next 12 months, assuming no further hedging is undertaken.

(millions of Canadian dollars)	As at April 30, 2025			As at October 31, 2024		
	Canadian dollar	Other currencies	Total	Canadian dollar	Other currencies	Total
Impact on equity						
100-basis-point increase in the interest rate	(487)	(76)	(563)	(378)	(57)	(435)
100-basis-point decrease in the interest rate	482	75	557	352	48	400
Impact on net interest income						
100-basis-point increase in the interest rate	127	(16)	111	121	(22)	99
100-basis-point decrease in the interest rate	(143)	18	(125)	(161)	25	(136)

Liquidity and Funding Risk

Liquidity and funding risk is the risk that the Bank will be unable to honour daily cash and financial obligations without resorting to costly and untimely measures. Liquidity and funding risk arises when sources of funds become insufficient to meet scheduled payments under the Bank's commitments.

Liquidity risk refers to the possibility that an institution may not be able to meet its financial obligations as they fall due, due to a mismatch between cash inflows and outflows, without incurring unacceptable losses.

Funding risk is defined as the risk to the Bank's ongoing ability to raise sufficient funds to finance actual or proposed business activities on an unsecured or secured basis at an acceptable price. The funding management priority is to achieve an optimal balance between deposits, securitization, secured funding, and unsecured funding. This brings optimal stability to the funding and reduces vulnerability to unpredictable events.

Regulatory Developments

The Bank continues to closely monitor regulatory developments and participates actively in various consultative processes. For additional information about the regulatory context as at October 31, 2024, refer to pages 95 and 96 of the Risk Management section in the *2024 Annual Report*. Furthermore, since November 1, 2024, the new regulatory development below is to be considered.

On November 21, 2024, OSFI published an amended version of the *Liability Adequacy Requirement (LAR) Guideline*. The LAR Guideline incorporates two sets of revisions related to intraday liquidity and the treatment of bankers' acceptances. The revisions relating to intraday liquidity affect Chapters 1 and 7 of the LAR Guideline, while those relating to the processing of bankers' acceptances affect Chapters 3 and 4. No changes were made to Chapters 2, 5 and 6. Implementation of the new intraday liquidity rules is scheduled for November 2025, and is limited to the direct clearers of Lynx, Canada's high-value payment system.

Liquidity Management

Liquid Assets

To protect depositors and creditors from unexpected crisis situations, the Bank holds a portfolio of unencumbered liquid assets that can be readily liquidated to meet financial obligations. The majority of the unencumbered liquid assets are held in Canadian or U.S. dollars. Moreover, all assets that can be quickly monetized are considered liquid assets. The Bank's liquidity reserves do not factor in the availability of the emergency liquidity facilities of central banks. The following tables provide information on the Bank's encumbered and unencumbered assets.

Liquid Asset Portfolio⁽¹⁾

(millions of Canadian dollars)	As at April 30, 2025					As at October 31, 2024

	229,547	138,638	368,185	211,478	156,707	133,008

(1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.

(2) Bank-owned liquid assets include assets for which there are no legal or geographic restrictions.

(3) Securities received as collateral with respect to securities financing and derivative transactions and securities purchased under reverse repurchase agreements and securities borrowed.

(4) In the normal course of its funding activities, the Bank pledges assets as collateral in accordance with standard terms. Encumbered liquid assets include assets used to cover short sales, obligations related to securities sold under repurchase agreements and securities loaned, guarantees related to security-backed loans and borrowings, collateral related to derivative financial instrument transactions, asset-backed securities, and liquid assets legally restricted from transfers.

(5) The average is based on the sum of the end-of-period balances of the three months of the quarter divided by three.

	91,064	21,905	128,777	220,480	462,226	24.4

(1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.

(2) In the normal course of its funding activities, the Bank pledges assets as collateral in accordance with standard terms. Encumbered assets include assets used to cover short sales, obligations related to securities sold under repurchase agreements and securities loaned, guarantees related to security-backed loans and borrowings, collateral related to derivative financial instrument transactions, asset-backed securities, residential mortgage loans securitized and transferred under the Canada Mortgage Bond program, assets held in consolidated trusts supporting the Bank's funding activities, and mortgage loans transferred under the covered bond program.

(3) Other encumbered assets include assets for which there are restrictions and that cannot therefore be used for collateral or funding purposes as well as assets used to cover short sales.

