

(formerly White Metal Resources Corp.)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the year ended April 30, 2025

August 22, 2025

General

This Management Discussion and Analysis ("MD&A") is dated August 22, 2025 and is in respect of the year ended April 30, 2025. The following discussion of the financial condition and results of operations of Thunder Gold Corp. (formerly White Metal Resources Corp.) ("Thunder Gold" or the "Company") constitutes management's review of the factors that affected the Company's financial and operating performance for the year ended April 30, 2025.

The discussion should be read in conjunction with the audited consolidated financial statements for the year ended April 30, 2025, including the notes thereto. The Company's audited consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Unless otherwise stated, all amounts discussed herein are denominated in Canadian dollars which is the Company's functional and reporting currency.

Additional information relating to the Company is available on the SEDAR website at www.sedar.com.

Going Concern

The audited consolidated financial statements of the Company for the year ended April 30, 2025 have been prepared in accordance with International Financial Reporting Standards on the basis applicable to a going concern. The appropriateness of using the going concern basis is dependent upon, among other things, future profitable operations, and the ability of the Company to raise additional capital. Specifically, the recovery of the Company's investment in mineral properties and exploration expenditures is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to develop its properties and establish future profitable production from the properties, or from the proceeds of their disposition.

The Company is a development stage Company and has not earned any significant revenue to date. The Company has not yet determined whether its resource properties contain ore reserves that are economically recoverable.

Overview of the Company

The Company is engaged in the acquisition, exploration and if warranted, development of mining properties in Canada. The Company currently holds interests in resource properties, located in Ontario and Newfoundland & Labrador, Canada, and intends to seek out and acquire additional properties, worthy of exploration and development, as finances permit. The exploration and development of the properties is accomplished either through direct expenditure by the Company or joint venturing of the property to another company (see Note 1 in the Notes

to the Consolidated Financial Statements). The Company's common shares are listed on the TSX Venture Exchange under the trading symbol "TGOL".

Impact of COVID-19

The Company continually monitors guidance from Health Canada as well as provincial and local health authorities to mitigate the effects of COVID-19 at all its exploration sites and corporate office location.

Other than the macro-economic impact of inflationary pressure and supply chain challenges, operating activities at the Company's projects are continuing with no significant interruptions to date from COVID-19. The extent to which COVID-19 will impact the Company's operations in the future remains highly uncertain and cannot be accurately estimated at the present time.

Impact of Tariffs and Trade Tensions on Mineral Exploration

Ongoing global trade tensions and the imposition of tariffs, particularly between major economies, continue to pose risks to Canadian mineral exploration companies. These measures may lead to increased costs for imported equipment and materials, disrupt supply chains, and create uncertainty in commodity markets. Additionally, retaliatory trade actions may impact demand for Canadian exports, influencing investor sentiment and access to international capital. The Company remains vigilant in monitoring these developments and adjusting its strategic planning accordingly.

Financial and Operational Performance

Financial Condition

The Company's combined cash and restricted cash balance as at April 30, 2025 was \$1,107,924 compared to \$516,736 as at April 30, 2024, an increase related to two private placements for gross proceeds of \$2.25 million completed during the current year, net of general and administrative expenses and exploration and evaluation expenditures at the Company's Tower Mountain gold project.

Current assets of the Company as at April 30, 2025 were \$1,300,498 compared to \$940,442 as at April 30, 2024, an increase related to the above mentioned private placement net of general and administrative expenses and exploration and evaluation expenditures incurred during the current year.

Total assets as at April 30, 2025 were \$8,911,514 compared to \$7,609,218 as at April 30, 2024, an increase related to the abovementioned factors.

Current liabilities as at April 30, 2025 were \$36,080 compared to \$47,827 at April 30, 2024 a change related to the timing of trade payables on hand at April 30, 2025.

Shareholders' equity increased to \$8,875,434 from \$7,561,391 during the year ended April 30, 2025 as a result of the private placement completed during the current year net of the net loss and comprehensive loss incurred for the year ended April 30, 2025.

Results of Operations

Total operating costs and expenses for year ended April 30, 2025 were \$1,172,584 (April 30, 2024 – \$600,762), a change due largely to share-based payments expense recorded in the current year, a non-cash expense item, as well as an increase in consulting and legal fees in the current versus prior year.

Expenses incurred during the year ended April 30, 2025 and 2024 consist of:

	April 30, 2025 \$	April 30, 2024 \$
Advertising and promotion	67,015	78,937
Bank charges and interest	4,710	4,521
Consulting	290,600	76,541
Depreciation	14,926	13,075
Insurance	20,298	14,040
Legal and accounting	155,859	137,079
Share-based payments	393,749	65,720
Salaries and benefits	135,023	145,286
Office and miscellaneous	29,360	27,977
Trust and filing fees	61,044	34,454
Part XII.6 tax	-	3,132

The cumulative deficit from inception of the Company is \$5,301,758 (April 30, 2024 - \$4,149,363).

