The Company's most recently filed interim financial report included a going concern note. This Offering is not anticipated to address any uncertainties that affect the decision on whether a going concern is included in our next annual financial statements. There has been a significant decline in the Company’s working capital since December 31, 2024 as a result of increased investment in the Company’s operations and expenditures related to general working capital needs.

The above noted allocation of capital and anticipated timing represents the Company’s current intentions based upon its present plans and business condition, which could change in the future as its plans and business conditions evolve. Although the Company intends to expand the proceeds from the Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company’s ability to execute on its business plan. Such uses will not include a significant acquisition, a restructuring transaction, or any transaction requiring approval of the Company’s security holders. See the “Cautionary Statement Regarding Forward-Looking Information” section above.