(4) Other unencumbered assets are assets that cannot be used for collateral or funding purposes in their current form. This category includes assets that are potentially eligible as funding program collateral (e.g., mortgages insured by the Canada Mortgage and Housing Corporation that can be securitized into mortgage-backed securities under the *National Housing Act* (Canada)).

Liquidity Coverage Ratio

The liquidity coverage ratio (LCR) was introduced primarily to ensure that banks could withstand periods of severe short-term stress. LCR is calculated by dividing the total amount of high-quality liquid assets (HQLA) by the total amount of net cash outflows. OSFI has been requiring Canadian banks to maintain a minimum LCR of 100%. An LCR above 100% ensures that banks are holding sufficient high-quality liquid assets to cover net cash outflows given a severe, 30-day liquidity crisis. The assumptions underlying the LCR scenario are established by the BCBS and OSFI's *Liquidity Adequacy Requirements Guideline*.

The table on the following page provides average LCR data calculated using the daily figures in the quarter. For the quarter ended April 30, 2025, the Bank's average LCR was 166%, well above the 100% regulatory requirement and demonstrating the Bank's solid short-term liquidity position.

n.a. Not applicable

- (1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.
- (2) OSFI prescribed a table format in order to standardize disclosure throughout the banking industry.
- (3) Unweighted values are calculated as outstanding balances maturing or callable within 30 days (for cash inflows and outflows).
- (4) Weighted values are calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates.
- (5) Total adjusted values are calculated after the application of both haircuts and inflow and outflow rates and any applicable caps.
- (6) The data in this table is calculated using averages of the daily figures in the quarter.

As at April 30, 2025, Level 1 liquid assets represented 84% of the Bank's HQLA, which includes cash, central bank deposits, and bonds issued or guaranteed by the Canadian government and Canadian provincial governments.

Cash outflows arise from the application of OSFI-prescribed assumptions on deposits, debt, secured funding, commitments and additional collateral requirements. The cash outflows are partly offset by cash inflows, which come mainly from secured loans and performing loans. The Bank expects some quarter-over-quarter variation between reported LCRs without such variation being necessarily indicative of a trend. The variation between the quarter ended April 30, 2025 and the preceding quarter was a result of normal business operations. The Bank's liquid asset buffer is well in excess of its total net cash outflows.

The LCR assumptions differ from the assumptions used for the liquidity disclosures presented in the tables on the previous pages or those used for internal liquidity management rules. While the liquidity disclosure framework is prescribed by the EDTF, the Bank's internal liquidity metrics use assumptions that are calibrated according to its business model and experience.

Net Stable Funding Ratio

The BCBS has developed the net stable funding ratio (NSFR) to promote a more resilient banking sector. The NSFR requires institutions to maintain a stable funding profile in relation to the composition of their assets and off-balance-sheet activities. A viable funding structure is intended to reduce the likelihood that disruptions to an institution's regular sources of funding would erode its liquidity position in a way that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR is calculated by dividing available stable funding by required stable funding. OSFI has been requiring Canadian banks to maintain a minimum NSFR of 100%.

The following table provides the available stable funding and required stable funding in accordance with OSFI's *Liquidity Adequacy Requirements Guideline*. As at April 30, 2025, the Bank's NSFR was 127%, well above the 100% regulatory requirement and demonstrating the Bank's solid long-term liquidity position.

n.a. Not applicable

(1) See the Financial Reporting Method section on pages 6 to 12 for additional information on capital management measures.

(2) OSFI prescribed a table format in order to standardize disclosure throughout the banking industry.

(3) Weighted values are calculated after application of the weightings set out in OSFI's *Liquidity Adequacy Requirements Guideline*.

(4) As per OSFI's specifications, liabilities arising from transactions involving the Canada Mortgage Bond program and their corresponding encumbered mortgages are given ASF and RSF weights of 0%, respectively.

(5) As per OSFI's specifications, there is no need to differentiate by maturities.

The NSFR represents the amount of ASF relative to the amount of RSF. ASF is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of RSF of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance-sheet exposures. The ASF and RSF amounts are calibrated to reflect the degree of stability of liabilities and liquidity of assets. The Bank expects some quarter-over-quarter variation between reported NSFRs without such variation being necessarily indicative of a long-term trend.