Cash Flows

Cash of \$881,130 was used in operating activities during the year ended April 30, 2025 (April 30, 2024 - \$692,596), a change due largely to increases in cash operating expenses for consultants, legal and accounting and trust and filing fees during the current year, much of which was associated with the Company's capital raising initiatives.

Cash of \$600,371 was used in investing activities (April 30, 2024 - \$328,413) during the year ended April 30, 2025, an increase related to the increased expenditure at Tower Mountain in the current versus prior year. This increase was offset by an increase in cash proceeds on the sale of marketable securities in the current versus prior year.

Cash from financing activities was \$2,072,689 during the year ended April 30, 2025 (April 30, 2024 – nil) related to two non-brokered private placements completed in the current year versus no capital raising activity in fiscal 2025.

Summary of Quarterly Results

The Company had a net loss and comprehensive loss of \$289,318 for the period ended October 31, 2024 (October 31, 2023 - \$413,319 (net loss and comprehensive loss)). The following table contains the results from the eight most recently completed quarters:

	Fourth Quarter Ended April 30, 2025 \$	Third Quarter Ended January 31, 2025 \$	Second Quarter Ended October 31, 2024 \$	First Quarter Ended July 31, 2024 \$	Fourth Quarter Ended April 30, 2024 \$	Third Quarter Ended January 31, 2024 \$	Second Quarter Ended October 31, 2023 \$	First Quarter Ended July 31, 2023 \$
Expenses	266,228	523,035	304,608	78,713	203,183	130,253	93,963	173,363
Net income (loss) for the period	(260,903)	(602,174)	(319,746)	30,428	(192,101)	(85,329)	(180,417)	(232,902)
Comprehensive income (loss) for the period	(260,903)	(602,174)	(319,746)	30,428	(192,101)	(85,329)	(180,417)	(232,902)
Income (loss) Per Share	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

As the Company is still in the exploration stage, variances in its quarterly losses are not affected by sales or production-related factors. Year over year expense variances are generally attributed to successful financing activities, or the lack thereof, which result in the Company being able to conduct more (or less) exploration, which results in additional (or fewer) overhead expenditures.

Selected Annual Financial Information

All currency amounts are stated in Canadian dollars.

The following table summarizes selected financial data for the Company for each of the three most recently completed financial years. The information set forth below should be read in conjunction with the consolidated audited financial statements, prepared in accordance with International Financial Reporting Standards and related notes.

Year Ended April 30,	2025 \$	2024 \$	2023 \$ (As Restated)
Gain/(loss) on disposition of exploration and evaluation assets	102,951	65,000	251,167
Net loss and comprehensive loss for the year	(1,152,395)	(690,749)	(463,044)
Loss per share – basic and diluted	-	-	-
Total assets	8,911,514	7,609,218	8,417,616
Long-term liabilities	Nil	Nil	Nil
Dividends	Nil	Nil	Nil

Liquidity and Capital Resources

As of April 30, 2025, the Company had \$1,077,924 in unrestricted cash (April 30, 2024 - \$501,736) and \$15,000 in cash restricted as credit card collateral (April 30, 2024 - \$15,000). Amounts receivable were \$66,489 (exclusively unclaimed HST ITCs) (April 30, 2024 - \$14,478). Marketable securities were \$111,001 (April 30, 2024 - \$326,654).

Accounts payable and accrued liabilities were \$107,310 at January 31, 2025 (April 30, 2024 - \$47,827) includes accruals for expenditures on mineral properties, legal and audit fees, consultants and other amounts. These were incurred in the normal course of business. The Company settled its remaining income tax liability in the amount of \$23,843 payable to the Namibian Revenue Agency pursuant to the income tax liability associated with the sale of the Company's common shares of Aloe 237 to Noronex and therefore owed nil at the end of the period (April 30, 2024 – \$23,843).

Working capital inclusive of restricted cash at April 30, 2025 is \$1,264,418 (April 30, 2024 - \$942,615), an increase related to the private placements completed in the current year.

At this time, the Company does not own or operate any revenue producing mineral properties, and accordingly, does not have cash flow from operations. The Company raises funds for exploration, development and general overhead and other expenses through the issuance of shares from treasury. This method has been the principal source of funding for the Company since inception.

The Company also funds exploration at certain of its other properties through option agreements with other companies who have agreed to fund exploration in exchange for the right to earn an interest in the properties.

In addition to the funds in the Company's treasury, the Company intends to continue raising funds for future exploration and general overhead and other working capital through the continuation of issuances of shares from treasury and through earn-in or option agreements with other mineral exploration and mining companies.

The Company funds its project expenditures by raising equity financing. If future private placement financing cannot be completed, the Company would have to review its budgeted project expenditures and revise where

necessary including reviewing property option agreements to determine if continuation in such agreements on their anniversary dates is feasible. Management continues to seek out capital required to undertake its exploration work commitments and for working capital to meet project work commitments.

