

## **GreenPower Announces Delivery of Three BEAST School Buses to Its Dealer for Grant County under EPA Clean School Bus Program**

### *West Virginia Deployments Now Total 22 GreenPower School Buses*

**South Charleston, West Virginia, May 5, 2025** - [GreenPower Motor Company Inc.](#) (NASDAQ: [GP](#)) (TSXV: GPV) ("GreenPower"), a leading manufacturer and distributor of purpose-built, all-electric, zero-emission medium and heavy-duty vehicles serving the cargo and delivery market, shuttle and transit space and school bus sector, today announced that three Type D all-electric, purpose-built, zero-emission [BEAST](#) school buses have been delivered to its West Virginia dealer for the Grant County School District under Round 2 funding of the Environmental Protection Agency's (EPA) Clean School Bus Program (CSBP).

"GreenPower continues to manufacture and deliver its all-electric, purpose-built school bus products to its dealer in West Virginia and dealers across the nation for school districts in a timely manner despite the current uncertainties of public policy, tariffs and funding," said Brendan Riley, President of GreenPower. "This week's delivery to our West Virginia dealer is for the second school district in West Virginia under the Clean School Bus Program since the contract with EPA was signed just four months ago and the federal funding became available in mid-March."

*GreenPower announced the delivery of three [BEAST](#) school buses to its West Virginia dealer for the Grant County School District under Round 2 funding of the EPA's Clean School Bus Program.*

Delivery of the West Virginia-manufactured school buses under the EPA grant was paused for a few weeks as part of the freeze on spending implemented by the Trump Administration as the new EPA team evaluated program spending. After the freeze was lifted, GreenPower's first delivery to its dealer in West Virginia under the CSBP was for Kanawha County and today's announcement

represents the second set of buses under the award to Grant County. Calhoun County's school buses funded under the CSBP will be the next delivery for GreenPower to its dealer.

To date, GreenPower has delivered 22 of its all-electric, purpose-built, zero-emission school buses in West Virginia for deployment in school districts across the Mountain State, including 16 BEASTS and six Nano BEASTs. The deployments represent approximately one-half of the orders placed for West Virginia school districts that have installed charging infrastructure and are prepared to accept the buses.

As the leading purpose-built American manufacturer of EV school buses, GreenPower is the only all-electric OEM that manufactures both a Class 4 Type A school bus and a Class 8 Type D school bus. The BEAST is a purpose-built 40-foot Type D all-electric, zero-emission school bus with seating for up to 90 students. Designed from the ground up as an EV, it is a fully integrated structure that features a strong and corrosion resistant aluminum body made from extruded aluminum, manufactured by Constellium, seamlessly mated to a high strength steel Truss (bus) chassis. The complete flat floor design allows for adjustable track seating with no wheel wells in the passenger compartment, and the high floor keeps students out of the impact zone. Combined port charging is standard with Level 2 rates up to 19.2 kW and DC Fast Charging rates up to 85 kW, allowing for full charging in less than three hours.

#### ***About GreenPower Motor Company, Inc.***

GreenPower designs, builds and distributes a full suite of high-floor and low-floor all-electric medium and heavy-duty vehicles, including transit buses, school buses, shuttles, cargo vans and a cab and chassis. GreenPower employs a clean-sheet design to manufacture all-electric vehicles that are purpose-built to be battery powered with zero emissions while integrating global suppliers for key components. This OEM platform allows GreenPower to meet the specifications of various operators while providing standard parts for ease of maintenance and accessibility for warranty requirements. GreenPower was founded in Vancouver, Canada with primary operational facilities in southern California. Listed on the Toronto exchange since November 2015, GreenPower completed its U.S. IPO and NASDAQ listing in August 2020. #### ***Forward-Looking Statements***

This document contains forward-looking statements relating to, among other things, GreenPower's business and operations and the environment in which it operates, which are based on GreenPower's operations, estimates, forecasts and projections. Forward-looking statements are not based on historical facts, but rather on current expectations and projections about future events and are therefore subject to risks and

uncertainties which could cause actual results to differ materially from the future results expressed or implied by the forward-looking statements. These statements generally can be identified by the use of forward-looking words such as "upon", "may", "should", "will", "could", "intend", "estimate", "plan", "anticipate", "expect", "believe" or "continue", or the negative thereof or similar variations. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. A number of important factors including those set forth in other public filings (filed under the Company's profile on [www.sedar.com](http://www.sedar.com)) could cause actual outcomes and results to differ materially from those expressed in these forward-looking statements. Consequently, readers should not place any undue reliance on such forward-looking statements. In addition, these forward-looking statements relate to the date on which they are made. GreenPower disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