The NSFR assumptions differ from the assumptions used for the liquidity disclosures provided in the tables on the preceding pages or those used for internal liquidity management rules. While the liquidity disclosure framework is prescribed by the EDTF, the Bank's internal liquidity metrics use assumptions that are calibrated according to its business model and experience.

Funding

The Bank continuously monitors and analyzes market trends as well as possibilities for accessing less expensive and more flexible funding, considering both the risks and opportunities observed. The deposit strategy remains a priority for the Bank, which continues to prefer deposits to institutional funding.

The table below presents the residual contractual maturities of the Bank's wholesale funding. The information has been presented in accordance with the categories recommended by the EDTF working group for comparison purposes with other banks.

Residual Contractual Maturities of Wholesale Funding

(millions of Canadian dollars)	As at April 30, 2025							
	1 month or less	Over 1 month to 3 months	Over 3 months to 6 months	Over 6 months to 12 months	Subtotal 1 year or less	Over 1 year to 2 years	Over 2 years	Total

As at October 31, 2024	3,200	11,456	15,080	16,669	46,405	12,239	44,588	103,232

(1) Deposits from banks include all non-negotiable term deposits from banks.

(2) Includes bearer deposit notes.

(3) Includes debts subject to bank recapitalization (bail-in) conversion regulations.

(4) Subordinated debt is presented in this table, but the Bank does not consider it as part of its wholesale funding.

As part of a comprehensive liquidity management framework, the Bank regularly reviews its contracts that stipulate that additional collateral could be required in the event of a downgrade of the Bank's credit rating. The Bank's liquidity position management approach already incorporates additional collateral requirements in the event of a one-notch to three-notch downgrade in credit rating. The table below presents the additional collateral requirements in the event of a one-, two-, or three-notch credit rating downgrade.

(millions of Canadian dollars)	As at April 30, 2025		
	One-notch downgrade	Two-notch downgrade	Three-notch downgrade
Derivatives ⁽¹⁾	37	75	140

(1) Contractual requirements related to agreements known as initial margins and variation margins.

Residual Contractual Maturities of Balance Sheet Items and Off-Balance-Sheet Commitments

The following tables present balance sheet items and off-balance-sheet commitments by residual contractual maturity as at April 30, 2025 with comparative figures as at October 31, 2024. The information gathered from this maturity analysis is a component of liquidity and funding management. However, this maturity profile does not represent how the Bank manages its interest rate risk or its liquidity risk and funding needs. The Bank considers factors other than contractual maturity when assessing liquid assets or determining expected future cash flows.

In the normal course of business, the Bank enters into various off-balance-sheet commitments. The credit instruments used to meet the financing needs of its clients represent the maximum amount of additional credit the Bank could be obligated to extend if the commitments were fully drawn.

The Bank also has future minimum commitments under leases for premises as well as under other contracts, mainly commitments to purchase loans and contracts for outsourced information technology services. Most of the lease commitments are related to operating leases.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the balances as at April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) Amounts payable upon demand or notice are considered to have no specified maturity.

(3) The *Deposits* item is presented in greater detail than it is on the Consolidated Balance Sheet.

(4) Amounts are disclosed according to the remaining contractual maturity of the underlying security.

(5) These amounts mainly include liabilities related to the securitization of mortgage loans.

(6) The *Other liabilities* item is presented in greater detail than it is on the Consolidated Balance Sheet.

(7) These amounts are unconditionally revocable at the Bank's discretion at any time.

(8) In the event of payment on one of the backstop liquidity facilities, the Bank will receive as collateral government bonds in an amount up to \$5.6 billion.

(9) These amounts include \$58.5 billion that is unconditionally revocable at the Bank's discretion at any time.

(10) These amounts include leases for which the underlying asset is of low value and leases other than for real estate of less than one year.

(1) Amounts payable upon demand or notice are considered to have no specified maturity.

(2) The *Deposits* item is presented in greater detail than it is on the Consolidated Balance Sheet.

(3) Amounts are disclosed according to the remaining contractual maturity of the underlying security.

(4) These amounts mainly include liabilities related to the securitization of mortgage loans.

(5) The *Other liabilities* item is presented in greater detail than it is on the Consolidated Balance Sheet.

(6) These amounts are unconditionally revocable at the Bank's discretion at any time.

(7) In the event of payment on one of the backstop liquidity facilities, the Bank will receive as collateral government bonds in an amount up to \$5.6 billion.

(8) These amounts include \$48.6 billion that is unconditionally revocable at the Bank's discretion at any time.