Tower Mountain Gold Project, Ontario

The Tower Mountain Property totals 2,149 hectares (“ha”). The Company owns clear mineral title to:

- 189 single cell and 24 boundary mining claims (1,889 ha.).
- 3 optioned patented claims (158 ha.) and
- 2 owned patented claims (102 ha.).

All claims and optioned patents are in good standing. There are no remaining option payments on any of the claims and/or patents comprising the property.

Location and Access

Tower Mountain is centered at approximately 48° 31’ 08’’ N Latitude; 89° 42’ 06’’ W Longitude (UTM Coordinates 300500 mE; 5377500 mN, Zone 16N NAD83 Datum), approximately 50 km west-northwest of Thunder Bay, Ontario just south of the Trans-Canada highway. It offers year-round road highway access and excellent local infrastructure.

Regional and Local Geology

Tower Mountain is located in the Archean Superior Province, Wawa Subprovince, consisting of slivers and belts of komatiites, basalts, dacites and rhyolites and associated metasedimentary rocks intruded by numerous granitoid plutonic rocks. The property lies within the Shebandowan Greenstone Belt, a late Neoarchean intercratonic basin assemblage that consists of potassium rich shoshonitic volcano-plutonic rocks interlayered with calc-alkalic rocks with abundant, massive, unsorted volcanic hematized breccias and polymictic conglomerates, arkose, mudstones and iron formation.

The northeastern portion of the property is dominated by the Tower Mountain Intrusive Complex (“TMIC”) a multi-phase alkalic intrusion measuring approximately 2,200 metres by 1,200 metres. The TMIC intrudes alkaline volcanic rocks consisting largely of latite-andesite flows and tuffs. Both the volcanics and intrusives demonstrate varying degrees of alteration (REFERENCE FIGURE 1.0), including ankeritization (Fe-carbonate), hematization (oxidizing fluids), sericitization, and potassic alteration (hydrothermal fluids).

Mineralization

Twenty-four (24) gold occurrences have been identified to-date (REFERENCE FIGURE 1), within and adjacent to the TMIC, suggesting at least one phase of the TMIC was enriched in gold. The majority of the known occurrences to-date lie within a 500-metre halo surrounding the TMIC. Historical drilling has established long, consistent intervals of anomalous gold grades averaging approximately 1.0 g/t Au over several tens of metres and up to several hundreds of metres in numerous holes. Drilling has traced this low-grade gold mineralization along an 1,800 metre strike length, parallel to the western contact of the TMIC (REFERENCE FIGURE 1). The mineralized zone averages 300 metres in width and extends over 500 metres from surface. Gold mineralization outcrops at surface and approximately 25% of the drill holes terminate in mineralization. Mineralization occurs in all observed lithologies and alteration observed to date and grade is consistent within all observed lithologies and alteration.

Gold mineralization is localized within brecciated and altered alkalic volcanic rocks surrounding the TMIC and is associated with variable sericite-pyrite alteration with brecciated alkaline volcanic rocks. Higher grade gold mineralization appears localized within and proximal to syenite-monzonite dikes and sills, the orientation and frequency of which is currently being evaluated. Pyrite content appears to be a key indicator of increased gold

grades and Induced Polarization has been proven to be an effective vector for exploration success, particularly at the Bench target.

Exploration Summary

The Company believes that the gold mineralization at Tower Mountain may represent the upper expression of an Intrusion Related Gold Deposit (“IRGD”). IRGD-type deposits offer increased opportunity for Tier One gold discoveries, typically offering deposits of greater than 250M tonnes, averaging between 0.75 to 1.25 g/t Au and containing greater than 5.0M oz of gold. The Company advises that this represents the conceptual exploration target it is seeking to establish at Tower Mountain through systematic exploration.

Figure 1. Tower Mountain Gold Project with known gold occurrences

History

Anomalous gold mineralization was discovered on the property in 1984 by local prospector M. Stewart. Noranda (1985-88) conducted geological mapping, sampling and geophysical surveys and completed 38 holes (2,881 metres) of drilling, identifying nineteen (19) gold occurrences. Inco (1988-90) completed trenching and drilled 22 holes (2,594 metres). Glamis Gold (1994-95) optioned the property completing surface prospecting and Avalon Ventures (1996-98) completed four (4) holes (1,318 metres).

ValGold Resources (2002-11) completed trenching and drilled 104 holes (23,132 metres) largely focused on the U & V (“UV”) targets located to the west of the TMIC.

The Company optioned the property in 2020 and initiated surface stripping and channel sampling, prospecting geophysical surveys (Induced Polarization – DASVision™ and diamond drilling. To date, the Company has completed eighty-two (82) diamond drill holes totalling 16,106 metres.

