

REV STRIKES DEAL WITH MAX POWER ON SASKATCHEWAN ASSETS AND FORMS NATURAL HYDROGEN ALLIANCE

VANCOUVER, British Columbia, June 18, 2025: REV Exploration Corp. (“REV” or the “Company”) (TSXV: REVX), formerly Gitennes Exploration Inc., is pleased to announce that it has formed a strategic alliance with MAX Power Mining Corp. (CSE: MAXX, www.MaxPowerMining.com) to accelerate the exploration and development of Natural Hydrogen in Western Canada. REV will focus directly on Alberta, advancing its drill-ready Aden Dome Project among other potential initiatives in the province, while enjoying leverage to MAX Power’s success in Saskatchewan (refer to MAX Power news release June 18, 2025).

Highlights

- REV to receive \$350,000 from MAX Power over the next 4 months
- REV to immediately receive 4 million shares of MAX Power at deemed price per share of \$0.25 and 2 million warrants (25-cent strike price, 3-year expiry), subject to statutory 4-month hold periods
- Technical and marketing collaboration between REV and MAX Power

Jordan Potts, REV Exploration CEO, commented: *“This deal with MAX Power demonstrates our team’s ability to effectively monetize assets to the benefit of our shareholders. We see strong potential for Natural Hydrogen discovery and development in Western Canada. REV management views the Aden Dome Project, located along the Alberta-Montana border, as a unique opportunity that could meaningfully impact the company’s future direction.*

“Our approach is to concentrate our efforts in Alberta, where we are carving out a niche for Natural Hydrogen, while also gaining exposure to Natural Hydrogen opportunities in Saskatchewan through our transaction with MAX Power. As the dominant Natural Hydrogen player in Saskatchewan, MAX Power is ideally positioned to advance development in that province. This agreement enables each company to focus on its primary jurisdiction, while also facilitating collaboration through the sharing of technical data, geological resources, and coordinated marketing efforts. The strategic partnership is expected to reduce costs, improve operational efficiency, and support project outcomes for both parties,” Mr. Potts concluded.

REV-MAX Power Deal

MAX Power has acquired certain Natural Hydrogen exploration permits for Saskatchewan from REV (these permits are specifically referred to by the government as “Helium and Associated Gases” permits) and REV will transfer to MAX Power any additional permits it receives from the Saskatchewan government for applications posted through the end of May 2025, pursuant to an arms length definitive agreement between the two companies dated June 17, 2025 (the “Agreement”), subject to CSE and TSXV approvals. This Agreement provides REV with cash and share payments as outlined below and is part of a broader strategic alliance between the two companies. There are no finder’s fees associated with this transaction.

MAX Power and REV have also formed a technical collaboration aimed at accelerating exploration and development of MAX Power’s Saskatchewan Natural Hydrogen assets as well as REV’s Natural Hydrogen pursuits in Alberta. The

two companies will also cooperate with respect to certain marketing initiatives in order to help maximize exposure for each company on a global scale.

Cash/share terms of the MAX Power/REV deal:

- \$150,000 cash payable to REV from MAX Power within 30 days of closing
- An additional \$200,000 cash payable to REV from MAX Power within 90 days of closing
- Shares: 4 million shares of MAX Power at a deemed price of \$0.25 to be issued to REV upon closing, subject to a statutory 4-month hold period
- Warrants: 2 million warrants of MAX Power to be issued to REV with a strike price of \$0.25 and a 3-year expiry date, subject to a statutory 4-month hold period

REV To Launch New Website

REV Exploration is pleased to announce the launching of its new website effective today, June 18, 2025, at www.RevExploration.com. This new site marks the start of a branding and awareness campaign for REV as it focuses on Alberta. Visit the website or click on the following link for an introduction to REV from the Company's investor relations consultant, Chad Levesque:
