Notes to Condensed Interim Consolidated Financial Statements Three Months Ended July 31, 2024 and 2023 (Expressed in Canadian Dollars) (Unaudited)

#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Incorporated under the Canada Business Act, Edgewater Wireless Systems Inc. (the "Company") main activity is developing and commercializing leading edge technologies and intellectual property for the communications market. The Company's head office is Suite 202, 11 Hines Road, Kanata, Ontario, Canada.

These unaudited condensed interim consolidated financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

The Company has not earned substantial revenue from the sale of its products and is, therefore, considered to be in the development stage. For the three months ended July 31, 2024, the Company incurred a net loss of \$218,142 and negative cash flow from operating activities of \$78,912. In addition, the Company had a deficit of \$47,833,422 and a working capital deficiency (current assets less current liabilities) of \$1,606,519 at July 31, 2024. As a result of the above factors, a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. The continuation of the Company's operations, including product development and marketing activities, is dependent upon the Company's ability to successfully fund its working capital requirements through either debt or equity financing.

Management will need to secure additional financing in sufficient time to complete its planned programs for Fiscal 2026. There can be no assurance that the capital will be available as necessary to meet these continuing expenditures or, if the capital is available, that it will be on terms acceptable to the Company. If the Company cannot secure additional financing on terms acceptable to it or generate product sales with upfront payments, the Company will have to consider additional strategic alternatives which may include, among other strategies, additional cost curtailments, exploring the monetization of intangible assets, seeking to out-license and/or divest assets, winding up, dissolution or liquidation of the Company.

The unaudited condensed interim consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis were not appropriate for these consolidated financial statements, then adjustments would be necessary in the carrying value of the assets and liabilities, the reported revenue and expenses and the consolidated statement of financial position classifications used.

### 2. BASIS OF PRESENTATION

#### Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"), and follow the same accounting policies and methods of application as the annual consolidated financial statements of the Company for the year ended April 30, 2024, except as noted below under changes in accounting policies. Accordingly, they do not contain all disclosures required by International Financial Reporting Standards ("IFRS") and should be read in conjunction with the annual consolidated financial statements for the year ended April 30, 2024 and the notes thereto. These unaudited condensed interim consolidated financial statements were approved by the Board of Directors of the Company on September 30, 2024.

These unaudited condensed interim consolidated financial statements have been prepared under the historical cost convention, except for certain financial instruments measured at fair value, as set out in the accounting policies in note 3 of the annual consolidated financial statements for the year ended April 30, 2024.

The preparation of these unaudited condensed interim consolidated financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual consolidated financial statements for the year ended April 30, 2024.

#### 3. MATERIAL ACCOUNTING POLICIES

### New accounting policies adopted

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after May 1, 2024. Many are not applicable or do not have a significant impact to the Company and have been excluded. The Company has adopted the following policy effective May 1, 2024.

#### IAS 1, Presentation of Financial Statements ("IAS 1")

IAS 1 was amended in January 2020 to provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date. The amendments clarify that the classification of liabilities as current or non-current is based solely on a company's right to defer settlement at the reporting date. The right needs to be unconditional and must have substance. The amendments also clarify that the transfer of a company's own equity instruments is regarded as settlement of a liability, unless it results from the exercise of a conversion option meeting the definition of an equity instrument. The amendments are effective for annual periods beginning on January 1, 2024. There was no significant impact to the Company.

#### 4. SHORT-TERM INVESTMENT

At July 31, 2024, the Company had invested \$11,010 in a guaranteed investment certificate bearing an annual interest rate of 4.25% and maturing in February 2025.

#### 5. AMOUNTS RECEIVABLE

The composition of amounts receivable was as follows:

During the year ended April 30, 2021, the Company applied and received \$60,000 under the CEBA program offered by the Government of Canada. The CEBA loan has no repayment terms and are non-interest bearing during the initial term, until January 18, 2024. The Company has applied an interest rate of 12% in calculating the fair value of the interest free loan, and the \$22,883 residual was initially recorded as deferred government assistance.

On January 18, 2024, the remaining outstanding loan balance was converted into a term loan at fixed interest rate of 5% per annum, due on December 31, 2026. If \$40,000 of the loan is repaid by January 18, 2024, the remaining \$20,000 of the loan will be forgiven. If the Company applies for refinancing with the financial institution that provided the loan by January 18, 2024, the Company may still qualify for the \$20,000 loan forgiveness, if \$40,000 of the loan and any outstanding interest is paid back by March 28, 2024. The Company did not qualify for the \$20,000 loan forgiveness, and the interest free loan initially recorded as deferred government assistance was reclassified as loan payable subsequent to March 28, 2024.

#### 11. CONVERTIBLE DEBENTURES

On September 1, 2022, the Company issued non-secured convertible debentures for proceeds of \$716,000 which mature on September 1, 2025 ("convertible debentures"). The convertible debentures bear annual interest at 10%, payable quarterly, in shares or cash, at the discretion of management. If the Company elects to pay in shares, the interest payments are based on the price per share which equals the higher of (i) the market price on the date the interest becomes payable or (ii) the volume weighted average trading price of the Company's shares for ten (10) consecutive trading days preceding the date the interest becomes payable. The principal of the convertible debentures is convertible, as described below, into Units which represent one common share and one warrant to purchase one common share at an exercise price of \$0.23 for a period of three years after September 1, 2022. The Company can elect to accelerate expiry of the Warrant if the volume weighted average trading price of the Company's shares exceeds \$0.30 for ten consecutive trading days. The principal is convertible to Units at the option of the holders at any time after January 1, 2023 and at the option of the Company at any time after September 1, 2023 at \$0.12 per Unit. The Company has the option to prepay the convertible debentures and accrued but unpaid interest at any time after September 1, 2023.

The convertible debentures, which are hybrid instruments, were initially elected to be recognized at fair value through profit and loss. On initial recognition, the liability component of the convertible debentures was valued at \$538,214 determined by the sum of the fair values of the host debt and the net conversion and redemption feature. The host debt was valued at \$611,732 based on the terms above and selected market yield of 30%. The net conversion and redemption feature was valued at \$73,518 using the following assumptions: interest rate of 10%, unit price of \$0.08, exercise price of \$0.12, discount rate of 30%, volatility of 100%, risk-free rate of 3.51%, and expected life of 1 year. The unit price is determined as the share price plus the fair value of each warrant. Each warrant was valued at \$0.01 using the barrier option model as they are subject to an acceleration feature if the volume weighted average price of the shares exceed \$0.30 for 10 consecutive days. The following assumptions were used: share price of \$0.07, exercise price of \$0.23, barrier of \$0.30, rebate of \$0.07, volatility of 85%, risk-free rate of 3.54%, and expected life of 3 years.

Since the convertible debentures were entered into with non-arm's length related parties, the difference between the fair value at inception and the proceeds received from the convertible debentures of \$177,786 was recognized as a capital contribution and included in contributed surplus.

The redemption feature of the convertible debentures became effective on September 1, 2023. As such, the Company holds the discretion to force the conversion of the host debt into units if the price per unit falls below \$0.12. Since the fair value of units is below \$0.12 as of the valuation date, the fair value of the convertible debentures is determined to equal to fair value of the units. As at April 30, 2024, the liability component of the convertible debentures was valued at \$181,834. Each warrant was valued at \$0.0005 using the barrier option model with the following assumptions: share price of \$0.03, exercise price of \$0.23, barrier of \$0.30, rebate of \$0.07, volatility of 85%, risk-free rate of 5.18%, and expected life of 1.34 years.