The current database for the property includes:

- 212 diamond drill holes totalling 43,134 metres.
- 28,812 gold assays from drill hole core.
- 8,437 multi-element ICP assays from drill core.
- 947 surface grab rock samples.
- 58 surface channel samples.
- 976 soil geochemical samples assayed for gold.
- 566 line-kilometres of airborne magnetic survey and
- 897 ha Induced Polarization 3D-DASVision™ geophysical survey.

Caracle Creek International Consulting (“Caracle”) estimated a mineral resource for the U-V Zone in February 2006 for ValGold Resources Ltd. The procedures and methodology used are summarized in the Technical Report titled, *“Independent Mineral Resource Estimation Tower Mountain Gold Deposit”* Caracle estimated an inferred mineral resource for the UV zone as summarized in Table 1.

Table 1. Inferred Mineral Resource Estimate at 0.3 g/t Au cut-off, Caracle Creek (2006). Classification	Tonnes	Au (g/t)	Au grams	Au ounces
Inferred	7,154,611	0.66	4,697,030	151,013

This 2006 historical estimate was prepared using categories and definitions consistent with the Canadian Institute of Mining Metallurgy and Petroleum’s (“CIM”) Estimation of Mineral Resources & Mineral Reserves Best Practice Guidelines, at the time of completion of the resource estimate, as outlined in NI 43-101, Standards of Disclosure for Mineral Projects. The estimate is constrained to the U-V target area and incorporates 33% (67 holes – 16,618 metres) of the current database for the property, specifically, holes TM02-01 through TM05-50. The Company considers the estimate to be an historical estimate. Investors are cautioned that the historical estimates do not mean or imply that economic deposits exist on the Property.

The Company’s objective is to establish the potential for Tower Mountain to host a large tonnage, low-grade gold deposit. The Company believes Tower Mountain offers a conceptual exploration target of 250 to 500M tonnes averaging 0.75 to 1.0 g/t Au. The conceptual exploration target is consistent with large tonnage, low grade gold mines that are currently operating or are being developed elsewhere in Ontario.

In fiscal 2024, the Company initiated a small diamond drilling program testing a strong Induced Polarization chargeable anomaly parallel to the western contact of the TMIC. Drill hole coverage along this chargeable target was widely scattered. A total of twelve (12) holes were completed, spaced on 100 metre sections. Ten (10) of the twelve (12) holes intersected anomalous gold mineralization associated with finely disseminated pyrite mineralization. Hole TM23-137 reported the highest gold grade ever recorded at Tower Mountain, assaying 963.0 g/t Au over a 1.5 metre interval within a broader interval that averaging 34.75 g/t Au over a 42.4 metre interval.

Table 2 – Selected Drill Core Assay Results, Tower Mountain

Thunder Gold - Results 2021-2023					Thunder Gold - Results 2002-2011

**All From-To lengths are stated in metres*

Note: drill hole intervals are not representative of true widths.

Fiscal 2025 Exploration Overview

On September 2024, the Company announced it was resuming active exploration at Tower Mountain. A soil geochemical survey evaluating the northern portion of the claims was initiated with the objective of evaluating the northern, eastern and southern TMIC contacts as well as the TMIC intrusion in the hopes of isolating previously unrecognized targets for follow up exploration. The Company also announced plans to strip and samples the P-Zone area to identify the source of multiple, highly anomalous, gold in rock results (collected by others). The P-Zone occurs in intrusive rocks of the TMIC and gold grades are ten times (10x) higher than elsewhere within the Tower Mountain property. Initial rocks samples collected by the Company confirmed the highly anomalous nature of the P-Zone historical rock samples and the Company proceeded to clear the surrounding outcrop with the intent of collecting continuous, saw-cut, channel samples.

On November 2024, the Company announced results of a soil geochemistry survey blanketing the Tower Mountain Intrusive Complex (“TMIC”). The results demonstrate excellent correlation with known, drill tested, gold anomalies, located at the western contact of the TMIC. The survey also identified a number of gold in soil anomalies along the eastern and southern TMIC contact as well as within the TMIC. Many of these anomalies have not been drill tested.

The Company also announced results from continuous, saw-cut, channel samples, at the P-Target, on the eastern margin of the TMIC. Results are summarized below:

TRENCH ID	From (metres)	To (metres)	Interval (metres)	Au (g/t)	NAD83 16N			BEARING
					EASTING	NORTHING	ELEVATION	
TMCH24-01	0.00	24.87	24.87	4.93	302055.00	5377634.60	529.00	20
includes	8.13	24.87	16.74	7.13				
includes	8.13	20.79	12.66	9.12				
TMCH24-02	0.00	20.57	20.57	2.78	302063.00	5377635.20	527.00	20
includes	3.07	11.67	8.60	5.44				
and	17.08	19.52	2.44	2.53				
TMCH24-03	0.00	4.91	4.91	1.28	302068.00	5377631.00	526.00	20
includes	3.72	4.91	1.19	5.44				

These results are the longest intervals of sustained gold grades greater than 1.0 g/t in the history of Tower Mountain. The mineralization is confined to a highly altered monzonite unit that trends in a southeasterly direction, directly towards the center of a strong to moderate gold in soil anomaly located 500 metres to the southeast.