(9) These amounts include leases for which the underlying asset is of low value and leases other than for real estate of less than one year.

(10) These amounts include \$5 million in contractual commitments related to the head office building.

Environmental and Social Risk

Environmental and social risk is the possibility that environmental and social matters would result in a financial loss for the Bank or affect its business activities. For additional information on the ways the Bank addresses and mitigates this risk, see the Environmental and Social Risk section on pages 110 to 112 of the Bank's *2024 Annual Report*.

Regulatory Developments

The Bank continues to closely monitor regulatory developments and participates actively in various consultative processes. Since November 1, 2024, the new regulatory development below is to be considered.

On December 18, 2024, the Canadian Sustainability Standards Board (CSSB) published its first Canadian Sustainability Disclosure Standards (CSDS). CSDS 1 – *General Requirements for Disclosure of Sustainability-related Financial Information*, and CSDS 2 – *Climate-related Disclosures*, which are aligned with IFRS S1 – *General Requirements for Disclosure of Sustainability-related financial Information* and IFRS S2 – *Climate-related Disclosures*, retain the proposals included in the exposure drafts published on March 13, 2024, and include additional transition relief measures for certain disclosure requirements. CSDS will be applicable to D-SIBs at the end of fiscal 2026, and transitional relief measures will postpone certain disclosure requirements until the end of fiscal 2029. Disclosure under CSDS will be voluntary until mandated by the CSA. On April 23, 2025, the CSA announced that it was pausing its work on projects related to mandatory climate-related disclosure and amendments to existing diversity disclosure requirements. The CSA will monitor regulatory developments and revisit these two projects in the coming years.

On March 7, 2025, OSFI released an update to Guideline B-15, Climate Risk Management. Key changes include the deferral of the Scope 3 greenhouse gas (GHG) emissions disclosure requirement and clarification of expectations regarding asset management activities.

Risk Disclosures

One of the purposes of the *2024 Annual Report*, the *Report to Shareholders – Second Quarter 2025*, and the related supplementary information documents is to provide transparent, high-quality risk disclosures in accordance with the recommendations made by the Financial Stability Board's EDTF group. The following table lists the references where users can find information that responds to the EDTF's 32 recommendations.

(1) Second quarter 2025.

(2) These pages are included in the document entitled *Supplementary Financial Information – Second Quarter 2025*.

Accounting Policies and Financial Disclosure

Material Accounting Policies and Accounting Estimates

The unaudited interim condensed consolidated financial statements for the quarter and six-month period ended April 30, 2025 were prepared in accordance with IAS 34 – *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB) and use the same accounting policies as those described in Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2024, except for the addition of finance lease accounting described below as a result of the acquisition of the Canadian Western Bank (CWB). The financial results of CWB have been consolidated in the Bank's financial statements as of February 3, 2025 and results have been recorded in Personal and Commercial, Wealth Management, and Financial Markets segments and in the *Other* heading segment of results.

Leases

Bank as the lessor

When the Bank is the lessor, the contracts are classified as finance leases if they transfer substantially all of the risks and rewards of ownership of the underlying asset to the lessee, otherwise they are classified as operating leases. For finance leases, a receivable is recorded in *Loans* on the Consolidated Balance Sheet for an amount equal to the net investment in the lease, which represents the minimum payments receivable from the lessee plus any unguaranteed residual value expected to be recovered at the end of the lease, discounted at the interest rate implicit in the lease. Finance lease receivables are subsequently recorded at an amount equal to the net investment in the lease, net of allowances for expected credit losses. Interest income is recognized over the term of the lease in *Interest income* in the Consolidated Statement of Income. For operating leases, the leased assets remain on the Consolidated Balance Sheet and are reported in *Premises and equipment*, and the rental income is recognized in *Non-interest income* in the Consolidated Statement of Income.

Judgment, Estimates and Assumptions

In preparing consolidated financial statements in accordance with IFRS, management must exercise judgment and make estimates and assumptions that affect the reporting date carrying values of assets and liabilities, net income, and related information. Some accounting policies are considered critical given their importance to the presentation of the Bank's financial position and operating results and require subjective and complex judgments and estimates on matters that are inherently uncertain. Any change in these judgments and estimates could have a significant impact on the Bank's consolidated financial statements. The material accounting policies and accounting estimates are the same as those described on pages 113 to 118 of the *2024 Annual Report*, except for the addition mentioned above.

