1. NATURE AND CONTINUANCE OF OPERATIONS

Alset AI Ventures Inc. (formerly Alset Capital Inc.) (the “Company”) was incorporated under the laws of the State of Nevada on October 29, 1999. On January 27, 2009, the Company was continued from the State of Nevada to the Province of British Columbia under the *Business Corporations Act* (British Columbia). The Company’s common shares trade on the TSX Venture Exchange (“TSX-V”) under the symbol “GPUS”, OTC Pink Market (“OTC”) under the symbol “ALSCF”, and Frankfurt Stock Exchange (“FSE”) under the symbol “1R60”.

The Company is an investment issuer primarily focused on investments in the technology industry, including but not limited to artificial intelligence (“AI”). The Company’s investment portfolio is currently comprised of 49.0% ownership in each of Cedarcross International Technologies Inc. (“Cedarcross”) and Vertex AI Ventures Inc. (“Vertex”).

The Company’s registered and records office is #1500 - 1055 West Georgia Street Vancouver, BC V6E 4N7. Its principal business activity is the business of investing in technology companies, which involves a high degree of risk and there can be no assurance that current investment programs will result in profitable operations.

These condensed interim financial statements have been prepared in accordance with IFRS Accounting Standards (“IFRS”) with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to sustain operations in the long-term. While the Company has been successful in obtaining its required funding in the past, there is no assurance that such future financing will be available on favourable terms. An inability to raise additional financing may impact the future assessment of the Company as a going concern. These material uncertainties may cast significant doubt about the ability of the Company to continue as a going concern.

The condensed interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company’s ability to receive financial support, necessary financings, or generate profitable operations in the future.

2. BASIS OF PREPARATION

Statement of compliance

These condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting. Accordingly, these condensed interim financial statements do not include all of the information and footnotes required by IFRS for complete financial statements for year-end reporting purposes. These condensed interim financial statements should be read together with the audited financial statements for the year ended September 30, 2024.

The condensed interim financial statements have been prepared on a historical cost basis, except for certain financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their value.

2. BASIS OF PREPARATION *(cont'd...)*

Basis of presentation and consolidation

The condensed interim financial statements have been prepared on a historical cost basis, except for certain financial instruments classified as financial instruments at fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The Company qualifies as an investment entity as it meets the following definition of an investment entity as outlined in IFRS 10, Consolidated Financial Statements:

- Obtains funds from one or more investors for the purpose of providing those investor(s) with investment management services;
- Commits to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and
- Measures and evaluates the performance of substantially all of its investments on a fair value basis.

The condensed interim financial statements are presented in Canadian dollars, which is also the Company's functional currency.

The preparation of these condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the year. Actual results could differ from these estimates.

Use of estimates and judgments

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to:

Critical accounting estimates

Income taxes

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in our provision for income taxes.

Valuation of investments

The determinations of fair value of the Company's investments at other than initial cost are subject to certain limitations. Financial information for privately-held company investments may not be available and, even if available, that information may be limited and/or unreliable. Use of the valuation approach described below may involve uncertainties and determinations based on the Company's judgment and any value estimated from these techniques may not be realized or realizable.

Company-specific information is considered when determining whether the fair value of a privately-held investment should be adjusted upward or downward at the end of each reporting period. In addition to company-specific information, the Company will take into account trends in general market conditions and the share performance of comparable publicly-traded companies when valuing privately-held investments.

2. BASIS OF PREPARATION *(cont'd...)*

Critical accounting estimates *(cont'd...)*

Valuation of investments (cont'd...)

The Company holds 75% interests in Cedarcross and Vertex as at June 30, 2025. The Company evaluates, among other factors, the duration and extent to which the fair value of an investment is less than its cost; and the financial health of, and near-term business outlook for, the investee, including factors such as industry and sector performance, changes in technology, and operational and financing cash flow. The Company applied a transactional approach for valuing the investments in Cedarcross, Vertex, Blueprint and Henon for the nine months ended June 30, 2025. This approach assesses recent transactions of the investees to support the fair value of the investments as at year end.

Investments held in public entities are valued by the publicly available market data, and warrants of investments in publicly held entities are valued using the Black-Scholes option pricing model.