Based on these observations, the Company initiated a targeted diamond drill program to test the sub-surface continuity of the P-Target mineralization.

In January 2025, the Company reported the results of the P-Target diamond drilling, summarized below.

Hole ID	From (metres)	To (metres)	Interval (metres)	Au (g/t)	True Width (est. metres)	UTM NAD83 16N		Elevation (metres)	Bearing (degrees)	Dip (degrees)	Depth (metres)

The Company continues to evaluate the historical data to isolate potential visual controls on mineralization. Efforts to date indicate that gold mineralization is agnostic to rock type, alteration and observed mineralization.

Goals - Objectives 2024

- Evaluate the potential of the remaining 80% of the TMIC perimeter.
- Evaluate the potential of the property using soil geochemistry.
- Evaluate opportunities to increase the size of the mineral tenure.
- Continue de-risking the property through systematic exploration, testing and analysis.

Achievements - 2024

- Initial drilling at the P-Target confirms identical grades and interval lengths as those reported along the western intrusive contact.
- Identified multiple, untested gold-in-soil anomalies surrounding and within the TMIC intrusion all of which offer resource expansion opportunity.
- Completed additional metallurgical testing that demonstrate gold recoveries of >90% are probable.
- Reduced all-in drill cost per metre to C\$ 275.
- Allocated 66% of raised capital to exploration.

Goals-Objectives 2025

- Continue to expand the P-Target along the established plunge direction through wide spaced (100m) step-out drill sections.
- Continue to evaluate gaps in the drill coverage along the western intrusive contact, specifically at the A, Bench and UV targets significant resource addition is possible through selective drill targeting.

- Drill test at least two of the gold in soil targets identified in 2024.
- Expand the soil geochemistry coverage to 70-75% of the total property area, especially along the NE trending Thunder Lake Fault.
- Continue to evaluate opportunities to increase the mineral tenure through strategic acquisition.
- Continue to reduce exploration costs and ensure that the 66% exploration funding commitment remains unchanged

Other Properties – Joint Ventures

The Company also retains residual interests in certain other early-stage mineral property interests as detailed in Table 3 below. Readers are encouraged to visit <https://www.thundergoldcorp.com/> for more detailed information about these projects.

Table 3 – Other Properties held by Thunder Gold

Project Name	Mineral(s) Sought	Location	Status	Partner	Ownership (Retained)
PEN	Gold	Ontario	Inactive	None	100% TGOL
Startrek	Gold, Antimony	Newfoundland	Inactive	None	100% TGOL
Okohongo	Copper, Silver	Namibia	Optioned	Himba	100% subject to underlying 1% NSR and US\$1.0M Convertible Note
Far Lake	Copper, Silver	Ontario	Joint Venture	Benton Resources	(40%)
Seagull Lake	Palladium, Platinum and Nickel	Ontario	Optioned	Rift Minerals Inc.	(20%) subject to underlying NSR
Iris Lake/Vanguard	Gold, Silver, Copper and Zinc	Ontario	Optioned	Goldshore Resources Corp	(25%)

Goals-Objectives and Achievements 2024

The Company successfully secured an agreements with an arms-length party to option the 100% owned Seagull Lake (PGE ON). properties.

The Company completed the sale of their remaining interest in the Dor-Wit property in Namibia.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Contractual Obligations

The Company has commitments as described in Note 6 of the April 30, 2025 audited consolidated interim financial statements with respect to certain agreements on its mineral property interests.

During the year ended April 30, 2025, the Company engaged Altitude Capital Consultants Inc. to provide advisory services with respect to the Company's capital markets development strategy and general business advisory services.

In addition, in November 2024, the Company engaged Apaton Finance GmbH, a Hannover, Germany-based financial public relations and investor relations agency, to provide marketing and investor relation services in Europe for a term of two months for a on-time payment of EUR 10,000.

Finally, during the year ended April 30, 2025, the Company has engaged German Mining Networks GmbH ("GMN"), a Germany-based firm, to provide marketing and investor relations services in Europe. GMN has been engaged for a term of three months at a rate of \$6,800 per month with the engagement renewing for additional three-month periods provided the Company or GMN do not elect to terminate the engagement.

Related Party Transactions

Key management personnel compensation:

	April 30, 2025	April 30, 2024
	\$	\$
Salaries and benefits	248,609	185,144
Share-based payments	168,165	60,243
Consulting, property contracting services, and equipment rentals	129,192	70,000
Total key management personnel compensation	545,966	315,387

All transactions with related parties have occurred in the normal course of operations and management represents that they have occurred on a basis consistent with those involving unrelated parties, and accordingly that they are measured at fair value. Details of the balances in the table above are more fully described below.

During the year ended April 30, 2025, Wesley Hanson, President and CEO of the Company, earned \$248,609 in salary and statutory benefits (April 30, 2024 – \$185,144).