The geopolitical landscape, notably the measures affecting trade relations between Canada and its partners, including the imposition of tariffs and any measures taken in response to such tariffs, the Russia-Ukraine war and clashes between Israel and Hamas, inflation, climate change, and previously high interest rates continue to create uncertainty. As a result, establishing reliable estimates and applying judgment continue to be substantially complex. See Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2024 for a summary of the most significant estimation processes used to prepare the Consolidated Financial Statements and for the valuation techniques used to determine the carrying values and fair values of assets and liabilities. In addition, valuation techniques used for assets and liabilities resulting from the CWB acquisition are described below. The uncertainty surrounding certain key inputs used in measuring ECLs is described in Note 6 to the Consolidated Financial Statements.

CWB acquisition – Valuation of Assets and Liabilities

The Bank used significant judgment and assumptions to determine the fair value of the CWB assets acquired and liabilities assumed, including the loan portfolio, core-deposit and customer relationship intangible assets and deposits.

For loans, fair value was determined by discounting the estimated cash flows expected to be received on all purchased loans back to their present value. Management's best estimate of current key assumptions such as default rates, loss severity, timing of prepayments options and collateral was used to estimate expected cash flows. In determining the discount rate, various inputs were considered, including the risk-free interest rates in the current market, the risk premium associated with the loans and the cost to service the portfolios.

For core-deposit intangible assets, fair value was determined using a discounted cash flow approach, comparing the present value of the cost to maintain the acquired core deposits to the cost of alternative funding. The present value of the cost to maintain the acquired core deposits includes an estimate of future interest costs and operating expenses for these deposits acquired. Core deposits are those that are considered to be stable, below-market sources of funding, whereas the present value of the cost of alternative funding includes an estimate of future interest costs that would be incurred if the funds were borrowed from the public market. Deposit run-off was estimated using historical attrition data, comparing this to market sources at the date of acquisition.

The fair value of customer relationships acquired was determined based on the excess of estimated future cash inflows based on revenue from the acquired relationships over the related estimated cash outflows over the estimated useful life of the customer base.

For the deposits, fair value was determined by discounting the estimated cash flows to be repaid, back to their present value. The timing and amount of cash flows involve significant management judgment regarding the likelihood of early redemption and the timing of withdrawal by the customer. Discount rates were based on the prevailing rates that were paid on similar deposits at the date of acquisition.

The fair value of all other assets and liabilities was calculated using market data where possible, as well as management judgment to determine the price that would be obtained in an arms-length transaction between knowledgeable, willing parties.

For additional information, see Note 19 to the Consolidated Financial Statements.

Future Accounting Policy Changes

The Bank closely monitors both new accounting standards and amendments to existing accounting standards issued by the IASB. There have been no significant updates to the future accounting policy changes disclosed in Note 3 to the audited annual consolidated financial statements for the year ended October 31, 2024. The Bank is currently assessing the impact of applying these standards on the consolidated financial statements.

Financial Disclosure

During the second quarter of 2025, no changes were made to the policies, procedures, and other processes that comprise the Bank's internal control over financial reporting that had or could reasonably have a significant impact on the internal control over financial reporting.

Following the acquisition of CWB on February 3, 2025, the Bank implemented and amended certain processes related to internal control over financial reporting. These amendments did not have a material impact on internal control over financial reporting.

(1) On February 3, 2025, the Bank completed the acquisition of CWB. CWB's results were consolidated from the closing date, which impacted the results, balances and ratios for the quarter and the six-month period ended April 30, 2025. For additional information on the impact of the CWB acquisition, see the Acquisition section.

(2) See the Glossary section on pages 51 to 54 for details on the composition of these measures.

Glossary

Acceptances

Acceptances and the customers' liability under acceptances constitute a guarantee of payment by a bank and can be traded in the money market. The Bank earns a "stamping fee" for providing this guarantee.

Allowances for credit losses

Allowances for credit losses represent management's unbiased estimate of expected credit losses as at the balance sheet date. These allowances are primarily related to loans and off-balance-sheet items such as loan commitments and financial guarantees.

Assets under administration

Assets in respect of which a financial institution provides administrative services on behalf of the clients who own the assets. Such services include custodial services, collection of investment income, settlement of purchase and sale transactions, and record-keeping. Assets under administration are not reported on the balance sheet of the institution offering such services.

