NEWS RELEASE

Trident Resources to Commence Inaugural 5,000m Drill Program at Contact Lake High-Grade Gold Project, Saskatchewan

Vancouver, BC, August 6th, 2025 – Trident Resources Corp. (TSX-V: [ROCK](#)) (OTCQB: [TRDTF](#)) (“Trident” or the “Company”) is pleased to announce an upcoming fully-funded 5,000-metre drill program at its high-grade Contact Lake Gold Project, located in the La Ronge Gold Belt of Saskatchewan. This marks Trident’s first drill campaign and the first modern exploration on the historic Contact Lake target in nearly 30 years. The 16-hole program will begin this month as crews have begun to mobilize to the project.

Contact Lake Project Location Map:

<https://www.tridentresourcescorp.com/projects/contact-lake-gold-project/#&gid=1&pid=1>

Trident enters this program with over \$11 million in cash and marketable securities, fully funding this drill program and positioning the Company to act swiftly on future exploration opportunities across its Saskatchewan portfolio.

“This inaugural drill program is a major milestone for Trident. We’re picking up where Cameco left off - except now, gold trades at over 10x the price it did when they shut the mine. We’re fully funded, highly motivated, and excited to unlock value at Contact Lake,” said Jonathan Wiesblatt, CEO of Trident.

Contact Lake Gold Project Plan View:

<https://www.tridentresourcescorp.com/gallery/album-2/lq/ContactLakeGoldProject2.jpg>

Drilling will target the heart of the past-producing Contact Lake Mine, following up on historical high-grade intercepts including:

Contact Lake Gold Deposit - Historical Drill Intercepts					
Hole ID	From (m)	To (m)	Interval (m)	Au (g/t)	Description
TU89-125	56.0	76.5	20.5	12.81	length weighted average
TU89-127	39.5	57.8	18.3	10.41	length weighted average
TU90-146	205.3	205.9	0.6	2,616.00	single assay
TU92-316	138.3	138.8	0.5	94.06	single assay
<p>Notes:</p> <p><i>*Analytical data sourced from Cameco historical records</i></p> <p><i>*Historical sampling was discontinuous - data gaps were assigned a zero value</i></p> <p><i>*Intervals are drilled intercepts and do not reflect true thickness with true thickness unknown</i></p>					

Location Map of Planned Drill Holes:

Contact Lake Gold Project Highlights:

- Proven Past Production: 1.0 million tonnes milled at 6.16 g/t Au (190,088 oz gold recovered, Cameco 1999)
- High Recovery: 95% life-of-mine mill recovery
- Untested Zones: Mineralization remains open along strike and at depth
- Historic Resource: Cameco internal estimate suggests significant gold remains
- Infrastructure Ready: Onsite power, highway access, and historic underground workings