During the year ended January 31, 2025, 2803923 Ontario Inc., a company controlled by David Speck, billed the Company \$126,667 plus HST (April 30, 2024 – \$70,000) for corporate development consulting services and services related his role as CFO for the Company.

During the year ended April 30, 2025, Warren Bates, a director of the Company, billed the Company \$2,525 related to Geological consulting work performed at the Company's Tower Mountain gold project (April 30, 2024 – nil).

Subsequent Events

The following events occurred subsequent to April 30, 2025:

- The Company completed a non-brokered private placement of both flow-through and non-flow-through units for gross proceeds of \$1,600,000. Pursuant to the private placement, the Company issued 12,857,143 flow-through units at a price of \$0.07 per unit, each flow-through unit consisting of one common share and one-half of one warrant, each whole warrant entitling the holder to acquire a common share of the Company at a price of \$0.10 for a period of 18 months from the date of issuance, subject to an accelerated expiry date at the option of the Company in the event the 20 day volume-weighted average price of the common shares of the Company trade on the TSX-V for any 20 consecutive trading days is \$0.20 or more. Additionally the Company issued 11,666,667 non-flow-through units at a price of \$0.06 per non-flow-through unit, with each non-flow-through unit consisting of one common share and one warrant, each

warrant entitling the holder to acquire a common share of the Company at a price of \$0.10 for a period of 18 months from the date of issuance, subject to the same acceleration clause detailed above.

In connection with the closing of the private placement, the Company paid finder's fees of approximately \$91,750 and issued an aggregate of 1,410,727 finder warrants (the "Finder Warrants") to eligible finders. Each Finder Warrant entitles the holder to purchase one non-flow-through unit at a price of \$0.06 for a period of 18 months from the completion of the private placement.

- The Company entered into an investor relations agreement with Alliance Advisors Investors Relations ("Alliance"). The engagement is for an initial period of three months for a total fee of \$22,500 for investor relations and communications services. The services include developing and managing PR/media, social media and stakeholder relations. The term of the agreement is for a period of three months ending November 15, 2025. Alliance will maintain an arm's length relationship with the Company and no securities will be issued as compensation. The agreement is pending acceptance by the TSXV.

Current and Future Changes in Accounting Policy Including Initial Adoption of International Financial Reporting Standards ("IFRS")

Statement of Compliance

The condensed consolidated interim financial statements, including comparatives for the year ended April 30, 2025, have been prepared using accounting policies in compliance with IFRS as issued by the International Accounting Standards Board ("IASB").

New standards, amendments and interpretations to existing standards not adopted by the Company

There are currently no new standards issued but not yet effective that are expected to have a material impact on the Company.

Risk Management

The Company's financial instruments are comprised of cash and cash equivalents, receivables, investments and accounts payable and accrued liabilities.

The Company's financial instruments are exposed to certain risks, including credit risk, liquidity risk, interest rate risk and market risk.

Credit risk

Counterparty credit risk is the risk that the financial benefits of contracts with a specific counterparty will be lost if a counterparty defaults on its obligations under the contract. This includes any cash amounts owed to the Company by those counterparties, less any amounts owed to the counterparty by the Company where a legal right of offset exists and also includes the fair values of contracts with individual counterparties which are recorded in the consolidated financial statements.

i. Trade credit risk

The Company is in the exploration stage and has not yet commenced commercial production or sales. Therefore, the Company is not exposed to significant credit risk and overall the Company's credit risk has not changed significantly from the prior year.

ii. Cash and cash equivalents

In order to manage credit and liquidity risk the Company's cash and short-term investments are held through large Canadian Financial Institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure. The Company monitors and reviews current and future cash requirements and matches the maturity profile of financial assets and liabilities.

Accounts payable and accrued liabilities are due within the current operating year.

Interest Rate Risk

The Company's interest revenue earned on cash and or short-term investments is exposed to interest rate risk. The Company does not enter into derivative contracts to manage this risk. The Company's exposure to interest rate risk is very low as the Company's short-term investments are either fully liquid or bear short, staggered maturity dates to mitigate the risk of fluctuating interest rates.

The Company limits its exposure to interest rate risk as it invests only in short-term investments at major Canadian Financial Institutions.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices and is comprised of currency risk, interest rate risk, and other price risk. The Company currently does not have any financial instruments that would be impacted by changes in market prices.

Other MD&A Requirements

Additional Disclosure for Venture Issuers without Significant Revenues:

As of April 30, 2025, the Company has incurred and capitalized \$7,529,712 (April 30, 2024 - \$6,623,802) as exploration and evaluation assets since inception of the Company, net of write-downs, recoveries and dispositions.