Assets under management

Assets managed by a financial institution and that are beneficially owned by clients. Management services are more comprehensive than administrative services and include selecting investments or offering investment advice. Assets under management, which may also be administered by the financial institution, are not reported on the balance sheet of the institution offering such services.

Available TLAC

Available TLAC includes total capital as well as certain senior unsecured debt subject to the federal government's bail-in regulations that satisfy all of the eligibility criteria in OSFI's *Total Loss Absorbing Capacity (TLAC) Guideline*.

Average interest-bearing assets

Average interest-bearing assets include interest-bearing deposits with financial institutions and certain cash items, securities, securities purchased under reverse repurchase agreements and securities borrowed, and loans, while excluding customers' liability under acceptances and other assets. The average is calculated based on the daily balances for the period.

Average interest-bearing assets, non-trading

Average interest-bearing assets, non-trading, include interest-bearing deposits with financial institutions and certain cash items, securities purchased under reverse repurchase agreements and securities borrowed, and loans, while excluding other assets and assets related to trading activities. The average is calculated based on the daily balances for the period.

Average volumes

Average volumes represent the average of the daily balances for the period of the consolidated balance sheet items.

Basic earnings per share

Basic earnings per share is calculated by dividing net income attributable to common shareholders by the weighted average basic number of common shares outstanding.

Basis point (bps)

Unit of measure equal to one one-hundredth of a percentage point (0.01%).

Book value of a common share

The book value of a common share is calculated by dividing common shareholders' equity by the number of common shares on a given date.

Common Equity Tier 1 (CET1) capital ratio

CET1 capital consists of common shareholders' equity less goodwill, intangible assets, and other capital deductions. The CET1 capital ratio is calculated by dividing total CET1 capital by the corresponding risk-weighted assets.

Compound annual growth rate (CAGR)

CAGR is a rate of growth that shows, for a period exceeding one year, the annual change as though the growth had been constant throughout the period.

Derivative financial instruments

Derivative financial instruments are financial contracts whose value is derived from an underlying interest rate, exchange rate, equity price, commodity price, credit instrument or index. Examples of derivatives include swaps, options, forward rate agreements, and futures. The notional amount of the derivative is the contract amount used as a reference point to calculate the payments to be exchanged between the two parties, and the notional amount itself is generally not exchanged by the parties.

Diluted earnings per share

Diluted earnings per share is calculated by dividing net income attributable to common shareholders by the weighted average number of common shares outstanding after taking into account the dilution effect of stock options using the treasury stock method and any gain (loss) on the redemption of preferred shares.

Dividend payout ratio

The dividend payout ratio represents the dividends of common shares (per share amount) expressed as a percentage of basic earnings per share.

Economic capital

Economic capital is the internal measure used by the Bank to determine the capital required for its solvency and to pursue its business operations. Economic capital takes into consideration the credit, market, operational, business and other risks to which the Bank is exposed as well as the risk diversification effect among them and among the business segments. Economic capital thus helps the Bank to determine the capital required to protect itself against such risks and ensure its long-term viability.

Efficiency ratio

The efficiency ratio represents non-interest expenses expressed as a percentage of total revenues. It measures the efficiency of the Bank's operations.

Fair value

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal market at the measurement date under current market conditions (i.e., an exit price).

Gross impaired loans as a percentage of total loans and acceptances

This measure represents gross impaired loans expressed as a percentage of the balance of loans and acceptances.

Gross impaired loans excluding Credigy's POCI loans

Gross impaired loans excluding Credigy subsidiary's POCI loans are all loans classified in Stage 3 and POCI loans of the expected credit loss model excluding Credigy subsidiary's POCI loans.

Gross impaired loans excluding Credigy's POCI loans as a percentage of total loans and acceptances

This measure represents gross impaired loans excluding Credigy subsidiary's POCI loans expressed as a percentage of the balance of loans and acceptances.

Hedging

The purpose of a hedging transaction is to modify the Bank's exposure to one or more risks by creating an offset between changes in the fair value of, or the cash flows attributable to, the hedged item and the hedging instrument.

Impaired loans

The Bank considers a financial asset, other than a credit card receivable, to be credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred or when contractual payments are 90 days past due. Credit card receivables are considered credit-impaired and are fully written off at the earlier of the following dates: when a notice of bankruptcy is received, a settlement proposal is made, or contractual payments are 180 days past due.

