Notes to the Condensed Financial Statements

(Unaudited)

NOTE 1 – NATURE OF OPERATIONS AND ABILITY TO CONTINUE AS A GOING CONCERN

Ximen Mining Corp. (the “Company”) was incorporated under the Business Corporations Act of British Columbia on December 4, 2006. The Company is currently engaged in the acquisition, exploration, and evaluation of its mineral property interests located in British Columbia. The Company’s shares are listed on the TSX-V Exchange (“TSX-V”) under the symbol XIM, on the Frankfurt Exchange under the symbol A1W2EG, and on the US OTCQX, under the symbol XXMMF. The head office, principal address, and registered office is located at 888 Dunsmuir Street, Suite 888, Vancouver, British Columbia, Canada.

The Company is in the process of exploring and developing its exploration and evaluation assets and has not yet determined whether the properties contain mineral reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain necessary financing to complete the development of those mineral reserves, and upon future production or proceeds from the disposition thereof.

These consolidated financial statements have been prepared using International Financial Reporting Standards applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Accordingly, it does not give effect to adjustments that, if any, would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts which may differ from those shown in the consolidated financial statements. The ability of the Company to continue as a going concern is dependent on its ability to obtain additional equity financing and achieve future profitable operations.

As at December 31, 2023, the Company has an accumulated deficit of \$47,668,864 and working capital deficiency of \$1,361,963. The Company’s ability to continue operations is dependent upon the financial support from its shareholders and other related parties, its ability to obtain additional financing, the existence of economically recoverable reserves, and the attainment of profitable operations or enough proceeds from disposition of the properties. The outcome of these matters cannot be predicted at this time. While management has been successful in obtaining enough funding for its operating, capital, development, and exploration requirements from the inception of the Company to date, there is no assurance that additional future funding will be available to the Company or on terms that are acceptable to management.

The Company is in the process of exploring and developing its exploration and evaluation assets and has not yet determined whether the properties contain mineral reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain necessary financing to complete the development of those mineral reserves, and upon future production or proceeds from the disposition thereof.

The current cash resources are not adequate to pay the Company’s accounts payable and to meet its minimum commitments at the date of these financial statements, including planned corporate and administrative expenses, and other project implementation costs; accordingly, there is significant doubt about the Company’s ability to continue as a going concern. These financial statements do not give effect to adjustments that would be necessary to the carrying amounts and classifications of assets and liabilities should the Company be unable to continue as a going concern.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

a) Statement of Compliance

The interim financial statements have been prepared in accordance to IAS 34 *Interim Financial Reporting* using accounting policies consistent with the International Financial Reporting Standards (“IFRSs”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value.

These unaudited financial statements were approved and authorized for issue by the board of Directors on February 28, 2024.

b) Basis of Preparation

These interim financial statements do not include all the information required for full annual financial statements. The condensed interim financial statements should be read in conjunction with the Company’s annual audited financial statements for the year ended June 30, 2023. The accounting policies, methods of computation and presentation applied in these financial statements are consistent with those of the previous financial year.

NOTE 3 – NEW ACCOUNTING STANDARDS

Several new standards, and amendments to standards and interpretations, are not yet effective for the period ended December 31, 2023, and have not been applied in preparing these consolidated financial statements. None are currently considered by the Company to be significant or likely to have a material impact on future consolidated financial statements.

NOTE 4 – MARKETABLE SECURITIES.

Marketable securities consist of a portfolio of investments held for trading. The fair value of the marketable securities has been determined directly by reference to public price quotations in an active market. These marketable securities are comprised of common shares of publicly traded companies and are classified as fair value through profit or loss and measured at fair value with unrealized gains and losses recognized through the statement of operations.

NOTE 7 – INVESTMENT IN KENVILLE GOLD MINE AND PROPERTY

In April and May 2019, the Company entered into various agreements whereby it acquired approximately 78% of the issued and outstanding shares of 0995237 B.C. Ltd (“099 BC”), a private arm’s length company, in exchange for common shares and future cash payments by the Company. The principal asset of 099 BC is its option to acquire the Kenville Gold Mine, located west of Nelson, B.C.

Acquisition of Subsidiary - 0995237 B.C. Ltd.