Outstanding Share Data

At the date of this management's discussion and analysis, there are 251,991,294 common shares outstanding as well as: (a) stock options to purchase an aggregate of 19,875,000 common shares expiring between October 1, 2025 and August 9, 2029 and exercisable between \$0.05 and \$0.15 per share; and (b) share purchase warrants to purchase an aggregate of 64,952,624 common shares expiring between July 24, 2026 and September 6, 2027, exercisable at \$0.06 to \$0.10. For additional details of share data, please refer to Note 9 of the April 30, 2025 audited consolidated financial statements.

The Company is authorized to issue an unlimited number of voting shares and an unlimited number of preferred shares issuable in series.

On June 8, 2023, the Company issued 300,000 shares valued at \$0.04 pursuant to the third and final anniversary option payment related to the Tower Mountain project.

On June 19, 2023, the Company issued 4,000,000 shares valued at \$0.04 to Metalla Royalty and Streaming Ltd. for the purchase of 49 mineral claims encompassing 565 hectares contiguous to the Tower Mountain property.

On January 16, 2024, the Company issued 500,000 shares valued at \$0.03 pursuant to the third and final anniversary option payment related to the Anderson Patent.

On March 6, 2024 the Company issued 900,000 shares valued at \$0.03 pursuant to the third and final anniversary option payment related to the Nichols Patent.

On August 30, 2024, the Company issued 22,116,666 shares valued at \$0.03 pursuant to a first tranche closing of a non-brokered private placement of units, each unit consisting of one common share and one share purchase warrant, each warrant entitling the holder thereof to purchase an additional common share of the Company at a price of \$0.10 until August 30, 2027. In conjunction with the closing of the first tranche of the private placement, the Company paid net cash commissions of \$19,650 and issued 655,000 finders' warrants exercisable at a price of \$0.10 until August 30, 2027.

On September 6, 2024, the Company issued 11,216,667 shares valued at \$0.03 pursuant to the second and final tranche closing of a non-brokered private placement of units, each unit consisting of one common share and one share purchase warrant, each warrant entitling the holder thereof to purchase an additional common share of the Company at a price of \$0.10 until September 6, 2027.

On January 24, 2025, the Company issued 20,833,333 shares valued at \$0.06 pursuant to closing of a non-brokered private placement of units, each unit consisting of one common share and one-half of one share purchase warrant, each warrant entitling the holder thereof to purchase an additional common share of the Company at a price of \$0.10 until July 24, 2026.

Dividend Policy

No dividends have been paid on any shares of the Company since the date of incorporation, and it is not contemplated that any dividends will be paid in the immediate or foreseeable future.

Legal Proceedings

To the knowledge of the Company, there are no actual or pending legal proceedings to which the Company is or is likely to be a party or of which any of its assets are likely to be subject.

Indebtedness of Directors, Officers, Promoters and Others

No director, officer, or promoter or other member of management of the Company, or any Associate or Affiliate of any such person, is or has been indebted to the Company.

Conflicts of Interest

There are potential conflicts of interest to which the directors and officers of the Company will be subject in connection with the operations of the Company. Some of the directors and officers have been and will continue to be engaged in the identification and evaluation, with a view to potential acquisition of interests in businesses and corporations on their own behalf and on behalf of other corporations, and situation may arise where the directors and officers will be in direct competition with the Company. Conflicts, if any, will be subject to the procedures and remedies under the British Columbia Business Corporations Act.

Risk Factors

Mining Industry

The exploration for and development of mineral deposits involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of an ore body may result in substantial rewards, few properties which are explored are ultimately developed into producing mines. Major expenses may be required to establish ore reserves, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the current exploration programs planned by the Applicant will result in a profitable commercial mining operation.

Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are the particular attributes of the deposit, such as size, grade and proximity to infrastructure, as well as metal prices which are highly cyclical and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Applicant not receiving an adequate return on invested capital.

Mining operations generally involve a high degree of risk. The Applicant's operations are subject to all the hazards and risks normally encountered in the exploration, development and production of ore, including unusual and unexpected geology formations, rock bursts, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although adequate precautions to minimize risk will be taken, milling operations are subject to hazards such as equipment failure or failure of retaining dams around tailings disposal areas, which may result in environmental pollution and consequent liability.

The Applicant's mineral exploration activities are directed towards the search, evaluation and development of mineral deposits. There is no certainty that the expenditures to be made by the Applicant as described herein will result in discoveries of commercial quantities of ore. There is aggressive competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Applicant will compete with other interests, many of which have greater financial resources than it will have for the opportunity to participate in promising projects. Significant capital investment is required to achieve commercial production from successful exploration efforts.

Government Regulation

The exploration activities of the Applicant are subject to various federal, provincial and local laws governing prospecting, development, production, taxes, labour standards and occupational health, mine safety, toxic substance and other matters. Exploration activities are also subject to various federal, provincial and local laws and regulations relating to the protection of the environment. These laws mandate, among other things, the maintenance of air and water quality standards, and land reclamation. These laws also set forth limitations on the generation, transportation, storage and disposal of solid and hazardous waste. Although the Applicant's exploration activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing operations and activities of exploration, mining and milling or more stringent implementation thereof could have a substantial adverse impact on the Applicant.