Leverage ratio

The leverage ratio is calculated by dividing Tier 1 capital by total exposure. Total exposure is defined as the sum of on-balance-sheet assets (including derivative financial instrument exposures and securities financing transaction exposures) and off-balance-sheet items.

Liquidity coverage ratio (LCR)

The LCR is a measure designed to ensure that the Bank has sufficient high-quality liquid assets to cover net cash outflows given a severe, 30-day liquidity crisis.

Loans and acceptances

Loans and acceptances represent the sum of loans and of the customers' liability under acceptances.

Loan-to-value ratio

The loan-to-value ratio is calculated according to the total facility amount for residential mortgages and home equity lines of credit divided by the value of the related residential property.

Master netting agreement

Legal agreement between two parties that have multiple derivative contracts with each other that provides for the net settlement of all contracts through a single payment, in the event of default, insolvency or bankruptcy.

Net impaired loans

Net impaired loans are gross impaired loans presented net of allowances for credit losses on Stage 3 loan amounts drawn.

Net impaired loans as a percentage of total loans and acceptances

This measure represents net impaired loans as a percentage of the balance of loans and acceptances.

Net impaired loans excluding Credigy's POCI loans

Net impaired loans excluding Credigy subsidiary's POCI loans are gross impaired loans excluding the Credigy subsidiary's POCI loans presented net of allowances for credit losses on amounts drawn on Stage 3 loans granted by the Bank and the POCI loans excluding the Credigy subsidiary's POCI loans.

Net interest income from trading activities

Net interest income from trading activities comprises dividends related to financial assets and liabilities associated with trading activities, net of interest expenses and interest income related to the financing of these financial assets and liabilities.

Net interest income, non-trading

Net interest income, non-trading, comprises revenues related to financial assets and liabilities associated with non-trading activities, net of interest expenses and interest income related to the financing of these financial assets and liabilities.

Net interest margin

Net interest margin is calculated by dividing net interest income by average interest-bearing assets.

Net stable funding ratio (NSFR)

The NSFR ratio is a measure that helps guarantee that the Bank is maintaining a stable funding profile to reduce the risk of funding stress.

Net write-offs as a percentage of average loans and acceptances

This measure represents the net write-offs (net of recoveries) expressed as a percentage of average loans and acceptances.

Non-interest income related to trading activities

Non-interest income related to trading activities consists of realized and unrealized gains and losses as well as interest income on securities measured at fair value through profit or loss, income from held-for-trading derivative financial instruments, changes in the fair value of loans at fair value through profit or loss, changes in the fair value of financial instruments designated at fair value through profit or loss, certain commission income, other trading activity revenues, and any applicable transaction costs.

Office of the Superintendent of Financial Institutions (Canada) (OSFI)

The mandate of OSFI is to regulate and supervise financial institutions and private pension plans subject to federal oversight, to help minimize undue losses to depositors and policyholders and, thereby, to contribute to public confidence in the Canadian financial system.

Operating leverage

Operating leverage is the difference between the growth rate for total revenues and the growth rate for non-interest expenses.

Provisioning rate

This measure represents the allowances for credit losses on impaired loans expressed as a percentage of gross impaired loans.

Provisioning rate excluding Credigy's POCI loans

This measure represents the allowances for credit losses on impaired loans excluding Credigy subsidiary's POCI loans expressed as a percentage of gross impaired loans excluding Credigy subsidiary's POCI loans.

Provisions for credit losses

Amount charged to income necessary to bring the allowances for credit losses to a level deemed appropriate by management and is comprised of provisions for credit losses on impaired and non-impaired financial assets.

Provisions for credit losses as a percentage of average loans and acceptances

This measure represents the provisions for credit losses expressed as a percentage of average loans and acceptances.

Provisions for credit losses on impaired loans as a percentage of average loans and acceptances

This measure represents the provisions for credit losses on impaired loans expressed as a percentage of average loans and acceptances.

Provisions for credit losses on impaired loans excluding Credigy's POCI loans

Amount charged to income necessary to bring the allowances for credit losses to a level deemed appropriate by management and is comprised of provisions for credit losses on impaired financial assets excluding Credigy subsidiary's POCI loans.

Provisions for credit losses on impaired loans excluding Credigy's POCI loans as a percentage of average loans and acceptances or provisions for credit losses on impaired loans excluding Credigy's POCI loans ratio

This measure represents the provisions for credit losses on impaired loans excluding Credigy subsidiary's POCI loans expressed as a percentage of average loans and acceptances.