In May 2019, the Company issued a total of 3,528,769 common shares (705,754 shares post consolidation) from treasury (approximately 10.62% of the Company’s total issued and outstanding common shares) for common shares and notes payable of 099 BC as follows:

- (i) 2,253,769 common shares (450,754 shares post consolidation) of the Company, fair valued at \$1,115,616, to former shareholders of 099 BC in exchange for 43,261,811 common shares of 099 BC, representing 78% of the total outstanding common shares of 099 BC (the “78% Interest”).
- (ii) 1,275,000 common shares (255,000 shares post consolidation) of the Company, fair valued at \$631,125, to a former shareholder of 099 BC in exchange for his promissory note receivable from 099 BC – principal amount of \$1,000,000 plus accrued interest receivable of \$118,388, for total face value of \$1,118,388. The excess of the total face value of the note payable and interest over the fair value of the Company’s shares issued, \$487,263, is recognized as gain on assumption of the promissory note payable.

The Company also has additional obligations as it acquired the following payables of 099 BC from a former shareholder of 099 BC as follows:

- (iii) Cash payable of \$980,000 in exchange for 099 BC note payable with a face value of \$1,957,865. The excess of the face value of the note payable over the future cash payment, \$977,865, was recognized as gain on assumption of the promissory note payable in 2019. This future cash payment is unsecured, non-interest bearing, and includes repayment dates (Note 14).
- (iv) Cash payable of \$400,000 in exchange for the same amount of debt owed to a former shareholder of 099 BC who paid for mining equipment owned by 099 BC. This future cash payment is unsecured, non-interest bearing, and includes repayment dates (Note 14).
- (v) Assumption of debt totaling \$270,000 to two former shareholders of 099 BC by 099 BC. This amount was incurred on exploration expenditures related to Kenville property.

The following table summarizes the recognized fair value amounts of assets acquired and liabilities assumed on May 30, 2019, the date of acquisition of 78% interest in 099 BC:

(Unaudited)

The acquisition of 78% interest of 099 BC by the Company does not meet the requirement of IFRS 3, Business Combinations. As such, this acquisition was accounted for under IFRS 6, Exploration and Evaluation of Mineral Resources. The premium of the consideration paid by the Company over the net liabilities of the acquired 099 BC was expensed as exploration and evaluation expenditures as the Company's accounting policy is expensing both the acquisition costs and exploration costs during the period when the expenditures were incurred.

The fair value of the consideration given by the Company for the 78% controlling interest in 099 BC, was \$1,115,616, (2,253,769 common shares (450,754 shares post consolidation) issued at \$0.495 (\$2.475 post consolidation) per share). The fair value of the 22% non-controlling interest in 099 BC was therefore valued at \$314,661, using the 78% valuation amount. Accordingly, the premium in the amount of \$3,453,057, comprising the fair value of the shares issued by the Company plus the fair value of the 22% non-controlling interest, totaling \$1,430,277, over the fair value of the net liabilities of 0995237 BC Ltd. acquired by the Company, were recognized as exploration and evaluation expenditures for 2019.

On July 3, 2019, as part of the acquisition of 099 BC, the Company acquired an additional 4,733,320 shares of 099 BC by issuing 236,666 common shares (47,333 shares post consolidation) to shareholders of 099 BC. On June 8, 2020, the Company acquired an additional 400,000 shares of 099 BC by issuing 20,000 common shares (4,000 shares post consolidation). The additional shares purchased brings the total percentage owned of 099 BC from 78% to 88%.

The fair value of the consideration given by the Company for the additional 10% of non-controlling interest was \$167,033 including \$153,833 (236,666 common shares (47,333 shares post consolidation) issued at \$0.65 per share (\$3.25 post consolidation)) and \$13,200 (20,000 common shares (4,000 shares post consolidation) issued at \$0.66 per share (\$3.30 post consolidation) per share). The carrying value of the additional 10% non-controlling interest was \$122,822 prior to the acquisition of this non-controlling interest by the Company. The difference between the fair value of the consideration paid by the Company (\$167,033) and the carrying value (\$122,822), \$44,211, was charged to other comprehensive loss in 2020.

