MedMira Inc.

Notes to the Consolidated Financial Statements

For the nine months ended April 30, 2021 and April 30, 2020

In Canadian dollars

1. Reporting entity

Nature of operations

MedMira Inc. (“MedMira” or “the Company”) is a biotechnology company headquartered in Canada. The address of the Company’s registered office is 155 Chain Lake Drive, Suite 1, Halifax, Nova Scotia, B3S 1B3. MedMira Holding AG owns the majority of MedMira’s shares and is the controlling shareholder. MedMira, through its subsidiaries, is engaged in the business of research, development and manufacturing of rapid diagnostics and technologies. The Company invests in research in order to maintain and expand its position in the global diagnostics market. MedMira’s research is focused on specific areas of the broader diagnostics market, namely the rapid, point-of-care, and *in vitro* sectors.

2. Basis of preparation

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

The consolidated financial statements were authorized for issue by the Board of Directors on June 29, 2021.

b. Going-concern

The accompanying consolidated financial statements have been prepared on the basis of IFRS applicable to a going-concern, which contemplates the realization of assets and liquidation of liabilities during the normal course of operations. However, certain adverse conditions and events cast significant doubt upon the validity of this assumption.

The Company has incurred losses and negative cash flows from operations on a cumulative basis since inception. For the nine months ended April 30, 2021, the Company realized a net loss of \$0.04 million (April 30, 2020 – a net loss of \$1.8 million), consisting of a net income from operations of \$0.5 million (April 30, 2020 – net loss of \$1.3 million), and other non-operating losses of \$0.5 million (April 30, 2020 - \$0.5 million). Negative cash inflows from operations were \$0.08 million (April 30, 2020 – \$0.4 million). As at April 30, 2021, the Company had an accumulated deficit of \$92.8 million (July 31, 2020 - \$92.8million) and a negative working capital position of \$15.7 million (July 31, 2020 - \$14.9 million). In addition, as at April 30, 2021, \$9.1 million of debt was in default. The Company currently has insufficient cash to fund its operations for the next 12 months. In addition to its ongoing working capital requirements, the Company must secure sufficient funding for its research and development programs for existing commitments, including its current portion of debt of approximately \$9.1 million. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern.

The Company’s objectives in managing capital are to ensure it can meet its ongoing working capital requirements. The Company must secure sufficient capital to support its capital requirements for research and development programs, existing commitments, including its current portion of debt of approximately \$9.1 million, as well as growth opportunities.

Management dedicates significant time to pursuing investment alternatives that will fund the Company’s operations and growth opportunities so it can continue as a going concern. Debt arrangements were also ongoing with the Company’s major shareholder and other debt holders. Subsequent to the close of the first quarter of fiscal year 2021,

the Company, has generated additional revenues from product sales, product development and license fees, which support the Company's on-going operating costs and provide funding for its product development activities. Management continues to work closely with its main investor to support any additional cash requirements if needed, nevertheless there is no assurance that this initiative would be successful.

The Company is subject to risks associated with early stage companies, including but not limited to, dependence on key individuals, competition from substitute services and larger companies, and the requirement for the continued successful development and marketing of its products and services. The Company's ability to continue as a going-concern is dependent upon its ability to generate positive cash flow from operations and secure additional financing and the continued support of its lenders and shareholders. These financial statements do not reflect the adjustments to carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going-concern assumption not appropriate. These adjustments could be material.

c. Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Company. Control is achieved when the Company has the power over the investee, is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns. The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there changes to one or more of the three elements of control listed above. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Intra-company balances and transactions, and any unrealized income and expenses arising from intra-company transactions, are eliminated in preparing the consolidated financial statements.

3. Revenue

The Company derives approximately 98% (April 30, 2021 – 86%) of its revenue from five (April 30, 2020 – three) main customers and, for these customers, assesses the recoverability¹ of each account on a regular basis. During the three months ended April 30, 2021, customer 1 accounted for 67% of the Company's revenue, customer 2 accounted for 11% of the revenue, customer 3 accounted for 10%, customer 4 account for 5% and customer 5 account for 5%.

9. Capital management and financial risks

a. Capital management

The Company's objectives in managing capital are to ensure sufficient liquidity to support the capital requirements of its various businesses, including growth opportunities. The Company manages its capital structure and makes adjustments in light of general economic conditions, the risk characteristics of the underlying assets and the Company's working capital requirements. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash generated by operations and issuance of additional financial structures such as product financing and royalty agreements. The capital structure of the Company is composed of shareholders' deficiency, cash, long-term and short-term debts. The provisions of certain financing agreements provide for restrictions on the activities of the Company in terms of their use of funds. Such restrictions are mainly applied in specific product development financing projects. The Company's objectives when managing capital are to provide competitive cost structures, safeguard its assets and daily cash flow management in order to maximize the Company's cash holding.

