About Badger Infrastructure Solutions Ltd.

Badger Infrastructure Solutions Ltd. (TSX:BDGI) is North America’s largest provider of non-destructive excavating services. Badger works for contractors and facility owners in a broad range of infrastructure industries and in general commercial construction. Badger’s customers typically operate near high concentrations of underground power, communication, water, gas and sewer lines, where safety and economic risks are high and where non-destructive excavation provides a safe alternative for certain customer excavation requirements.

The Company’s key technology is the Badger Hydrovac™, which is used primarily for safe excavation around critical infrastructure and in congested underground conditions. The Badger Hydrovac uses a pressurized water stream to liquify the soil cover, which is then removed with a powerful vacuum system and deposited into a storage tank. Badger is unique in the non-destructive excavation industry because it designs and manufactures all of its hydrovac units at its plant in Red Deer, Alberta, which has an annual production capacity of more than 350 hydrovac units. To complement the Badger Hydrovac, the Company has a select number of specialty units, mainly Airvacs, combo trucks and sewer and flusher units.