On July 7, 2020, the Company acquired a further 66,667 shares of 099 BC by issuing 3,334 shares (667 shares post consolidation), fair valued at \$1,500, and in addition, 099 BC cancelled 4,000,000 shares, representing 7% of non-controlling interest. The difference between the fair value of the consideration paid and the carrying value is \$1,303 which was charged to other comprehensive loss.

Acquisition of Royalty Option from Gungnir Resources Inc.

On April 25, 2019, the Company entered into a royalty option agreement with Gungnir Resources Inc. ("Gungnir") to acquire Gungnir's receivable from 099 BC in the amount of \$220,000 and all of Gungnir's remaining interest in its 4% gross metal royalty over 099 BC owned Kenville Gold Mine Property for total consideration of \$1,700,000. The option is exercisable at the Company's sole discretion. To exercise the option under the option agreement, the Company is required to pay the \$1,700,000 as follows:

- \$500,000 in cash (paid);
- \$200,000 in common shares of Ximen (285,918 shares (57,184 shares post consolidation) issued fair valued at \$142,959);
- \$1,000,000 in cash, to be paid on or before October 31, 2019 (paid).

The exercise of the option is conditional on Ximen paying the full purchase price as set out above and receipt of TSX-V approval. TSX-V approved the transaction on May 24, 2019.

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing. All properties are located in Canada.

a) Brett Property, British Columbia, Canada

On December 3, 2013, the Company entered into an option agreement to acquire a 100% interest in the Brett Gold Project situated in the North Okanagan region of southwest British Columbia approximately 29 kilometers west of Vernon. Restricted Stock Units. The shares issued were fair valued at \$115,000 which was recorded as stock-based compensation.

Shares Issued Under Restricted Stock Unit (RSU) Plan

During the year ended June 30, 2019, the board of directors approved the adoption of a new Restricted Share Unit Plan ("RSU Plan"), which was approved by the shareholders. The RSU Plan allows the eligible person to acquire restricted share units of the Company and is designed to provide the Company with an additional tool to compensate certain directors, officers, consultants and other key employees of the Company. The maximum number of RSU units that the Company may grant is 2,250,000 units (450,000 units post consolidation).

d) Stock Options

The Company has a stock option plan under which it is authorized to grant options to directors, employees, and consultants enabling them to acquire up to 10% of the issued and outstanding common shares of the Company. Under the plan, the exercise price of each option equals the market price, minimum price, or a discounted price of the Company's shares as calculated on the date of grant. The options can be granted for a maximum term of 5 years. Vesting terms are determined by the board of directors at the time of grant.

NOTE 16– CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration, and development of resource properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company manages its share capital as capital, which as at December 31, 2023, was \$46,054,191 (June 30, 2023 – \$45,001,897). Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the period ended December 31, 2023.

NOTE 17 – FINANCIAL INSTRUMENTS

The fair value of the Company's loan receivable, accounts payable and accrued liabilities, convertible debentures payable, and amounts due to related parties approximate their carrying value, which is the amount recorded on the consolidated statement of financial position. The Company's other financial instruments and cash under the fair value hierarchy are recorded at fair value based on level one quoted prices in active markets for identical assets or liabilities.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

a) Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. Management believes that its credit risk is not significant.

b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2023, the Company had a cash balance of \$32,741 to settle current liabilities of \$1,687,899. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. Management expects to fund those liabilities through the issuance of capital stock and loans from related parties over the coming year.

c) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's loans receivable and amounts due to related parties are non-interest bearing. Interest on the Company's debentures payable are based on fixed rates, and as such, the Company is not exposed to significant interest rate risk.

d) Foreign Currency Risk

The Company is exposed to foreign currency risk on fluctuations related to cash and cash equivalents and accounts payable and accrued liabilities that are denominated in U.S. Dollars. The Company's financial instruments denoted in U.S. Dollars are insignificant and any fluctuation in foreign currency exchange rates would have an insignificant impact on net loss for the year.

e) Commodity Price Risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. Management closely monitors commodity prices to determine the appropriate course of actions to be taken in its investing and financing activities. As the Company has not yet developed commercial mineral interests, it is not exposed to significant commodity price risk.