The Company's capital is summarized in the table below.

Refer to the note 2b for information on how the Company manages its plan and its ability to continue as a going concern.

b. Foreign currency risk

Most of the Company's sales are denominated in foreign currencies. The Company's US dollar foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are shown in the table below.

	30-Apr-21	31-Jul-20
	US\$	US\$
Cash	180	290,438
Trade and other receivables	810,679	115,723

c. Interest rate risk

The Company is not exposed to interest rate risk as it borrows funds at fixed rates.

d. Credit risk

The Company exposed to credit risk in relation to its trade accounts receivable. To mitigate such risk, the Corporation continuously monitors the financial condition of its customers and reviews the credit history or worthiness of each new customer. The Company mitigates this risk by requiring a 100% down payment prior to shipment for new customers or distributors or 50% down payment on most orders at the time of purchase, and the remaining 50 prior to shipment for long standing customers with a long standing credit history.

The Company establishes an allowance for doubtful accounts based on specific credit risk of its customers by examining such factors as the number of overdue days of the customers' balance outstanding as well as the customers' collection history. Since 98% of the Company's sales are with three international companies there is no significant concentration of credit risk.

Age of receivable that are past due but not impaired

120 +	\$978,424
--------------	------------------

Total	\$0
--------------	------------

Trade and other receivables include amounts that are past due as at April 30, 2021 for which the Company has not recognized an allowance for doubtful accounts because there has not been a significant change in credit quality of the customer and the amounts are still considered recoverable.

e. Liquidity risk

Liquidity risk represents the possibility that the Company may not be able to gather sufficient cash resources, when required and under reasonable conditions, to meet its financial obligations. As at April 30, 2021, the Company does not have sufficient cash to meet all of its current liabilities.

The Company also continues to have an ongoing need for substantial capital resources to research and develop, commercialize and manufacture its products and technologies. The Company is not yet receiving a significant ongoing revenue stream, nor can it be certain that it will receive significant revenue before additional cash is required. As a result, there can be no assurance that the Company will have sufficient capital to fund its ongoing operations, develop or commercialize its products without future financing.

The Company's contractual maturities for its financial liabilities are outlined in the table below.

For the nine months ended April 30, 2021

	Total	Less than 1 year	1 to 3 years	4 to 5 years	After 5 years

Total debt	18,958,425	15,806,437	1,313,360	366,244	1,472,384

The payments noted above do not include interest payments.

10. Royalty provision

During March 2015, the Company entered into a royalty agreement with MedMira Holding AG whereby MedMira Holding AG would receive a 10% royalty on all future US sales of the Reveal G4 product for a five year period commencing on the day the first full payment and delivery of at least CAD \$100,000 worth of product. In exchange, MedMira Holding AG provided the Company with \$270,000 to fund costs required to complete the product development and obtain US Food and Drug Administration (FDA) pre-market approval. At the inception of the arrangement, the Company's best estimate of the value of the provision was zero and as MedMira Holding AG is the controlling shareholder of the Company, the \$270,000 was recorded in equity (Note 8). As at April 30, 2021, the Company's best estimate of the fair value of the provision was \$101,603 (July 31, 2020 - \$101,603), which is recorded in royalty provision and the change in fair value of the provision recorded in financing expense in profit or loss.

During July 2016, the Company entered into a royalty agreement with MedMira Holding AG whereby MedMira Holding AG would receive a 10% royalty on all future sales of the hepatitis C (HCV) portion of the approved Multiplo HIV/HCV test commencing on the day of the first full delivery and payment of CAD \$10,000 worth of product. In exchange, MedMira Holding AG provided the Company with \$200,000 to fund costs required to complete product development and obtain FDA pre-market approval. At the inception of the arrangement, the Company's best estimate of the fair value of the provision was zero and as MedMira Holding AG is the controlling shareholder of the Company, the \$200,000 was recorded in equity reserve. As at April 30, 2021, the Company's best estimate of the fair value of the provision was zero. Management's fair value estimate was based on changes made during the FY2017 product commercialization prioritization process which placed the Multiplo HIV/HCV project on hold until further notice.

In Canadian dollars

During October 2016, the Company entered into a royalty agreement with Ritec AG whereby Ritec AG would receive a 12.5% royalty on all future sales of the approved Reveal G4 CLIA-waived product commencing on the day of the first full delivery and payment of CAD \$10,000 worth of product. In exchange, Ritec AG provided the Company with \$1,310,100 to fund costs required to complete the product development, clinical trials and obtain FDA approval. At the inception of the arrangement, the Company's best estimate of the fair value of the provision was zero and as Ritec AG is owned by a shareholder of MedMira Holding AG who is the controlling shareholder of the Company, the \$1,310,100 was recorded in equity reserve. At April 30, 2021, the Company's best estimate of the fair value of the provision was zero.

The change in royalty provision is outlined in the table below:
