

BeWhere Partners with GISCAD to Deliver Advanced Asset Tracking Solutions to Caribbean Markets

Toronto, Ontario--(Newsfile Corp. - March 10, 2025) - [BeWhere](#) (TSXV: BEW) (OTCQB: BEWFF) ("**BeWhere**" or the "**Company**"), a leading Mobile Internet of Things (M-IoT) company, and **GISCAD Barbados Limited**, part of the GISCAD Group of Companies, with Head Offices in Trinidad & Tobago, and regional offices in Barbados, Jamaica and Guyana. GISCAD offers geospatial project management, Autodesk & Salesforce software sales, and is a Geotab reseller announces a partnership to address the growing market opportunity for reliable, feature rich, low-cost asset tracking. The arrangement will leverage BeWhere's new LTE Cat1 Bis based BeSol+ and BeWired+ devices and GISCAD's regional client footprint across 29 territories in the Caribbean and Latin America.

This partnership introduces BeWhere's newly developed LTE Cat1 Bis-based BeSol+ and BeWired+ devices to markets where Low-Power 5G networks are not yet available, filling a critical gap in regional asset tracking capabilities while leveraging GISCAD's comprehensive geospatial data sets.

"The Caribbean represents a significant growth opportunity for low-cost asset tracking solutions," said Craig Batstone, Managing Director of GISCAD Barbados Limited. "Many businesses across the region face challenges in efficiently tracking and managing their assets due to network limitations. Our relationships with key regional companies have already generated substantial interest in this technology, as it addresses their specific needs for reliable tracking without requiring infrastructure upgrades."

Brian Boychuk, Senior VP Sales and Marketing for BeWhere, added: "Craig and his team have been asking for a solution from BeWhere that works effectively in the countries that GISCAD services. By modifying our products to meet market demands in locations where low-power 5G is not yet available, we've demonstrated our ability to quickly adapt to what our partners and customers need. This responsiveness is a key part of our company's commitment to innovation."

The new generation Cat-1 bis products are specifically designed for regions like the Caribbean where Low Power 5G coverage is limited, while maintaining BeWhere's signature combination of advanced features and competitive pricing. These devices deliver reliable connectivity, extended battery life, and comprehensive tracking capabilities using existing network infrastructure.

"LTE Cat 1bis technology represents an evolution optimized for IoT and M2M applications," explained Alban Hoxha, CTO for BeWhere. "What makes this technology particularly valuable for Caribbean businesses is its ability to operate efficiently on existing LTE networks, providing broad coverage and roaming capabilities without requiring new infrastructure investments. For customers, this means immediate deployment, longer battery life, and a cost-effective solution for their asset tracking needs."

The partnership will initially focus on shipping, logistics, and high-value asset tracking applications across the Caribbean region, with expansion plans for additional markets in late 2025.

About BeWhere

[BeWhere](#) (TSXV: BEW) (OTCQB: BEWFF) specializes in low-power 5G IoT wide-area tracking technology, creating remote monitoring solutions that address cost, power, and environmental challenges. In just 6 years, the company has experienced rapid growth, collaborating with Fortune 500 companies, top resellers and installers to deploy hundreds of thousands of trackers across numerous sectors, including transportation, construction, logistics, utilities, health, and government.

BeWhere's tracking solutions are designed to be both cost-effective and simple to implement, significantly expanding the scope of assets that can be connected. These connected devices generate

data that powers intelligent AI management platforms. By increasing the number of connected devices, BeWhere enhances the capabilities and growth potential of AI solutions.