Permits and Licenses

The exploitation and development of mineral properties may require the Applicant to obtain regulatory or other permits and licenses from various governmental licensing bodies. There can be no assurance that the Applicant will be able to obtain all necessary permits and licenses that may be required to carry out exploration, development and mining operations on its properties.

Environmental Risks and Hazards

All phases of the Applicant's mineral exploration operations are subject to environmental regulation in the various jurisdictions in which it operates. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Applicant's operations. Environmental hazards may exist on the properties on which the Applicant holds interests which are unknown to the Applicant at present, which have been caused, by previous or existing owners or operators of the properties. The Applicant may become liable for such environmental hazards

caused by previous owners and operators of the properties even where it has attempted to contractually limit its liability.

Government approvals and permits are currently, and may in the future be, required in connection with the Applicant's operations. To the extent such approvals are required and not obtained; the Applicant may be curtailed or prohibited from proceeding with planned exploration or development of mineral properties.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Applicant and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Production of mineral properties may involve the use of dangerous and hazardous substances such as sodium cyanide. While all steps will be taken to prevent discharges of pollutants into the ground water the environment, the Applicant may become subject to liability for hazards that cannot be insured against.

Commodity Prices

The profitability of mining operations is significantly affected by changes in the market price of gold and other minerals. The level of interest rates, the rate of inflation, world supply of these minerals and stability of exchange rates can all cause significant fluctuations in base metal prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems and political developments. The price of gold and other minerals has fluctuated widely in recent years, and future serious price declines could cause continued commercial production to be impracticable. Depending on the price of gold and other minerals, cash flow from mining operations may not be sufficient. Any figures for reserves presented by the Applicant will be estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Market fluctuations and the price of gold and other minerals may render reserves uneconomical. Moreover, short-term operating factors relating to the reserves, such as the need for orderly development of the ore bodies or the processing of new or different grades of ore, may cause a mining operation to be unprofitable in any particular accounting period.

Uninsured Risks

The Applicant carries insurance to protect against certain risks in such amounts as it considers adequate. Risks not insured against include environmental pollution or other hazards against which such corporations cannot insure or against which they may elect not to insure.

Conflicts of Interest

Certain of the directors of the Applicant also serve as directors and/or officers of other companies involved in natural resource exploration and development. Consequently, there exists the possibility for such directors to be in a position of conflict. Any decision made by such directors involving the Applicant will be made in accordance with their duties and obligations to deal fairly and in good faith with the Applicant and such other companies. In addition, such directors will declare, and refrain from voting on, any matter in which such directors may have a conflict of interest.

Land Title

Although the Applicant has obtained title opinions with respect to certain of its properties, there may still be undetected title defects affecting such properties. Accordingly, such properties may be subject to prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects which could have a material adverse impact on the Applicant's operations.

Aboriginal Land Claims

No assurance can be given that aboriginal land claims will not be asserted in the future in which event the Company's operations and title to its properties may potentially be seriously adversely affected.

Political and other risks

The Company's DorWit and Okohongo properties located in Namibia expose the Company to different considerations and other risks not typically associated with companies in Canada. Such risks are associated with the political, economic and legal environments. The Company's results may be adversely affected by changes in the political and social conditions in Namibia and by changes in government policies with respect to laws and regulations.

Auditors, Transfer Agents and Investor Relations

The auditor of the Company is Kreston GTA LLP of Markham, Ontario.

The Transfer Agent and Registrar for the Common Shares of the Company is Computershare of Vancouver, British Columbia.

Investor relations duties are carried out by directors, officers, and employees of the Company.

Commitments and Contingencies

Except as otherwise discussed, the Company is in compliance with commitments required by contractual obligations in the normal course of business.

Forward Looking Statements

This management discussion and analysis contains certain forward-looking statements relating but not limited to the Company's expectations, intentions, plans and beliefs. Forward-looking information can often be identified by forward-looking words such as "anticipate", "believe", "expect", "goal", "plan", "intend", "estimate", "may", and "will" or similar words suggesting future outcomes, or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance. Forward-looking information may include reserve and resource estimates, estimates of future production, unit costs, costs of capital projects and timing of commencement of operations, and is based on current expectations that involve a number of business risks and uncertainties. Factors that could cause actual results to differ materially from any forward-looking statement include, but are not limited to, failure to establish estimated resources and reserves, the grade and recovery of ore which is mined varying from estimates, capital and operating costs varying significantly from estimates, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects and other factors. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from expected results.

Potential shareholders and prospective investors should be aware that these statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those suggested by the forward-looking statements. Shareholders are cautioned not to place undue reliance on forward-looking information. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific that contributes to the possibility that the predictions, forecasts, projections,

and various future events will not occur. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking information whether as a result of new information, future events or other such factors which affect this information, except as required by law.
