### (b) Reserves

Reserves within shareholders' equity represent equity-settled employee benefits reserve.

### (c) Share-based compensation

The following table summarizes the share-based compensation expense included in the interim condensed consolidated statements of comprehensive income (loss):

Periods ended March 31,	Three months		Nine months	
	2026	2025	2026	2025

#### Stock options

For all stock options granted, the Company determined compensation expense based on the estimated fair values at the grant date of the stock options using the Black-Scholes option-pricing model. The estimated fair value of the stock options is amortized to share-based compensation over the vesting period of the options.

Changes in the stock option plan for the nine months ended March 31, 2026 are as follows:

<i>(in number of units, except prices)</i>	Number of Options	Weighted average exercise price per option
Outstanding, July 1, 2025	32,000	\$ 14.76

Performance share unit ("PSU") plan

The Company's PSU plan sets the maximum number of PSUs that can be issued at 6% of the outstanding common shares of the Company. No further approval by the shareholders of the Company is required for any unallocated PSUs.

During the three and nine months ended March 31, 2026, the Company did not issue any PSUs to eligible persons under the PSU plan (March 31, 2025 - nil and 205,566 PSUs, respectively). These PSUs have five-year terms, and vest in three tranches upon the achievement of certain closing market trading prices of the Company's common shares for a period of twenty consecutive business days. During the three and nine months ended March 31, 2026 and 2025, nil PSUs vested.

As at March 31, 2026 and June 30, 2025 the Company had 543,657 PSUs outstanding.

The fair value of the PSUs were determined using a Monte Carlo simulation. On grant, the Company estimated the achievement dates of each performance condition, and the cost of the PSUs is expensed on a straight-line basis over the period from the grant date to the expected market condition achievement date. The Company estimated forfeitures of PSUs between 0% and 10% on grant, and adjusts the amount recognized in expense upon vesting.

**16. FAIR VALUE HIERARCHY**

Assets and liabilities measured at fair value in the consolidated statements of financial position, or where fair value disclosures are required, are classified based on a three-level hierarchy as follows:

Level 1: determined by reference to quoted prices in active markets for identical assets and liabilities;

Level 2: determined by using inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e. derived from prices); and

Level 3: determined using inputs that are not based on observable market data.

During three and nine months ended March 31, 2026, there were no transfers between Level 1 and Level 2 fair value classifications. As at March 31, 2026, the Company had customer-based warrants which are classified as Level 2. Refer to Note 17 - Financial Instruments Risk Management for further information.

**17. FINANCIAL INSTRUMENTS RISK MANAGEMENT**

Accounts receivable

As at March 31, 2026, the weighted average age of customer accounts receivable was 32 days (June 30, 2025 - 32 days), and the weighted average age of past-due accounts receivable approximated 38 days (June 30, 2025 - 47 days). Accounts are considered to be past due when customers have failed to make the required payments by their contractually agreed upon due date. The aging of trade receivables that are not considered to be impaired are as follows:

As at	March 31, 2026	June 30 2025
Current	\$ 25,026	\$ 20,704
1 to 30 days	1,190	654
31 to 60 days	81	1,389
Over 60 days	179	60
<b>Total accounts receivable</b>	<b>\$ 26,476</b>	<b>\$ 22,807</b>

Currency exposure

The Company periodically enters into forward foreign exchange contracts to manage foreign currency exchange risk related to exposures to the exchange rates for the Canadian dollar. Forward contracts are entered into based on projected requirements for converting U.S. to Canadian dollars. The Company does not recognize these contracts in the consolidated financial statements when they are entered into, nor accounts for them as hedges. Instead, the contracts are marked to fair value at each balance sheet date. Changes in fair value are recorded in the interim condensed consolidated statements of comprehensive income (loss) in foreign exchange gain. The fair value of these contracts is included in accounts receivable when in an asset position or accounts payable when in a liability position. As at March 31, 2026 and June 30, 2025, the Company did not have any forward contracts.

Customer based warrants

The Company executed a warrant agreement with one of its key customers in the first quarter of fiscal 2024 to purchase up to 361,050 common shares at an exercise price of \$17.09 with vesting conditions based on the achievement of certain multi-year spending targets. As at March 31, 2026, all three tranches have vested as the spending targets have been met. The warrants are accounted for as financial liabilities due to their conversion features and will be remeasured to their fair market value at each reporting date until the earliest of settlement, cancellation or expiry. A binomial options pricing model was used to derive the fair value of customer based warrants. The fair value of warrants as at March 31, 2026 was \$841 (June 30, 2025 - \$290). Warrant expense during the three and nine months ended March 31, 2026 of \$385 and \$566, respectively (March 31, 2025 - recovery of \$974 and \$1,739, respectively), was reflected as a reduction of revenue in the Company's interim condensed consolidated statements of comprehensive income (loss).