Share-based payments

The fair value of share-based payments is determined using the Black-Scholes option pricing model. This option pricing model requires the input of subjective assumptions including the expected price volatility, option life, dividend yield, risk-free rate and estimated forfeitures at the initial grant.

Convertible debenture

The determination of the carrying value of the convertible debentures on initial issuance is subject to management's estimates in determining an appropriate discount rate based on similar instruments with no conversion features.

Critical accounting judgments

Going concern

The determination of whether the Company will continue as a going concern for the next year (Note 1).

Investment entity

Investees operate independently of the management of the Company, and management has determined that the Company currently invests its funds solely for capital appreciation. Accordingly, management considers the Company to meet the definition of an investment entity.

Collectability of loan

The determination of the collectability of the loans to Cedarcross requires significant judgment. Management has considered the loans as collectable, based on the history of collection to date and have extended the maturity date by one year during the nine months ended June 30, 2025.

3. MATERIAL ACCOUNTING POLICIES

These condensed interim financial statements have been prepared using the same policies and methods as the financial statements of the Company for the year ended September 30, 2024 and reflect all the adjustments necessary for fair presentation in accordance with IAS 34 except the following:

Digital currencies

Digital currencies consist of crypto-currency denominated assets such as Solana and IO.net tokens and are included in current assets. Digital currencies meet the definition of intangible assets in IAS 38 Intangible Assets as they are identifiable non-monetary assets without physical substance. Purchased digital currencies are initially recorded at cost, and are marked to market subsequently. Changes in fair value are recorded through profit and loss.

4. INVESTMENTS

6. CONVERTIBLE DEBENTURES *(cont'd)*

The Debentures mature on the date (the “Maturity Date”) that is 12 months from the date of issuance (the “Closing Date”). The principal amount of Debentures may be converted into units of the Company (“Debenture Units”), in whole or in part, at the option of the holder, at any time following the Closing Date but on or before the Maturity Date, into Debenture Units at a price of \$0.05 per Unit.

The Debentures bear interest at a rate of 24.0% per annum from the Closing Date.

Each Debenture Unit consists of one common share and one share purchase warrant (“Debenture Warrant”). Each Debenture Warrant will entitle the holder thereof to acquire one additional share at a price of \$0.05 per share for a period of 12 months from the date of issuance.

For accounting purposes, the Debentures are separated into their liability and equity components using the residual method. The fair value of the liability component at the time of issue is determined based on an estimated rate of 27.0% for debentures without the conversion feature. The fair value of the equity component is determined as the difference between the face value of the convertible debenture and the fair value of the liability component. After initial recognition, the liability component is carried on an amortized cost basis and will be accreted to its face value over the term to maturity of the convertible debentures at an effective rate of 27.0%.

During the nine months ended June 30, 2025, the Company incurred interest expense of \$6,920 (2024 - \$25,420) and accretion expense of \$681 (2024 - \$2,502) on the convertible debentures, which has been recorded on the statement of operations and comprehensive loss. The Company issued 4,290,400 units in settlement of \$210,432 of convertible debt during the nine months ended June 30, 2025.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT *(cont'd...)*

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Currency risk

Currency risk is the risk that the Company will be subject to foreign currency fluctuation. The Company is exposed to foreign currency risk on fluctuations related to cash that is denominated in US Dollars. As at June 30, 2025, the Company has US\$1,110,711 (CA\$1,515,343). A 10% change in CAD-USD would affect comprehensive loss by approximately \$151,534 (September 30, 2024 - \$169,393).

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and receivables. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions.

Liquidity risk

The Company's approach to managing liquidity risk is to try and have sufficient liquidity to meet liabilities when due. As at June 30, 2025, the Company had a cash balance of \$1,693,252 (September 30, 2024 - \$1,797,575) to settle current liabilities of \$517,589 (September 30, 2024 - \$791,413). All of the Company's accounts payable and accrued liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

Interest rate risk

The Company's financial assets exposed to interest rate risk consist of cash balances. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As at June 30, 2025, the Company did not have any investments in investment-grade short-term deposit certificates.

Debt instruments carrying interest charges are at fixed rates and not subject to variable adjustment, unless in certain circumstances of default (Note 7).

Price risk

The Company is exposed to price risk with respect to equity prices. The Company closely monitors individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.
