INTRODUCTION

The following management's discussion and analysis of financial condition and results of operations ("MD&A") for the six months ended December 31, 2024 should be read in conjunction with the audited financial statements for the six months ended December 31, 2024 and the related notes thereto of Victory Opportunities 1 Corp. (the "Company" or "Victory"). The MD&A is the responsibility of management and has been reviewed and approved by the Board of Directors of the Company.

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities. The estimates and associated assumptions are based on anticipations and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods. There have been no significant judgments made by management in the application of IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board other than the going concern assumption that have a significant effect on these financial statements.

This MD&A is dated February 7, 2025.

For the three and six months ended December 31, 2024 and 2023

LIQUIDITY AND CAPITAL RESOURCES

As at December 31, 2024, the Company had accounts payable and accrued liabilities of \$13,010 due within 12 months and had cash of \$201,067 to meet its current obligations. As a result, the Company has minimal liquidity risk.

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to provide returns for shareholders and to maintain a flexible capital structure that optimizes the costs of capital within a framework of acceptable risk. In the management of capital, the Company includes the components of shareholders' equity as well as cash. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash. The Company is dependent on the capital markets as its primary source of operating working capital and the Company's capital resources are largely determined by its ability to compete for investor support of its projects.

The Company's audited financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. As at December 31, 2024, the Company had accumulated losses of \$299,889 since its inception and expects to incur further losses in the development of its business. The Company's ability to continue as a going concern is dependent upon raising additional capital to complete the acquisition of an asset or business and the achievement of profitable operations. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

CAPITAL EXPENDITURES

The Company incurred \$Nil in capital expenditures during the six months ended December 31, 2024.

During the six months ended December 31, 2024, there were no transactions with related parties.

CRITICAL JUDGMENTS AND ESTIMATES

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Significant accounting judgments

- i. the evaluation of the Company's ability to continue as a going concern