Return on average assets

Return on average assets represents net income expressed as a percentage of average assets.

Return on common shareholders' equity (ROE)

ROE represents net income attributable to common shareholders expressed as a percentage of average equity attributable to common shareholders. It is a general measure of the Bank's efficiency in using equity.

Risk-weighted assets

Assets are risk weighted according to the guidelines established by OSFI. In the Standardized calculation approach, risk factors are applied directly to the face value of certain assets in order to reflect comparable risk levels. In the Advanced Internal Ratings-Based (AIRB) Approach, risk-weighted assets are derived from the Bank's internal models, which represent the Bank's own assessment of the risks it incurs. In the Foundation Internal Ratings-Based (FIRB) Approach, the Bank can use its own estimate of probability of default but must rely on OSFI estimates for the loss given default and exposure at default risk parameters. Off-balance-sheet instruments are converted to balance sheet (or credit) equivalents by adjusting the notional values before applying the appropriate risk-weighting factors.

Securities purchased under reverse repurchase agreements

Securities purchased by the Bank from a client pursuant to an agreement under which the securities will be resold to the same client on a specified date and at a specified price. Such an agreement is a form of short-term collateralized lending.

Securities sold under repurchase agreements

Financial obligations related to securities sold pursuant to an agreement under which the securities will be repurchased on a specified date and at a specified price. Such an agreement is a form of short-term funding.

Structured entity

A structured entity is an entity created to accomplish a narrow and well-defined objective and is designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate solely to administrative tasks and the relevant activities are directed by means of contractual arrangements.

Taxable equivalent basis

Taxable equivalent basis is a calculation method that consists of grossing up certain revenues taxed at lower rates (notably dividends) by the income tax to a level that would make it comparable to revenues from taxable sources in Canada, and an equivalent amount is recognized in the income taxes.

Tier 1 capital ratio

Tier 1 capital ratio consists of Common Equity Tier 1 capital and Additional Tier 1 instruments, namely, qualifying non-cumulative preferred shares and the eligible amount of innovative instruments. The Tier 1 capital ratio is calculated by dividing Tier 1 capital, less regulatory adjustments, by the corresponding risk-weighted assets.

TLAC leverage ratio

The TLAC leverage ratio is an independent risk measure that is calculated by dividing available TLAC by total exposure, as set out in OSFI's *Total Loss Absorbing Capacity (TLAC) Guideline*.

TLAC ratio

The TLAC ratio is a measure used to assess whether a non-viable Domestic Systemically Important Bank (D-SIB) has sufficient loss-absorbing capacity to support its recapitalization. It is calculated by dividing available TLAC by risk weighted assets, as set out in OSFI's *Total Loss Absorbing Capacity (TLAC) Guideline*.

Total capital ratio

Total capital is the sum of Tier 1 and Tier 2 capital. Tier 2 capital consists of the eligible portion of subordinated debt and certain allowances for credit losses. The Total capital ratio is calculated by dividing Total capital, less regulatory adjustments, by the corresponding risk-weighted assets.

Total shareholder return (TSR)

TSR represents the average total return on an investment in the Bank's common shares. The return includes changes in share price and assumes that the dividends received were reinvested in additional common shares of the Bank.

Trading activity revenues

Trading activity revenues consist of the net interest income and the non-interest income related to trading activities. Net interest income comprises dividends related to financial assets and liabilities associated with trading activities, and some interest income related to the financing of these financial assets and liabilities net of interest expenses and interest income related to the financing of these financial assets and liabilities. Non-interest income consists of realized and unrealized gains and losses as well as interest income on securities measured at fair value through profit or loss, income from held-for-trading derivative financial instruments, changes in the fair value of loans at fair value through profit or loss, changes in the fair value of financial instruments designated at fair value through profit or loss, realized and unrealized gains and losses as well as interest expense on obligations related to securities sold short, certain commission income, other trading activity revenues, and any applicable transaction costs.

Value-at-Risk (VaR)

VaR is a statistical measure of risk that is used to quantify market risks across products, per types of risks, and aggregate risk on a portfolio basis. VaR is defined as the maximum loss at a specific confidence level over a certain horizon under normal market conditions. The VaR method has the advantage of providing a uniform measurement of financial instrument-related market risks based on a single statistical confidence level and time horizon.
